Masters of Uncertainty Crown Substance Misuse and Young People: Critical Issues is a comprehensive source of information on young people's requirements for assessment, treatment and other interventions because of their misuse of substances. It highlights approaches that enhance understanding of the routes that lead young people to substance misuse and also the routes away from it. The emergence of new substances and methods of misuse makes this ever more relevant. The authors are international experts in the fields of psychiatry, paediatrics, medicine, psychology, genetics, resilience, neuropharmacology and epidemiology. This book acknowledges how widespread both substance misuse and psychiatric disorders are and explores the complex, challenging links between co-occurring conditions. Use of substances is associated with illness and premature mortality, and more so for people who have combined disorders. The authors critically assess the vital need for intervention during adolescence and early adulthood. They provide detailed clinical views of the psychosocial interventions and medications currently available and illustrate them with case studies that emphasise adolescents' experiences and thoughtful lifestyle-specific interventions. This book provides theoretical knowledge and indicates the practical skills that practitioners require for work with young people who misuse substances. It is highly applicable to medical practitioners, psychologists, pharmacists, social workers, police

officers, probation officers, educationalists and related social and healthcare professionals.

An evaluation of the potential environmental effects of wind energy system development

Elsevier Small and micro combined heat and power (CHP) systems are a form of cogeneration technology suitable for domestic and community buildings, commercial establishments and industrial facilities, as well as local heat networks. One of the benefits of using cogeneration plant is a vastly improved energy efficiency: in some cases achieving up to 80-90% systems efficiency, whereas small-scale electricity production is typically at well below 40% efficiency, using the same amount of fuel. This higher efficiency affords users greater energy security and increased long-term sustainability of energy resources, while lower overall emissions levels also contribute to an improved environmental performance. Small and micro combined heat and power (CHP) systems provides a systematic and comprehensive review of the technological and practical developments of small and micro CHP systems. Part one opens with reviews of small and micro CHP systems and their techno-economic and performance assessment, as well as their integration into distributed energy systems and their increasing utilisation of biomass fuels. Part two focuses on the development of different types of CHP technology, including internal combustion and reciprocating engines, gas turbines and microturbines, Stirling engines, organic Rankine cycle process and fuel cell systems. Heat-activated cooling (i.e. trigeneration) technologies and energy storage systems, of importance to the regional/seasonal

viability of this technology round out this section. Finally, part three covers the range of applications of small and micro CHP systems, from residential buildings and district heating, to commercial buildings and industrial applications, as well as reviewing the market deployment of this important technology. With its distinguished editor and international team of expert contributors, *Small and micro combined heat and power (CHP) systems* is an essential reference work for anyone involved or interested in the design, development, installation and optimisation of small and micro CHP systems. Reviews small- and micro-CHP systems and their techno-economic and performance assessment Explores integration into distributed energy systems and their increasing utilisation of biomass fuels Focuses on the development of different types of CHP technology, including internal combustion and reciprocating engines

How Cool Are Penguins is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

Shipping World & Shipbuilder Xlibris Corporation

Thrilling, heartbreaking, and, at times, absurdly funny, *The Last Resort* is a remarkable true story about one family in a country under siege and a testament to the love, perseverance, and resilience of the human spirit. Born and raised in Zimbabwe, Douglas Rogers is the son of white farmers living through

that country's long and tense transition from postcolonial rule. He escaped the dull future mapped out for him by his parents for one of adventure and excitement in Europe and the United States. But when Zimbabwe's president Robert Mugabe launched his violent program to reclaim white-owned land and Rogers's parents were caught in the cross fire, everything changed. Lyn and Ros, the owners of Drifters—a famous game farm and backpacker lodge in the eastern mountains that was one of the most popular budget resorts in the country—found their home and resort under siege, their friends and neighbors expelled, and their lives in danger. But instead of leaving, as their son pleads with them to do, they haul out a shotgun and decide to stay. On returning to the country of his birth, Rogers finds his once orderly and progressive home transformed into something resembling a Marx Brothers romp crossed with *Heart of Darkness*: pot has supplanted maize in the fields; hookers have replaced college kids as guests; and soldiers, spies, and teenage diamond dealers guzzle beer at the bar. And yet, in spite of it all, Rogers's parents—with the help of friends, farmworkers, lodge guests, and residents—among them black political dissidents and white refugee farmers—continue to hold on. But can they survive to the end? In the midst of a nation stuck between its stubborn past and an impatient future, Rogers soon begins to see his parents in a new light: unbowed, with passions and purpose renewed, even heroic. And, in the process, he learns that the "big story" he had relentlessly pursued his entire adult life as a roving journalist and travel writer was actually happening in his own backyard. Evoking elements of *The Tender Bar* and *Absurdistan*, *The Last*

Resort is an inspiring, coming-of-age tale about home, love, hope, responsibility, and redemption. An edgy, roller-coaster adventure, it is also a deeply moving story about how to survive a corrupt Third World dictatorship with a little innovation, humor, bribery, and brothel management.

