Seeing is Understanding.

The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of

the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-

hulled Chevrier sloop.

 The purpose of the 10th  
 US North American Mine  
 Ventilation Symposium in

Anchorage 2004 was to  
 bring together  
 practitioners involved in  
 the planning and  
 operation of underground  
 ventilation systems, to  
 provide a forum for  
 debate and exchange of  
 ideas, and to share  
 information on the  
 advances which have  
 been made and consider  
 problems which remain in  
 the broad field of mine  
 ventilation. The Mine  
 Ventilation Symposium  
 series has always been a  
 premier forum for  
 ventilation experts,  
 practitioners, educators,

students, regulators and manufacturers from around the world to exchange knowledge, ideas and opinions. This volume features over sixty selected technical papers from fifteen countries around the world including topics such as mine fires and explosions, case studies, diesel in underground mines, face ventilation, ventilation systems design, strata gas and control, ventilation and control systems, modeling and software development, dust

generation, transport and control.
