The most successful fitness and weight loss stories are from those who can self-motivate and are willing to learn. These qualities are more valuable than having the world's most qualified and expensive personal trainer at your disposal. If you are looking for a home workout fitness routine that:

- Can be done from your own home
- Uses minimal fitness equipment and utilizes bodyweight training
- Is progressive for at least 6 weeks
- Is designed to effectively burn fat, tone muscle and develop cardiovascular fitness
- Won't take you more than 30 minutes

four times a week. Then this is the one for you! Hi, I'm James Atkinson (Jim to my friends and readers). I'm a qualified personal trainer/ fitness coach, competing bodybuilder and have a burning desire to help others reach their fitness goals. I have been training for over fifteen years. This training has taken me from long distance running to bodybuilding competition. It is fair to say that I have learned the secrets of weight loss and fitness from my own personal journey. I have been fat, skinny and muscle bound throughout my fitness career and I really feel fulfillment from helping and advising others when it comes to their goals. So I have designed this home workout training routine to effectively burn fat, tone muscle and develop cardiovascular fitness. In this day and age, the pace of life is fast for many, and there are probably millions of people that would say that they haven't got enough time to lose fat, tone up or work on developing their fitness. But my home workout routine is not something that will take up hours of your day, I can tell you that you won't even need to train every day, you

just have to follow the routine that will last less than 30 minutes for a maximum of four days per week and each week, you will have a slight upgrade to the previous week. This type of consistent progressive training is a sure fire way to get your fitness results! If I were looking for fat loss, muscle tone and total body fitness and I did not have access to a gym, this is what I would do. Be warned! Although this is a "stand alone" fitness routine, I would NOT recommend this to the beginner to fitness, some of the exercises may be too advanced for someone just starting out. If you do happen to be a beginner, I would recommend my "Home workout for beginners" fitness routine. The home workout for beginners routine was designed as a "prequel" to this and if you were to start with it, and then decide to try this, you will find that it follows on very nicely. Good luck! I'll see you on the inside! Please remember that I am always happy to help where I can, so give me a shout if you get stuck or have any questions. All the best Jim Email: Jim@swapfat4fit.com

So you've spent months, or even years, training your body to its peak condition. But can you keep it up - or even get fitter? Here is the truth. Would you like to know how to get to that mystical "next level" in your fitness? Are you afraid that with age, your body will start losing its strength and stamina? Do you want to know how to almost effortlessly keep your fitness? Seems like the answers to those questions might be too good to be true. And yet, they are not. Your age shouldn't mean that you have to give in and accept what comes. You are the master of your health, strength and vitality, so why not get on board with some trade secrets to help you stay as fit as you want? Or maybe you're just beginning your journey after years of neglecting your body? A little flab appeared here or there? Your pants just don't fit like they used to? Again - no need to just lie down and accept your "fate" over a pint of ice cream. The solutions you can discover are easier

than you imagine. Once you get to know the basics of proper nutrition and discover how your body deals with all you put in it, you will be able to take full control of it - and you won't even notice when it happened. Age is just a number when it comes to fitness. It is not the age that makes the difference, but the lifestyle. Just like with bones, our muscles can lose density. After 50, it will affect most of us, but in reality, inactive people over just 30 years of age lose as much as 3-5% of muscle mass each year. Yet, there is a simple and effective way to prevent it and enjoy a strong, healthy body for years to come. In *Shredded Secrets*, you will discover: The diet and fitness myths you believed for too long demystified ...and the truth about gaining muscle What nutrition mistakes you may be making - and how to stop 5 crucial nutrition sources your body needs The scientific secret of strength and age revealed What are the most important supplements to take to stay healthy and strong Why the right timing is crucial - even on rest days Natural ways to promote muscle growth without spending a

fortune on personal trainers or magical pills. How knowing simple science can aid in your quest for fitness. And much more. Our bodies are slowly turning against us. They will naturally try to lose muscle, making us weaker and slower. But there are easy ways to combat that. We don't have to succumb to the relentless ticking of the biological clock. In fact, we can even turn it back. One of the greatest examples is Charles Eugster who picked up bodybuilding in his 80s, set several world records and one more than 100 fitness awards. The award-winning athlete says that bodybuilding reverses the aging process. Sure, making changes in your exercise and nutrition habits can be daunting. But you will soon discover how simple it is - in a few easy steps you can be on your way to the shredded success of your dreams. After 40, even 50, your body can perform just as well - or better - than it did in your 20s. Don't let time take a bite out of your strength - just click "Add to cart" and enjoy full fitness, vitality and health.
