The two-volume set LNAI 10632 and 10633 constitutes the proceedings of the 16th Mexican International Conference on Artificial Intelligence, MICAI 2017, held in Ensenada, Mexico, in October 2017. The total of 60 papers presented in these two volumes was carefully reviewed and selected from 203 submissions. The contributions were organized in the following topical sections: Part I: neural networks; evolutionary algorithms and optimization; hybrid intelligent systems and fuzzy logic; and machine learning and data mining. Part II: natural language processing and social networks; intelligent tutoring systems and educational applications; and image processing and pattern recognition.

MacArthur Communicative Development Inventories (User's Guide And Technical Manual) Frontiers Media SA

El objetivo que se plantea en este libro es la recopilación de las cuestiones que son objeto de debate y que necesitan más investigación en el ámbito del desarrollo emocional en la infancia. Problemas relevantes en desarrollo emocional que no suelen aparecer expuestos en detalle porque los artículos científicos no permiten este tipo de reflexión. Así, en cada capítulo de esta obra se plantea un problema y se expone la evidencia empírica relevante para mostrar cómo se ha intentado resolver, y concluye con lo que se ha conseguido y lo que queda por hacer.

MacArthur John Benjamins Publishing

This Handbook presents current research on children and youth in ethnic minority families. It reflects the development currently taking place in the field of social sciences research to highlight the positive adaptation of minority children and youth. It offers a succinct synthesis of where the field is and where it needs to go.

It brings together an international group of leading researchers, and, in view of globalization and increased migration and immigration, it addresses what aspects of children and youth growing in ethnic minority families are universal across contexts and what aspects are more context-specific. The Handbook examines the individual, family, peers, and neighborhood/policy factors that protect children and promote positive adaptation. It examines the factors that support children's social integration, psychosocial adaptation, and external functioning. Finally, it looks at the mechanisms that explain why social adaptation occurs. *Encyclopedia of Language Development* John Benjamins Publishing

El proceso de evaluación y de diagnóstico representa un reto para cualquier profesional de la logopedia. De hecho, constituye toda una habilidad en sí misma. Para desarrollarla, es necesario poseer una formación de base de calidad que nos permita conocer los diferentes trastornos que pueda presentar la población a la que evaluaremos, la heterogeneidad de los componentes de la evaluación y los diferentes métodos con los que implementarla. El proceso de diagnóstico, como todo, se perfecciona con la experiencia y es lo que nos ayudará a desarrollar nuestro juicio clínico, la herramienta clave que un buen logopeda debe poseer. Con este manual, esperamos transmitir la idea de evaluación holística, en la que valoramos a nuestros pacientes desde una perspectiva global, aunando diferentes técnicas de exploración y considerando tanto las fortalezas como debilidades del niño con el que trabajamos. Esperamos, por lo tanto, que sea de gran utilidad a los profesionales de nuestro campo y que se convierta en una fuente de información de referencia para todos ellos.

Generative Linguistics and Acquisition Routledge

How do children acquire language? How does real life language acquisition differ from results found in controlled environments? And how is modern life challenging established theories? Going far beyond laboratory experiments, the International Handbook of Language Acquisition examines a wide range of topics

surrounding language development to shed light on how children acquire language in the real world. The foremost experts in the field cover a variety of issues, from the underlying cognitive processes and role of language input to development of key language dimensions as well as both typical and atypical language development. Horst and Torkildsen balance a theoretical foundation with data acquired from applied settings to offer a truly comprehensive reference book with an international outlook. The International Handbook of Language Acquisition is essential reading for graduate students and researchers in language acquisition across developmental psychology, developmental neuropsychology, linguistics, early childhood education, and communication disorders.

A Portrait of the Young in the New Multilingual Spain Brookes Publishing Company

SAVE when you order this item as part of a set. This easy-to-read manual provides professionals with a thorough introduction to the Inventarios, the Spanish adaptation of the MacArthur Communicative Development Inventories (CDIs), standardized, parent-completed report forms designed by top language researchers to assess language and communication skills in young children ages 8-30 months. Along with an extensive overview of the two Inventario forms--Primeras Palabras y Gestos and Palabras y Enunciados--the manual includes detailed guidelines on using the forms, including information on administration, scoring, interpreting a child's score, and using the norms with older children, second-language learners, and children from families of low socioeconomic status clinical applications, such as screening for language delay, creating intervention strategies, and evaluating treatment effects research applications, such as matching children on language skills and examining the influence of other variables on language development technical data, including complete information on the development of the Inventarios, the norming data supporting them (including percentile tables and figures), and validity and

reliability of the forms With this comprehensive guide, speech-language pathologists, child development specialists, and other professionals who work with young children and their families will use the Inventarios with confidence. Learn more about the CDIs and the Inventarios.

