CAYDEN CASSIDY

Applications of Computation in Mechanical Engineering VK Global Publications

Windship Technology, Part A contains the proceedings of the International Symposium on Windship Technology (WINDTECH '85), held at the University of Southampton, England, on April 24-25, 1985. The symposium provided a forum for discussing developments in windship technology, including the use of calculation methods to analyze wind propulsion on cargo ships and weather routing for wind-assisted ships. Measurements of the comparative performance of sailing rigs are also presented.

Comprised of 17 chapters, this volume begins by tracing the revival of serious interest in the possible use of the wind in ship propulsion over the past decade, and giving examples of the wide range of rigs that have been developed and are now installed on ships. The reader is then introduced to Project INDOSAIL intended to develop cargo sailing vessels for the Indonesian inter-island trade. Subsequent chapters focus on sail-assist developments from 1979 to 1984; economic aspects of the application of additional sail power on small German fishing vessels; sail retrofit on inter-island vessels in Fiji; and the aerodynamics of a triangular jib-and-boom combination. The book concludes with an evaluation of two-dimensional sail shape determined by pressure and its tension. This book will appeal to government officials, academics, ship owners, and other parties with an interest in

windship technology.

Engineering Mechanics Devoted to Mechanical Civil, Mining and Electrical Engineering Chandresh Agrawal

This volume includes select peer reviewed proceedings from the 3rd International Conference on Computing in Mechanical Engineering (ICCME 2021) discussing the application of computer based simulations in mechanical and allied engineering disciplines. The book shows advanced applications of numerical techniques in different areas of mechanical engineering. The topics covered include numerical modelling, simulations and optimization best practices in various challenging domains like fluid dynamics, combustion in IC engines, heat transfer analysis, vibration damping and control, chemical and process engineering, mechanics of machining, nano fluidics and material science. This book will be a useful resource to students, researchers and engineers working on multidisciplinary engineering problems, specially focusing on mechanical engineering and applied mathematics issues, with hope that it will impact future developments in engineering disciplines and motivate advancements and innovations in technical sciences.

Transactions of the Illuminating Engineering Society Chandresh Agrawal

Vols. 1-17 include Proceedings of the 10th-24th (1914-28) annual meeting of the society.

Supplement to 3d ed. called Selected characteristics of occupations (physical demands, working conditions, training time) issued by Bureau of Employment Security.

Work Nelson Thornes

An inspired observer of the Indian psyche, Sudhir Kakar trained as a psychoanalyst at the Sigmund Freud Institute, Frankfurt. He set up a clinic in Delhi in 1975, thus embarking on a lifelong search for the wellsprings of Indian identity. He went on to establish the new discipline of cultural psychology. *A Book of Memory* records not only the crises of identity and intellect, but also the highs and lows of love and pleasure. It is fearless and revelatory with regard to the self and its motivations, a rare candour illuminating the urbane prose.

A Book of Memory Chandresh Agrawal

1. These books are modelled on the updated syllabus and guidelines as per the CBSE Board. 2. All chapters consist of Important Terms and Events (History). 3. The chapters include a variety of questions: Multiple Choice, Correct and Rewrite Statements, Sequencing Questions, Assertion-Reason, Competency-based Questions, Pictorial Questions and Source-

based and Case-based Questions - all with answers. 4. It also consists of NCERT Questions, Very Short Answer Questions and Short Answer Questions, Long Answer Questions - all with complete solutions. 5. It is supplemented with maps and sample project works based on CBSE topics.
