A police trooper inspects a car during a
 routine traffic stop and finds a vast cache
 of weapons, complete with automatic
 rifles, thousands of rounds of ammunition,
 and black ski masks-a veritable bank
 robber's kit. Should the men in the car be
 charged? If so, with what? A son neglects
 to care for his elderly mother, whose
 emaciated form is discovered shortly
 before she dies a painful death. Is the
 son's neglect punishable, and if so how? A
 career con man writes one bad check too
 many and is sentenced to life in prison-for
 a check in the amount of \$129.75. Is this
 just? A thief steals a backpack, only to find

it contains a terrorist bomb. He alerts the
 police and saves lives, transforming
 himself from petty criminal to national
 hero. These are just a few of the many
 provocative cases that Paul Robinson
 presents and unravels in *Would You
 Convict?* Judging crimes and meting out
 punishment has long been an informal
 national pasttime. High-profile crimes or
 particularly brutal ones invariably prompt
 endless debate, in newspapers, on
 television, in coffee shops, and on front
 porches. Our very nature inclines us to be
 armchair judges, freely waving our
 metaphorical gavels and opining as to the
 innocence or guilt-and suitable
 punishment-of alleged criminals.

Confronting this impulse, Paul Robinson here presents a series of unusual episodes that not only challenged the law, but that defy a facile or knee-jerk verdict. Narrating the facts in compelling, but detached detail, Robinson invites readers to sentence the transgressor (or not), before revealing the final outcome of the case. The cases described in *Would You Convict?* engage, shock, even repel. Without a doubt, they will challenge you and your belief system. And the way in which juries and judges have resolved them will almost certainly surprise you.

Handgun Stopping Power John O'Brien

Joy knows she'll be facing more dangerous Othersiders than ever before as a new member of the Elite Hunter unit, but if anyone is up to the challenge it's her. She's been Hunting these monsters since she was a child, and has a pack of eleven fiercely protective magical Hounds. Then the rules change. Monsters unlike any Joy's ever seen or even heard of are breaking through Apex City's barriers, and the Hunters are scrambling to find new ways to fight them—all the while hiding the true danger Apex faces from the Cits, who are ignorant of the severity of the Othersiders' attacks. The leaders of Apex must come together to protect the city, but tensions have never been higher between the Hunters and the powerful PsiCorps, with each group competing to be the primary protector of the city. The conflict escalates even further when Joy starts discovering bodies of Psimons while patrolling the city sewers on a special assignment from her uncle, who commands the Hunters. Someone is killing Psimons, and if Joy doesn't uncover the true culprit she might just take the fall for it. Chaos erupts when Ace, the murderous Hunter who tried to kill Joy at her Elite trials, escapes from the Army's captivity and defects to the Othersiders. Joy has no idea what Ace might be capable of with the help of the cunning Folk, but she may be about to find out; Othersider forces are gaining strength and momentum just beyond the barriers. A storm is approaching Apex City, and unless Joy and her fellow Hunters put up the fight of their lives, it might just sweep them all away . . .

From 1945 to 1973, more than 100,000 members of the U.S. military were advisors in Vietnam. Of these, 66,399 were combat advisors. Eleven were awarded the Medal of Honor, 378 were killed and 1393 were wounded. Combat advisors lived and fought with South Vietnamese combat units, advising on tactics and weapons and liaising with local U.S. military support. Bob Worthington's first tour (1966-1967) began with training at the Army Special Warfare School in unconventional warfare, Vietnamese culture and customs, advisor responsibilities and Vietnamese language. Once in-country, he acted as senior advisor to infantry defense forces and then an infantry mobile rapid reaction force. Worthington worked alongside ARVN forces, staging operations against Vietcong and North Vietnamese Army units, and coordinated actions with the U.S. Marines. He describes a night helicopter assault by a 320-man ARVN battalion against a 1,200-man NVA regiment. On another night, the Vietcong ceased fire while Worthington arranged a

Marine helicopter to medevac a wounded baby.

Discover the dangerous, futuristic world of the #1 New York Times bestselling Hunter series from legendary fantasy author Mercedes Lackey. They came after the Diseray. Monsters. Long ago, the barriers between our world and the Otherworld were ripped open, and it's taken centuries to bring back civilization in the wake of the catastrophe. Now, the luckiest Cits live in enclosed communities, behind walls that keep them safe from the hideous creatures fighting to break through.

