*Clinical Urography* Elsevier

Non-communicable diseases (NCDs) are the leading cause of death worldwide, contributing to over 73% of all deaths annually. Each day NCDs cause more than 100,000 deaths, 80% of which occur in low- and middle-income countries. NCDs, however, are largely preventable, and a great deal of technical knowledge exists about how to prevent and manage them. Why, then, have we, as a global community, not been more successful at reducing this NCD burden? Does a universal problem not have a universal solution? Created by an international consortium of experts, this informative and accessible book provides practical guidelines, key learning points, and dynamic, real-world case studies to aid NCD program managers, policy officers and decision-makers in low- and middle-income countries, so that they can assess interventions for the prevention and control of NCDs. The book was commissioned by the Prince Mahidol Award Conference (PMAC), an annual international conference centred on policy of global significance related to public health. Non-Communicable Disease Prevention: Best Buys, Wasted Buys and Contestable Buys emphasises the importance of context in NCD control and prevention, arguing that the success of an intervention lies in an ability to respond to local needs and environments. The book comprises ten chapters, which collectively explore the reasons behind, and strategies for, preventing and managing the NCD burden. It spans key themes such as political economy, the transferability of economic evidence, the role of cross-sectoral policies, the importance of deliberative processes, and health technology assessment. This book is written for the benefit of the global health community, and is primarily targeted at those individuals who are involved in NCD programs. This book will also be of interest to NCD champions, policy advocates, and educators spearheading the movement for increased visibility of NCDs. *2021 IEEE International Memory Workshop (IMW)* Academic Press This book is a collection of the accepted papers of the 1st International Online Medical Conference (IOMC 2008). It includes the latest findings and research works of medical doctors, medical university professors, and activists from around the world, which covers different themes in the field of medicine. This book is suggested to all medical doctors, students, academics, professors, and researchers. The unique feature of this book is that all the articles are related to the FIRST-EVER completely held ONLINE Medical conference (IOMC 2008) which was successfully held on May 14 & 15, 2008.

*The Wayfarer Redemption* Cambridge University Press

Mark and Christine worked for Smyth Exports; Christine phoned

Mark telling him that almost all of their work mates are to share in five million dollars. But it wasn't to happen all that easily, Christine was asked by the owner of Smyth Exports to get to the bottom of all this and fix the problems. Christine asked Mark to help, and both look for a way the fifty-three staff members can claim their prize.

*Trends in Biomedical Research* Adams Media

Offers advice for coping with disruptions in everyday life during emergency situations, covering emergency preparedness, first aid, renewable energy, alternative healing, and low-tech methods for securing basic provisions.

Discover the answer to the mysteries of these debilitating illnesses Explaining "Unexplained Illnesses" provides long-sought explanations for the properties of chronic fatigue syndrome (CFS), multiple chemical sensitivity (MCS), fibromyalgia, and posttraumatic stress disorder. This groundbreaking book examines common symptoms and signs; short-term stressors such as infection, chemical exposure, physical trauma, and severe psychological stress; why people are often diagnosed as having more than one of these illnesses, and approaches for treating the cause of each disease, rather than the symptoms. The book presents a detailed and well-supported mechanism (the NO/ONOO- cycle) that provides consistent explanations for many of the puzzling elements of these diseases. At least a dozen scientists have proposed that chronic fatigue syndrome, multiple chemical sensitivity, and fibromyalgia must share a common mechanism; others have suggested posttraumatic stress disorder may belong to this group as well. This unique book provides explanations for their previously unexplained properties with more than 1,500 references to scientific literature, creating a whole new approach to therapy and treatment of these illnesses. Explaining "Unexplained Illnesses" provides answers to these questions: how do short-term stressors initiate chronic illness? how does the biochemistry of the NO/ONOO- cycle produce chronic illness? how can the diverse symptoms and signs of these illnesses be generated as a consequence of their common biochemistry? why is there so much variation in symptoms from one sufferer to another? what are the principles underlying the NO/ONOO- cycle mechanism? how does the NO/ONOO- cycle provide explanations for a dozen previously unexplained properties of these illnesses? how might 14 additional illnesses/diseases also be caused by the NO/ONOO- cycle etiology? and many more Explaining "Unexplained Illnesses" is a must-read for physicians and scientists, and for anyone who suffers from-or knows someone who suffers from—these previously puzzling illnesses.