Listening, Speaking, Reading, Writing, and Communicating John Wiley & Sons

Children acquiring two languages, either simultaneously or sequentially, have more variation in their linguistic input than their monolingual peers. Understanding the nature and consequences of this variability has been the focus of much recent research on childhood bilingualism. This volume constitutes the first collection of research solely dedicated to the topic of input in childhood bilingualism. Chapters represent a range of theoretical and methodological approaches to the study of childhood bilingualism, covering a variety of language combinations and sociocultural contexts in Europe, Israel, North and South America. As a reflection of the field's current understanding of the intricate relationship between experience and development in children growing up with two or more languages, this volume will be of interest to scholars and practitioners working with bi- and multilingual learners in various sociolinguistic and educational contexts.

The Listening Bilingual Brookes Publishing Company
Language Disorders from Infancy Through Adolescence, 4th Edition is the go-to text for all the information you need to properly assess childhood language disorders and provide appropriate treatment. This core resource spans the entire developmental period through adolescence, and uses a descriptive-developmental approach to present basic concepts and vocabulary, an overview of key issues and controversies, the scope of communicative difficulties that make up child language disorders, and information on how language pathologists approach the assessment and intervention processes. This new edition also features significant updates in research, trends, instruction best practices, and social skills assessment. Comprehensive text covers the entire developmental period through adolescence. Clinical application focus featuring case studies, clinical vignettes, and suggested projects helps you apply concepts to professional practice. Straightforward, conversational writing style makes this book easy to read and understand. More

than 230 tables and boxes summarize important information such as dialogue examples, sample assessment plans, assessment and intervention principles, activities, and sample transcripts.

UNIQUE! Practice exercises with sample transcripts allow you to apply different methods of analysis. UNIQUE! Helpful study guides at the end of each chapter help you review and apply what you have learned. Versatile text is perfect for a variety of language disorder courses, and serves as a great reference tool for professional practitioners. Highly regarded lead author Rhea Paul lends her expertise in diagnosing and managing pediatric language disorders. Communication development milestones are printed on the inside front cover for quick access. Chapter objectives summarize what you can expect to learn in each chapter. Updated content features the latest research, theories, trends and techniques in the field. Information on autism incorporated throughout the text Best practices in preliteracy and literacy instruction The role of the speech-language pathologist on school literacy teams and in response to intervention New reference sources Student/Professional Resources on Evolve include an image bank, video clips, and references linked to PubMed.

Evaluación y diagnóstico en logopedia. Vol II Plural Publishing
The articles of this collection cover a wide range of formal syntactic and semantic phenomena. The focus is on a broad array of developmental syntactic phenomena, including topics in Argument Structure and Clause-Internal Syntax, the DP Domain and Learning Theory. In total, the contents of the volume illustrate ways in which theoretically informed linguistic research can explain language behavior in terms that are motivated on independent grounds and point towards new research opportunities to test theoretical claims about the adult model of grammar. The contributions of this volume are inspired by or related to the scholarship of Nina Hyams, whose dedication to rigorous, theoretically-informed research on language is well represented here.

MacArthur Inventario Del Desarrollo de Habilidades Comunicativas (Inventario) Multilingual Matters
Prominent researchers from the US, Mexico, Chile, Colombia and Spain contribute experimental reports on language development of children who are acquiring Spanish. The chapters cover a wide range of dimensions in acquisition: comprehension and

production; monolingualism and bilingualism; typical development, children who are at risk and children with language disorders, phonology, semantics, and morphosyntax. These studies will inform linguistic theory development in clinical linguistics as well as offer insights on how language works in relation to cognitive functions that are associated with when children understand or use language. The unique data from child language offer perspectives that cannot be drawn from adult language. The first part is dedicated to the acquisition of Spanish as a first or second language by typically-developing children, the second part offers studies on children who are at risk of language delays, and the third part focuses on children with specific language impairment, disorders and syndromes.

