 This new definitive volume on fish auditory systems will interest investigators in both basic research of fish bioacoustics as well as investigators in applied aspects of fisheries and resource management. Topics cover structure, physiology, localization, and acoustic behavior as well as more applied topics such as using sound to detect and locate fish.

 Anthropologist Perle Mohl lived in a rural French community for nearly two years, studying the everyday mechanisms of coexistence and the continual negotiation of individual and social identities as expressed in discourse - talking, stories, silence and action. What begins as an examination of the enigma between a "culture of silence" and a rich circulation of knowledge evolves into a reflection on the politics of coexistence and the paradoxical relationship between autonomy and interdependence.

Forlaget's beskrivelse: Printed book plus Pageburst access. You will receive a printed book and access to the complete book content electronically. Pageburst enhances learning not only by bringing world class content to your fingertips but also by letting you add to it, annotate it, and categorize it in a way that suits you. Pageburst frees you to spend more time learning and less time searching. Mayes' Midwifery, an established key textbook for students and qualified midwives, contains essential knowledge for professional practice. For this 14th edition, each section and chapter has been fully updated and enhanced by leading authors to ensure the text complies with contemporary practice and current guidelines. Added benefits are the availability of a variety of additional online resources for each chapter, including case studies, video and website links, and a bank of multiple-choice questions to test knowledge. With a strong emphasis on normal birth, the book covers the spectrum of midwifery-related topics applied to practice, providing a foundation of knowledge, and encouraging independent thought through the use of reflective exercises in each chapter and online. The book provides midwives with material that meets individual ways of learning and supports current modes of midwifery education. Mayes' Midwifery is the text for initial preparation and for ongoing midwifery practice. New chapters on essential contemporary issues: Vulnerable women - Perspectives on the future of midwifery, in a global context - Evidence-based information to guide best practice - Learning outcomes and Key Points in all chapters - Reflective activities Now with an integrated website offering additional resources and material including: Multiple-choice questions for self-testing - Case studies - Reflective activities to consolidate your professional development - Useful additional reading, resources and weblinks - Expanded topics - Downloadable materials including illustrations

**Sport & Remedial Massage Therapy** Bailliere Tindall  
 The Lateral Line System provides an overview of the key concepts and issues surrounding the development, evolution, neurobiology, and function of the lateral line, a fascinating yet somewhat enigmatic flow-sensing system. The book examines the historical precedence for linking the auditory and lateral line systems, its structure and development, use of the lateral line system of zebrafish as a model system, physical principles governing the response properties of the lateral line, the behavioral relevance of this sensory system to the lives of fish, and an examination of how this information is shaped and encoded by the peripheral and

central nervous systems. Contents The Gems of the Past: A Brief History of Lateral Line Research in the Context of the Hearing Sciences - Sheryl Coombs and Horst Bleckmann Morphological Diversity, Development, and Evolution of the Mechanosensory Lateral Line System - Jacqueline F. Webb The Hydrodynamic of Flow Stimuli - Matthew J. McHenry and James C. Liao The Biophysics of the Fish Lateral Line - Sietse M. van Netten and Matthew J. McHenry Sensory Ecology and Neuroethology of the Lateral Line - John Montgomery, Horst Bleckmann, and Sheryl Coombs Information Encoding and Processing by the Peripheral Lateral Line System - Boris Philippe Chagnaud and Sheryl Coombs The Central Nervous Organization of the Lateral Line System - Mario F. Wullimann and Benedikt Grothe Central Processing of Lateral Line Information - Horst Bleckmann and Joachim Mogdans Functional Overlap and Nonoverlap Between Lateral Line and Auditory Systems - Christopher B. Braun and Olav Sand The Hearing Loss, Protection, and Regeneration in the Larval Zebrafish Lateral Line - Allison B. Coffin, Heather Brignull, David W. Raible, and Edwin W Rubel

Images of the poor often fall into two contrasting depictions; on one hand, individuals and communities labeled as poor are seen as powerless victims of deprivation, and on the other, as thriving in solidarity, and authenticity, uncontaminated by capitalist ways of life. The articles in *The Byways of Poor* attempt to analyze poverty beyond these stereotypes. Drawing on cases from Zimbabwe, Mozambique, India, Bangladesh, Peru, and Mexico, and examining a diverse sphere of interactions, including those between donors and beneficiaries, local authorities and citizens, and employers and employees, the contributors in this book challenge traditional approaches to poverty, focusing on the resources, skills, and organizations by which individuals and communities struggle to alleviate their own financial and social hardships.