Bosch Technical Instruction Elsevier
Our Aurelia journal design is fit for a king. Its inspiration dates back to Paris in the mid-18th century and the original binding housed copies of King Louis XV's procedures for Holy Week. This book design is a marvellous riot of gold-tooled rococo elements, featuring birds, flowers and leaves.

Handbook of Fuel Cells Univerlag tuberlin
Shaun MacGregor is a complex man who struggles with alcoholism and relationships with women. He becomes involved in a battle for the control of Earth. Groomed by his mentor, John Running Bull, Shaun assists the alien Arcturians in saving humanity from the evil Annunaki. With his psychic abilities, Shaun mediates the transformation of evil humans controlled by the Annunaki, changing monsters into harmless clones by presenting them to the Arcturians for adjustments to their souls. Shaun's stepfather, Mike "Mad Dog" MacGregor, who appears as a human, is the supreme leader of the Annunaki. A retired Air Force colonial, Mad Dog plots to wipe out humanity, so that his people may colonize Earth. The colonel has long viewed Shaun as his nemesis because Shaun is a Nephilim--half human and half Arcturian. He soon threatens Shaun's existence. With the help of John Running Bull and the ex-Annunaki cyborg Bart, Shaun, and his new love interest Vicki kayak sixty miles to the point deep in the Red River Gorge area in Eastern Kentucky where they are extracted to

safety. Along the way down the river, the group experiences many dangers, including learning of the Annunaki's plan to wipe out humanity by transforming the Earth's atmosphere so that it is unable to support human life by replacing oxygen with methane gas and carbon dioxide, perfect for the Annunaki. Human activities such as hydraulic fracturing and fossil fuel consumption have long been wrecking the Earth, but the process is taking too long. Nubira, home planet of the Annunaki, is rapidly being destroyed as their sun turns into a supernova. In addition to speeding up the destruction of the planet, Mad Dog MacGregor urges his cohorts to release a virus via their Annunaki Manchurian candidate in Wuhan, China, thus expediting the complete demise of the human species. Extraction is complete when Shaun and Vicki escape by jumping off Seventy Six Falls near Lake Cumberland in Kentucky. There the pair are forced into a wormhole that deposits them into the decade of the 1950s. Such time travel is the Arcturians' version of a cosmic witness protection plan. When Shaun and Vicki arrive in the 50s, their identities are altered, but not their souls. Shaun becomes a famous writer and uses his influence for good. Finally, Shaun makes it back to the year 2020, and is faced with horrors that threaten his sanity, and threatens his ability to protect humanity from the evils of the Annunaki. Will Shaun survive long enough to save the planet, or will he become just another instrument in the Annunaki conquest of earth.

Five great poets of the T'ang dynasty (eighth and ninth centuries A.D.) are represented in this collection: Wang Wei, Li Po, Tu Fu, Li Ho, and Li Shang-Yin.

Each poet is introduced by the translator and represented by a selection that spans the poet's development and career. These constitute some of the greatest lyric poems ever written.

Essential Muir Field Translation Series

The Science Focus Second Edition is the complete science package for the teaching of the New South Wales Stage 4 and 5 Science Syllabus. The Science Focus Second Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components.

Fundamentals of Diesel Engines Andrew Goodman

Vogue has always been on the cutting edge of popular culture, and Vogue x Music shows us why. Whether they're contemporary stars or classic idols, whether they made digital albums or vinyl records, the world's most popular musicians have always graced the pages of Vogue. In this book you'll find unforgettable portraits of Madonna beside David Bowie, Kendrick Lamar, and Patti Smith; St. Vincent alongside Debbie Harry, and much more. Spanning the magazine's 126 years, this breathtaking book is filled with the work of acclaimed photographers like Richard Avedon and Annie Leibovitz as well as daring, music-inspired fashion portfolios from Irving Penn and Steven Klein. Excerpts from essential interviews with rock stars, blues singers, rappers, and others are included on nearly every page, capturing exactly what makes each musician so indelible. Vogue x Music is a testament to star power, and proves that some looks are as timeless as your favorite albums.

Diesel & Gas Turbine Catalog Office the Kuf Publishing, Incorporated Ron DiPippo, Professor Emeritus at the

University of Massachusetts Dartmouth, is a world-regarded geothermal expert. This single resource covers all aspects of the utilization of geothermal energy for power generation from fundamental scientific and engineering principles. The thermodynamic basis for the design of geothermal power plants is at the heart of the book and readers are clearly guided on the process of designing and analysing the key types of geothermal energy conversion systems. Its practical emphasis is enhanced by the use of case studies from real plants that increase the reader's understanding of geothermal energy conversion and provide a unique compilation of hard-to-obtain data and experience. An important new chapter covers Environmental Impact and Abatement Technologies, including gaseous and solid emissions; water, noise and thermal pollutions; land usage; disturbance of natural hydrothermal manifestations, habitats and vegetation; minimisation of CO2 emissions and environmental impact assessment. The book is illustrated with over 240 photographs and drawings. Nine chapters include practice problems, with solutions, which enable the book to be used as a course text. Also includes a definitive worldwide compilation of every geothermal power plant that has operated, unit by unit, plus a concise primer on the applicable thermodynamics. * Engineering principles are at the heart of the book, with complete coverage of the thermodynamic basis for the design of geothermal power systems * Practical applications are backed up by an extensive selection of case studies that show how geothermal energy conversion systems have been designed, applied and exploited in practice * World renowned geothermal expert DiPippo

has including a new chapter on Environmental Impact and Abatement Technology in this new edition

