Basic Counselling Skills is a step-by-step guide for all who use counselling skills as part of their role. Counselling skills are used by professionals and volunteers to help others in a wide range of circumstances and settings - including health care, social work, education and agencies which provide specific advice and support to the public. This book supports the training and practice of such helpers, by providing a straightforward introduction. Divided into concise learning units, the book describes each skill and gives examples of its use in practice. Activities are also provided for practicing skills as they are introduced.

The Essential Counselor SAGE

*Counselling Skills for Working with Shame* helps professionals to understand and identify shame and to build shame resilience in both the client and themselves. Shame is ubiquitous in counselling where there is an increased vulnerability and risk of exposure to shame. While many clients experience feelings of shame, it is often overlooked in the therapeutic process and as a result can be left untreated. It is particularly pertinent when working with clients who have experienced trauma, domestic or complex abuse, or who

struggle with addiction, compulsion and sexual behaviours. Written in an accessible style, this is a hands-on, skills-based guide which helps practitioners to identify what elicits, evokes or triggers shame. It gives a general introduction to the nature of shame in both client and counsellor and how these become entwined in the therapeutic relationship. It focuses on increasing awareness of shame and how to release it in order to build shame resilience. With points for reflection, helpful exercises, top tips, reminders and suggestions for how to work with clients, this is a highly practical guide for counsellors, therapists, mental health practitioners, nurses, social workers, educators, human resources, trainee counsellors and students.

In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-genius everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In **Grit**, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas

about the cultivation of tenacity have clearly changed some lives for the better” (The New York Times Book Review). Among Grit’s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, Grit is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).