Vertigo is the feeling that everything around is moving or spinning and is usually caused by a problem with the balance mechanisms in the inner ear. It can also be caused by problems in certain parts of the brain or vision disorders. This book is a comprehensive guide to the diagnosis and management of vertigo. Beginning with basic anatomy, physiology and epidemiology of dizziness, the following chapters examine different causes of vertigo, their diagnosis and treatment. Edited by recognised Italian otolaryngologists, this textbook has been written by authors (many from the US) from multidisciplinary backgrounds including otolaryngology, neurology, anatomy, physiology, epidemiology and surgery. This invaluable guide includes extensive references and numerous clinical photographs, illustrations, tables and figures. Key points Comprehensive guide to diagnosis and treatment of vertigo Covers anatomy and physiology and numerous causes Multi-disciplinary author and editor team from Europe and the USA Includes 130 images and illustrations

Free your mind with these enlightening mandala designs! For centuries, mandalas have provided an elevated level of guidance to those seeking peace, inspiration, and a deeper connection to the world around them. Now, with *The Mandala Coloring Book*, you can use these sacred circles to help you find tranquility and balance in your life. Featuring 100 customizable mandala drawings, this book encourages you to use your imagination to create vibrant patterns that reveal your hidden creative potential and bring you closer to your true self. Each intricate design will draw your eye inward, shifting your focus toward your center and allowing you to fully relax your mind as you express yourself through these beautifully complex illustrations. Complete with expert instruction and helpful design tips, *The Mandala Coloring Book* will help you find your inner calm and creativity every day.

**The Drunkard's Walk** John Wiley & Sons

We already observe the positive effects of AI in almost every field, and foresee its potential to help address our sustainable development goals and the urgent challenges for the preservation of the environment. We also perceive that the risks related to the safety, security, confidentiality, and fairness of AI systems, the threats to free will of possibly manipulative systems, as well as the impact of AI on the economy, employment, human rights, equality, diversity, inclusion, and social cohesion need to be better assessed. The development and use of AI must be guided by principles of social cohesion, environmental sustainability, resource sharing, and inclusion. It has to integrate human rights, and social, cultural, and ethical values of democracy. It requires continued education and training as well as continual assessment of its effects through social deliberation. The "Reflections on AI for

Humanity" proposed in this book develop the following issues and sketch approaches for addressing them: How can we ensure the security requirements of critical applications and the safety and confidentiality of data communication and processing? What techniques and regulations for the validation, certification, and audit of AI tools are needed to develop confidence in AI? How can we identify and overcome biases in algorithms? How do we design systems that respect essential human values, ensuring moral equality and inclusion? What kinds of governance mechanisms are needed for personal data, metadata, and aggregated data at various levels? What are the effects of AI and automation on the transformation and social division of labor? What are the impacts on economic structures? What proactive and accommodation measures will be required? How will people benefit from decision support systems and personal digital assistants without the risk of manipulation? How do we design transparent and intelligible procedures and ensure that their functions reflect our values and criteria? How can we anticipate failure and restore human control over an AI system when it operates outside its intended scope? How can we devote a substantial part of our research and development resources to the major challenges of our time such as climate, environment, health, and education?

**Mo and His Friends** ProteinsBiochemistry and Biotechnology This timely edited collection offers a multidisciplinary perspective on social commerce, a phenomenon that has gained increasing interest over the last 8 years. Investigating how social media can be used to generate value for brands beyond customer relationship purposes, the skilled authors explore how social media users co-create value for businesses, influence other consumers and generate electronic word-of-mouth (eWOM). Providing insights from practitioners and academics, this book goes further than simply exploring e-commerce and social media, and addresses the real relevance of social commerce in today's business landscape. With a selection of contemporary case studies and a Foreword written by Inthefrow's creator, Victoria Magrath, Social Commerce will be an engaging read for those studying consumer behaviour, online marketing, and e-commerce.

Buku ini diperuntukkan untuk anak-anak dan dapat juga dipakai oleh remaja serta dewasa, bahkan orang lanjut usia. Adapun tujuan penulis membuat buku ini adalah sebagai latihan keterampilan dan melatih kemampuan abstraksi, bentuk, warna, serta membiasakan diri akrab mengenal bagian khasanah Islami. Selamat mewarnai hidup dan diri kita sendiri.