Others are not so lucky. In Hunter, Joyeaux Charmand believes that every Cit without magic deserves her protection from dangerous Othersiders. Then she is called to Apex City, where the best Hunters are kept to protect the most important people. Joy soon realizes that the city's powerful leaders care more about luring Cits into a false sense of security than protecting them. More and more monsters are getting through the barriers, and the close calls are becoming too frequent to ignore. And when an act of sabotage against Joy takes an unbearable toll, she uncovers a terrifying conspiracy in the city. There is something much worse than the usual monsters infiltrating Apex. And it may be too late to stop them... In Elite, Joy knows she'll be facing more dangerous Othersiders than ever before as a new member of the Elite Hunter unit. But if anyone is up to the challenge, it's her. Then the rules change. Monsters unlike any Joy's ever seen or even heard of are breaking through Apex City's barriers, and the Hunters are scrambling to find new ways to fight them—all the while hiding the true danger Apex faces from the Cits, who are ignorant of the severity of the Othersiders' attacks. The leaders of Apex must come together to protect the city, but tensions have never been higher between the Hunters and the powerful PsiCorps, with each group competing to be the primary protector of the city. The conflict escalates even further when Joy starts discovering bodies of Psimons while patrolling the city sewers on a special assignment from her uncle, who commands the Hunters. A storm is approaching Apex City, and unless Joy and her fellow Hunters put up the fight of their lives, it might just sweep them all away . . . In Apex, the riveting conclusion to the Hunter trilogy, Joy must risk everything to end a brutal war before she loses all she's ever loved. The corrupt and powerful PsiCorps is determined to usurp the Hunters as chief defenders of Apex City and Joy is squarely in their crosshairs.

Unused to playing political games, she has few people she can truly trust—not even Josh, her first friend in Apex City, who broke up with her when it became too dangerous for a Psimon to be dating a Hunter. Then Josh comes to Joy for help. He fears that Abigail Drift, the head of PsiCorps, will use him in her experiments designed to empower PsiCorps and render Hunters superfluous—a scheme that's already killed dozens of Psimons. Joy manages to smuggle Josh to safety, but he can't evade Drift forever. As Joy faces ever more powerful Othersiders, she is helped by the most surprising ally imaginable -- the same Folk Mage she once met in battle. But can Joy trust the most cunning and treacherous of all Othersiders?

Dave Jackson, an Air Force captain and trained pilot, is left wondering what to do when he suffers a serious injury and is told he can no longer fly high-performance aircraft. But then he's visited by a military intelligence officer who tells him his career doesn't have to end. Soon, Jackson finds himself in Kirkuk, Iraq, which is no sleepy Kurdish village but a vibrant city. There, he meets a cast of shadowy figures pushing for Kurdistan independence, and he considers who might be potential partners for the United States. There are many factors to consider, however, especially with the surrounding governments of Iran, Turkey and Syria all having substantial Kurdish populations of their own. If a Kurdish homeland is extracted from Iraq, it could lead to a violent insurgency in other countries and contribute to added violence instead of creating stability. It all amounts to an explosive situation in which one lone American can change the face of world politics. But Jackson may just die in the process as he seeks to create a place on the map for Kurdistan.

In Quantitative Ammunition Selection, Charles Schwartz presents an accessible mathematical model that allows armed professionals and lawfully-armed citizens to evaluate the terminal ballistic performance of self-defense ammunition using water as a valid ballistic test medium. Based upon a modified fluid dynamics equation that correlates highly ($r=+0.94$) to more than 800 points of manufacturer- and laboratory-test data, the quantitative model allows the armed professional to generate ballistic test results equivalent to those obtained in calibrated 10 percent ordnance gelatin. Using data generated from water tests, the quantitative model accurately predicts the permanent wound cavity volume and mass, terminal penetration depth (± 1 cm), and exit velocity of handgun projectiles as these phenomena would occur in calibrated 10 percent ordnance gelatin and soft tissue. A retired law enforcement professional, Schwartz provides a concise explanation of the relevant principles of mechanics, fluid dynamics, and thermodynamics pertaining to the model and its derivation. The quantitative model is clearly presented with illustrated computational examples that provide guidance to the armed professional in every aspect of the model's application.

Ballistic Imaging assesses the state of computer-based imaging technology in forensic firearms identification. The book

evaluates the current law enforcement database of images of crime-related cartridge cases and bullets and recommends ways to improve the usefulness of the technology for suggesting leads in criminal investigations. It also advises against the construction of a national reference database that would include images from test-fires of every newly manufactured or imported firearm in the United States. The book also suggests further research on an alternate method for generating an investigative lead to the location where a gun was first sold: "microstamping," the direct imprinting of unique identifiers on firearm parts or ammunition.

There is no sanctuary. That was taken away in the blink of an eye. Humanity went out not with a whimper, but a bang. Jack, a sometimes humorous, sometimes philosophical ex-special operations pilot and soldier is one of the few left to

struggle through the desolation left in the aftermath; seeking to survive as a new ferocious species emerges from the rubble, hungry and unrelenting. Will his special forces training be enough? Will he be able to keep his children safe and guide the few survivors through perils that now roam the world they once knew? Or will the hordes that now own the night prevail, forever removing the last of mankind from existence? Humankind was once at the top of the food chain. But that has now changed. This hard-hitting, action-packed series begins with Jack Walker being suddenly thrust into a world where the infrastructure which cherished Armani suits, night clubs, fast and expensive cars and watching the daily stock market are gone. Left in its place is the material world mankind built but a majority of the population has vanished; replaced by a new, savage, unrelenting, cunning, animalistic species which hunts and operates at night.