Handbook on Positive Development of Minority Children and Youth Springer

Fundamentals of AAC: A Case-Based Approach to Enhancing Communication is a course-friendly textbook designed to walk readers through the theoretical and clinical underpinnings of assessment, intervention, and consultation for individuals with complex communication needs across the lifespan. Augmentative and alternative communication (AAC) encompasses a variety of communication methods and is used by those with a wide range of speech and language impairments. With a consistent framework and descriptive case studies, as well as input from various stakeholders, readers can gain a comprehensive understanding of the needs of persons who use AAC and how to provide them with ethically and culturally considerate support. Unlike other texts on this topic, this book empowers the reader to visualize AAC in action. Each chapter offers evidence-based information about the topic along with a case study. The case studies combined with short essays from various stakeholders illustrate the variety of ways in which AAC can enhance an individual's connection with their communication partners and community, and the role of the speech-language pathologist as integral to this process. Intended to easily translate into a 6-, 8-, or 13-week semester course, this textbook is divided into seven distinct sections: Section I provides an overview of AAC, no-tech, mid-tech, and high-tech AAC systems, as well as mobile technology and advancing technology. Section II discusses cultural and linguistic responsiveness and how this underlies AAC systems and services. Section III reviews AAC assessment,

intervention and implementation for toddlers, preschoolers, and school-aged individuals, along with goal-writing and data collection. Section IV covers assessment, intervention, and implementation for young adults and adults needing AAC. Section V offers the reader detailed information and rich examples of the application of AAC for persons with developmental disabilities. Section VI provides the theoretical foundation and exemplar case studies of AAC for persons with acquired disabilities. Section VII details consultation and training for various stakeholders, as well as tele-AAC services. Key Features: * Overviews with key terms set the stage for each section * 36 case studies with questions and visuals to clearly depict each case * Boxes with practical tips and expert advice

Current Research and Emerging Directions for Practice and Policy Springer

It is well known that the number of non-English speakers is on the rise in the United States. What is less well known is that the largest proportion of this population is children under the age of 5. These young English language learners (ELLs) often demonstrate achievement gaps in basic math and reading skills when they start school. How best to educate this important and growing preschool population is a pressing concern for policymakers and practitioners. The chapters in this important book provide up-to-date syntheses of the research base for young ELLs on critical topics such as demographics, development of bilingualism, cognitive and neurological benefits of bilingualism, and family relationships, as well as classroom, assessment, and teacher-preparation practices. Contributors: Linda M. Espinosa, Margaret Freedson, Claudia Galindo, Fred Genesee, Donald J. Hernandez, José E. Náñez Sr., and Flora V. Rodríguez-Brown “This is a must-have for those who are working directly or indirectly with young English language learners.” —Olivia Saracho, University of Maryland, College Park, Maryland

Inventario II: Palabras Y Enunciados Academic Press

SAVE when you order this item as part of a set. Inventario I: Primeras Palabras y Gestos, sold in packages of 25 for easy re-ordering, is one of the two standardized, parent-completed report forms that make up the the Spanish adaptation of the MacArthur Communicative Development Inventories (CDIs), which was designed by top language researchers to assess language and communication skills in young children ages 8–30 months. With

the Inventarios, professionals can tap into parents' invaluable day-to-day knowledge about their children's language and communication skills--and respond to legislation that requires parental input in child evaluations. The forms focus on current behaviors and salient emergent behaviors that parents can recognize and track. Numerous studies document the reliability and validity, clinical utility, and research potential of the CDIs and Inventarios. The CDIs were normed on approximately 1,800 children in three locations, and the Inventarios were normed on more than 2,000 children. The CDI and Inventario forms were developed separately to reflect the vocabulary and grammatical structure of each language. Inventario I: Primeras Palabras y Gestos is a "words and gestures" form for use with children ages 8–18 months. The first part of the form prompts parents to document the child's understanding of hundreds of early vocabulary items separated into semantic categories such as animal names, sound effects, and question words. Parents mark the words understood or used, and the form yields separate indexes of words understood and words produced. The second part of the form asks parents to record the communicative and symbolic gestures the child has tried or completed. This form generally takes 20–40 minutes to complete and 20–30 minutes to score by hand. Also available are the Inventario II: Palabras y Enunciados and the User's Guide and Technical Manual. These forms are part of the MacArthur-Bates Inventarios del Desarrollo de Habilidades Comunicativas (Inventarios). The Inventarios and their English version, the CDIs, are standardized, parent-completed report forms that track young children's language and communication skills. Top language researchers developed the report forms, designing them to focus on current behaviors and salient emergent behaviors that parents can recognize and track. This product is sold in a package of 25. Learn more about the CDIs and the Inventarios.