**Nutrient Requirements of Dairy Cattle** Springer Science & Business Media

Collection of selected, peer reviewed papers from the 2013 International Conference on Energy Engineering and Environmental Engineering (ICEEEE 2013), January 18-19, 2013, Hangzhou, China. Volume is indexed by Thomson Reuters CPCI-S (WoS). The papers in this collection disclose the latest developments in the field of energy engineering and environmental engineering. In particular, the papers cover topics of energy engineering, environmental engineering, advanced materials science and other correlation technique.

**Peer Review in Health Sciences** Good Press

This book addresses hot issues in the research and management of difficult-to-treat medical disorders that are commonly encountered, but for which the underlying mechanisms are often unknown. These include the adverse effects of hemodialysis and its biocompatibility in chronic kidney insufficiency, particularly related to malnutrition and inflammation, or the vulnerability of cancer patients to bacterial meningitis, the infection that remains underdiagnosed due to limited expression of symptoms. The book also covers other key topics, such as the psychological care of lung cancer patients; difficulties in the diagnosis of diffuse axonal injury in traumatic brain injury – a disorder with a poor prognosis

and high mortality rate; and the virological aspects of seasonal influenza epidemic outbreaks – a perennial modern scourge. Further, it addresses recent developments in targeted drug delivery from titanium implants and a novel integrated thermal approach to rehabilitation of neurodegeneration-related disabilities. Featuring the latest interdisciplinary trends in biomedicine, this book connects research, theory and practice to help alleviate suffering caused by a variety of diseases. It is a resource for medical professionals, including academics, practitioners and all allied healthcare workers.

**Quantifying Health Equity Impacts and Trade-Offs** BMJ Books A millennia-old prophecy was given when the Forbidden Ones were driven from Achar. And now, the Acharites witness its manifestation: Achar is under attack by an evil lord from the North, Gorgreal-his ice demons strike from the sky and kill hundreds of brave warriors in the blink of an eye. All Acharites believe the end is near. One young woman, Faraday, betrothed of Duke Borneheld, learns that all she has been told about her people's history is untrue. While fleeing to safety from the dangerous land, Faraday, rides with Axis, legendary leader of the Axe-Wielders-and hated half-brother of Borneheld-and a man Faraday secretly loves although it would be death to admit it. She embarks on a journey, which will change her life forever, in search of the true nature of her people. This grand and heroic story tells the tale of one woman's plight to learn the truth of her people and change their hearts and their minds forever. She fights against oppressive forces to share this reality and will not desist until everyone knows. . . . The truth of the Star Gate At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**How to Overcome Pride** Open Book Publishers

Health inequalities blight lives, generate enormous costs, and exist everywhere. This book is the definitive all-in-one guide for anyone who wishes to learn about, commission, and use distributional cost-effectiveness analysis to promote both equity and efficiency in health and healthcare.

**Social Commerce** John Wiley & Sons

Differently Morphous is the latest and greatest tale to emerge from the mind of writer Yahtzee Croshaw (Mogworld, Jam, Will Save the Galaxy for Food). A magical serial killer is on the loose, and gelatinous, otherworldly creatures are infesting the English countryside. Which is making life for the Ministry of Occultism difficult, because magic is supposed to be their best kept secret. After centuries in the shadows, the Ministry is forced to unmask, exposing the country's magical history--and magical citizens--to a brave new world of social media, government scrutiny, and public relations. On the trail of the killer are the Ministry's top agents: a junior operative with a photographic memory (and not much else), a couple of overgrown schoolboys with godlike powers, and a demonstrably insane magician. But as they struggle for results, their superiors at HQ must face the greatest threat the Ministry has ever known: the forces of political correctness. . . .

