Business Process Re  
Engineering A Business  
process re-engineering  
(BPR) is a business

management strategy, originally pioneered in the early 1990s, focusing on the analysis and design of workflows and business processes within an organization. BPR aimed to help organizations fundamentally rethink how they do their work in order to improve customer service, cut operational costs, and become world-class competitors. Business process re-engineering - Wikipedia Business process reengineering is an approach used to improve organizational performance by increasing the efficiency and effectiveness of processes that exist across the organization. In addition to the redesigning of business processes, it also

involves the redesigning of associated systems and organizational structures. What is Business Process Reengineering | A Comprehensive Guide Proper execution of Business Process Reengineering can be a game-changer to any business. If properly handled, business process reengineering can perform miracles on a failing or stagnating company, increasing the profits and driving growth.