Lloyd's Ship Manager California Legacy Book

Celebrating the sesquicentennial anniversary of the completion of the first transcontinental railroad in the United States, *After Promontory: One Hundred and Fifty Years of Transcontinental Railroading* profiles the history and heritage of this historic event. Starting with the original Union Pacific—Central Pacific lines that met at Promontory Summit, Utah, in 1869, the book expands the narrative by considering all of the transcontinental routes in the United States and examining their impact on building this great nation. Exquisitely illustrated with full color photographs, *After Promontory* divides the western United States into three regions—central, southern, and northern—and offers a deep look at the transcontinental routes of each one. Renowned railroad historians Maury Klein, Keith Bryant, and Don Hofsommer offer their perspectives on these regions along with contributors H. Roger Grant and Rob Krebs.

Tiberius Found HarperCollins UK

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency

grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of *Korean: A Comprehensive Grammar* makes it an essential reference source on the Korean language.

Grid-Scale Energy Storage Systems and

Applications provides a timely

introduction to state-of-the-art

technologies and important

demonstration projects in this rapidly

developing field. Written with a view to

real-world applications, the authors

describe storage technologies and then

cover operation and control, system

integration and battery management,

and other topics important in the design

of these storage systems. The rapidly-

developing area of electrochemical

energy storage technology and its

implementation in the power grid is

covered in particular detail. Examples of

Chinese pilot projects in new energy

grids and micro grids are also included.

Drawing on significant Chinese results in

this area, but also including data from

abroad, this will be a valuable reference

on the development of grid-scale energy

storage for engineers and scientists in

power and energy transmission and

researchers in academia. Addresses not

only the available energy storage

technologies, but also topics significant

for storage system designers, such as

technology management, operation and

control, system integration and

economic assessment Draws on the

wealth of Chinese research into energy

storage and describes important Chinese

energy storage demonstration projects

Provides practical examples of the

application of energy storage technologies that can be used by engineers as references when designing new systems

Small and Micro Combined Heat and Power (CHP) Systems CRC Press

An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to love, or grieving over the loss of a friend. Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological aspects of canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives. This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

The Work Boat John Wiley & Sons

With over 80 per cent of global trade by volume and more than 70 per cent of its value being carried on board ships and handled by seaports worldwide, the importance of maritime transport for trade and development cannot be overemphasized. The 2017 Review of Maritime Transport presents and discusses key developments in the world economy and international trade and related impacts on shipping demand and

supply, freight and charter markets, as well as seaports and the regulatory and legal framework. In addition to relevant developments in 2016 and the first half of 2017, this year's edition of the Review also features a special chapter on maritime transport connectivity, reflecting the prominence of physical and electronic connectivity as a priority area in the trade and development policy agenda.

Production and marke Random House
 "Like Muir himself, *Essential Muir* packs an astounding range of experience into a lithe frame: ecstatic yet scientific descriptions of Yosemite; the heartrending tale of that "wee, hairy, sleekit beastie," Stickeen; reflections on the society of Eskimos; Muir's touching tribute, after a lifetime of wonder, to the mighty baobab trees of Africa; and more. Fred D. White's selection from Muir's writings, and his illuminating commentary, reveal the coherence and drama of a remarkable life: new readers will understand why Muir has become an American icon, and readers who are familiar with his work will be delighted with this fresh look. Muir's fierce love of all of nature, from squirrels to glaciers (but perhaps not sheep), continues to inspire us nearly a century after his death."--Book jacket.

Forbes Indiana University Press

In leadership there are times when we must simply break the mould and smash the comfortable paradigms that keep us locked in old thinking, delivering outdated results. Rainer Petek demonstrates not only how to do this, but why it is imperative to throw off our heavy rucksacks, let go of that last handhold in the form of management habits and grow through our greatest challenges. Come on a journey of change, learn new wisdom through

hundreds of Rainer's personal climbing experiences as a catalyst for your own change and breakthrough leadership. Transformation takes courage. It can be terrifying at times, but inspirational when positive change happens, in any organisation, in even the most challenging of circumstances. This book is like no other. It's your opportunity to experience transformational leadership growth through stunning images which support the many powerful metaphors and lessons. An inspiring way to help all leaders and their teams to facilitate their own way of looking at themselves and their organisations.
