Think big, spend little! Everything you need to make your movie is in this complete resource kit. The Power Filmmaking Kit is a comprehensive, multimedia book and DVD package that empowers you to produce your own Hollywood-quality movie. Emmy-award winning director Jason Tomaric produced an independent film using only local resources for under \$2,000 that not only

got picked up for distribution, but is also used as a case study in top film schools. This book shows you how to do the same, regardless of your budget or location. You'll learn how to achieve professional quality on a microbudget, using the resources you have at hand. The book includes: * Coverage of the entire filmmaking process. It's all here, from writing, directing, and cinematography, to acting, editing, and distribution. * Step-by-step instructions, tips, diagrams, charts, and illustrations for how you can make a Hollywood-caliber movie on a next-to-nothing budget with little upfront money and access only to local resources. The DVD includes: * Time and Again, the profitable, award-winning, internationally distributed independent film made for under \$2,000 * One hour of video tutorials unveiling how the movie was made...interviews and behind-the-scenes case studies on directing, production, and editing * Complete rough footage from a scene for editing practice * Forms, contracts, and more resources *The Producer's Notebook includes scripts, storyboards, schedules, call sheets, contracts, letters from the producer,

camera logs and press kits from "Time and Again." See how the production was scheduled and organized, read the script, follow the storyboards and watch the production unfold from beginning to end. * Blank contracts and forms that you can print out to use on your own film

 The Unorthodox Guitar: A Guide to Alternative Performance Practice is a comprehensive resource for experimentally minded guitarists and composers wishing to write for or perform on the instrument in new ways. The book focuses primarily on unconventional approaches to guitar performance, which include alternative tunings, extended techniques, instrumental preparations, electronic augmentations, and issues related to performing and recording with a computer. Embracing all guitar types-

nylon, steel-string acoustic, and electric-techniques and examples are culled from a broad range of musical genres, including blues, contemporary classical, country, folk, jazz, rock, and non-Western idioms. While the writing offers a treasure trove of possibilities for experimental improvisation, it is oriented towards formal composition, and to that end details the controllable dimensions of the techniques and preparations at hand, along with strategies that might be adopted to notate them. Conventional guitar amplifiers, effect pedals, and pedalboards are examined, along with a discussion of analog signal chains, rig design, and best practices for the preservation of tone. In addition, possibilities afforded by the addition of a computer to the guitar rig are explored, including signal processing, sensor augmentation, and score following. The writing is paired with a companion website that contains an abundance of audio, video, and software materials to supplement the ideas presented. This information is intended to serve as a guide, reference, and source of inspiration for those wishing to compose and/or perform on the instrument in innovative

ways.

Voice & Vision is a comprehensive manual for the independent filmmakers and film students who want a solid grounding in the tools, techniques, and processes of narrative film in order to achieve their artistic vision. This book includes essential and detailed information on relevant film and digital video tools, a thorough overview of the filmmaking stages, and the aesthetic considerations for telling a visual story. The ultimate goal of this book is to help you develop your creative voice while acquiring the solid practical skills and confidence to use it. Unlike many books that privilege raw technical information or the line-producing aspects of production, Voice & Vision places creativity, visual expression, and cinematic ideas front and center. After all,

every practical decision a filmmaker makes, like choosing a location, an actor, a film stock, a focal length, a lighting set-up, an edit point, or a sound effect is also an expressive one and should serve the filmmaker's vision. Every decision, from the largest conceptual choices to the smallest practical solutions, has a profound impact on what appears on the screen and how it moves an audience. "In Practice sidebars throughout Voice & Vision connect conceptual, aesthetic and technical issues to their application in the real world. Some provide a brief analysis of a scene or technique from easily rentable films which illustrate how a specific technology or process is used to support a conceptual, narrative, or aesthetic choice. Others recount common production challenges encountered on real student and professional shoots which will inspire you to be innovative and resourceful when you are solving your own filmmaking challenges.

The purpose of this work has been to deal with clarinet performance as it has

evolved in the literature since approximately 1950: to identify or "catalogue" the practices now prevalent which differ from those formerly standardized; to provide some perspective

on specific performance capabilities and limitations; and, whenever appropriate, to include suggestions for performance based on the author's own experience. It is

intended as a guidebook for composers as well as a manual to which clarinetists might refer in working out various problems associated with new music performance. --pref.