Break free of your comfort zone, sharpen your perception, and find happiness in play. Paint Mojo is not about replicating particular techniques; it is about play and spontaneity. Tracy Verdugo gives encouragement to overcome fear of doing something wrong in painting. There are no mistakes--only opportunities to grow. Incorporating various media (including pastels, acrylic paints, ink, collage and more), this book is filled with exercises, self exploration and practical techniques. They include creation of a personal symbols library, using a grid to break down composition, and drawing on life experiences as prompts. In addition to Tracy's art, 15 talented contributors--Erin Faith Allen, Seth Apter, Orly Avineri, Lisa Sonara Bearn, Jessica Brogan, Juliette Crane, Kecia Deveney, Louise Gale, Jess Greene, e'Layne Koenigsberg, Laurie Mika, Peter Perez, Jesse Reno, Mary Beth Shaw, Roxanne Evans Stout, and Judy Wise--share lessons,

exercises, tips and inspiration.

**How to Fold It** Trans Tech Publications Ltd

Revised 04/2011 DIABETES EPIDEMIC and YOU is not a cliché! It is a mandate for the awakening of the "silent" millions worldwide with "normal" fasting blood sugars and undiagnosed diabetes. If you have a "normal" fasting blood sugar, YOU may be one of the undiagnosed millions. YES, I do mean YOU. Since Hippocrates' time, earliest diagnosis provided the greatest opportunity for treatment and cure. This book highlights the earliest identification of type 2 diabetes by utilizing the insulin assay with the oral glucose tolerance. My cumulative experience of 14,384 oral glucose tolerances with insulin assays established the earliest diagnosis of prediabetes and diabetes when the blood sugars were normal. Prediabetes is type 2 diabetes. The tolerances were separated according to age groups, from 3D13 years to 81D90+ years. Each group was further divided into normal glucose tolerances, impaired glucose tolerances, and diabetes mellitus glucose tolerances. YOU, upon testing by oral glucose tolerance, will be in one of these categories. This resource of oral glucose tolerance with insulin assay is unequaled in world medical literature. The importance of early diagnosis is that the clinical pathology of diabetes – mainly heart disease, high blood pressure, stroke, cataracts, erectile dysfunction, and other metabolic disorders – occurs not only in those with advanced diabetes, but also in those with "normal" blood sugars. YES, this could happen to YOU! When early diagnosis is coupled with specific therapy, the DIABETES EPIDEMIC will be arrested and then reversed. Early diagnosis is the goal of this book – beginning with YOU.

**Disease Paradigm for Chronic Fatigue Syndrome, Multiple Chemical Sensitivity, Fibromyalgia, Post-Traumatic Stress Disorder, Gulf War Syndrome and Others** CRC Press

The collection includes selected, peer reviewed papers from the 2012 International Conference on Mechatronics and Computational Mechanics (ICMCM 2012), 20-21st December, 2012, Dubai, UAE. Volume is indexed by Thomson Reuters CPCI-S (WoS). The papers are grouped as follows: Chapter 1: Mechatronics and Control; Chapter 2: Applied Mechanics and Mechanical Engineering; Chapter 3: Applied Materials Engineering; Chapter 4: Organization of Manufacture, Engineering Management and Information Technologies.

**Dethroning the King** Trans Tech Publications Ltd

Groundbreaking, comprehensive, and developed by a panel of leading international experts in the field, Textbook of Tinnitus provides a multidisciplinary overview of the diagnosis and management of this widespread and troubling disorder. Importantly, the book emphasizes that tinnitus is not one disease but a group of rather diverse disorders with different pathophysiology, different causes and, consequently, different treatments. This comprehensive title is written for clinicians and researchers by clinicians and researchers who are active in the field. It is logically organized in six sections and will be of interest to otolaryngologists, neurologists, psychiatrists, neurosurgeons, primary care clinicians, audiologists and psychologists. Textbook of Tinnitus describes both the theoretical background of the different forms of tinnitus and it provides detailed knowledge of the state-of-the-art of its treatment. Because of its organization and its extensive subject index, Textbook of Tinnitus can also serve as a reference for clinicians who do not treat tinnitus patients routinely.

**Winning the Lottery** Springer Nature

The road of humility that Jesus Christ walked is the only road that leads to God. This book relates the stories of people who, in past history, refused to humble themselves, and it tells what end these people met. It also tells how God rewarded those who, given the chance to repent, took advantage of their day of Grace and Mercy and humbled themselves. Lessons from history should help us to decide the course of our lives and encourage us to follow Jesus Christ's example of true humility that will overcome all our worthless pride.