Volume 42 of the Advances in Child Development and Behavior series includes 9 chapters that highlight some of the most recent research in the area. A wide array of topics are discussed in detail, including Loneliness in Childhood, The Legacy of Early Interpersonal Experience, The Relation Between Space and Math, and Producing and Understanding Prosocial Acts in Early Childhood. Each chapter provides in-depth discussions and this volume serves as an invaluable resource for Developmental or educational psychology researchers, scholars, and students. 10 chapters that highlight some of the most recent research in the area A wide array of topics are discussed in detail

A Practical Guide SAGE Publications

This book bridges the gap in the literature on Hispanic individuals for student clinicians and professionals in Speech-Language Pathology/Speech Therapy. It links empirical and theoretical bases to evidence-based practices for child and adult Spanish users. This volume provides both students and licensed professionals in speech-language pathology much-needed multidisciplinary bases to implement clinical services with Spanish speakers. Researchers and practitioners from Speech-Language Pathology, Neurolinguistics, Neuropsychology, Education, and Clinical Psychology provide theoretical and empirical grounds to develop evidence-based clinical procedures for monolingual Spanish and bilingual Spanish-English children and adults with communication disorders.

Fundamentals of AAC Multilingual Matters

Solutions for the Assessment of Bilinguals presents innovative

solutions for the evaluation of language abilities and proficiency in multilingual speakers – and by extension, the evaluation of their cognitive and academic abilities. This volume brings together researchers working in a variety of bilingual settings to discuss critical matters central to the assessment of bilingual children and adults. The studies include typically developing bilingual children, bilingual children who may be at risk for language impairments, bilingual and multilingual children and adults found in classrooms, and second-language learners in childhood and adulthood. The contributions propose a variety of ways of assessing performance and abilities in the face of the multiple issues that complicate the best interpretation of test performance.

Communication Disorders in Spanish Speakers Ediciones Pirámide
This is a comprehensive and accessible guide to the methods researchers use to study child language, written by experienced scholars in the study of language development. Presents a comprehensive survey of laboratory and naturalistic techniques used in the study of different domains of language, age ranges,

and populations, and explains the questions addressed by each technique Presents new research methods, such as the use of functional Near Infrared Spectroscopy (fNIRS) to study the activity of the brain Expands on more traditional research methods such as collection, transcription, and coding of speech samples that have been transformed by new hardware and software
Variability and Consistency in Early Language Learning
MacArthur-Bates Inventario del Desarrollo de Habilidades Comunicativas

A vital resource on speech and language processing in bilingual adults and children The Listening Bilingual brings together in one volume the various components of spoken language processing in bilingual adults, infants and children. The book includes a review of speech perception and word recognition; syntactic, semantic, and pragmatic aspects of speech processing; the perception and comprehension of bilingual mixed speech (code-switches, borrowings and interferences); and the assessment of bilingual speech perception and comprehension in adults and children in the clinical context. The two main authors as well as selected

guest authors, Mark Antoniou, Theres Grüter, Robert J. Hartsuiker, Elizabeth D. Peña and Lisa M. Bedore, and Lu-Feng Shi, introduce the various approaches used in the study of spoken language perception and comprehension in bilingual individuals. The authors focus on experimentation that involves both well-established tasks and newer tasks, as well as techniques used in brain imaging. This important resource: Is the first of its kind to concentrate specifically on spoken language processing in bilingual adults and children. Offers a unique text that covers both fundamental and applied research in bilinguals. Covers a range of topics including speech perception, spoken word recognition, higher level processing, code-switching, and assessment. Presents information on the assessment of bilingual children's language development Written for advanced undergraduate students in linguistics, cognitive science, psychology, and speech/language pathology as well as researchers, The Listening Bilingual offers a state-of-the-art review of the recent developments and approaches in speech and language processing in bilingual people of all ages.
