The Electrical Journal CRC Press

The Second Edition of the CRC Handbook of Mariculture provides an extensive comparison of marine shrimp culture techniques from around the world. This extensively revised and updated Second Edition focuses on growout systems that have contributed to the production success of shrimp farms and systems worldwide. Topics covered include methods for the culture and preparation of algae, rotifers, Artemia, and other foodstuffs for use in crustacean farms; recent developments on enriching larval food organisms to improve crustacean diets; conditioning and spawning penaeid shrimp; obtaining and manipulating shrimp eggs and sperm for controlled reproduction and use of intensive nursery raceways for juvenile shrimp production; and discussions of many types of marine shrimp growout systems. In addition, culture systems used in Hawaii, Ecuador, Taiwan, and Japan are described in detail. Significant new information from Japan on hormonal control of penaeid shrimp maturation and spawning is discussed. Marine shrimp and Macrobrachium shrimp diseases by the foremost authorities in the area are presented with detailed photographs and illustrations to help identify diseases. The book also includes an update on American lobster larval and juvenile culture.

Human Color Vision Longman

Described as "Who owns whom, the family tree of every major corporation in America," the directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility.

IT Enabled Services Springer

The authors examine the role of the law in developing large financial markets necessary for national economic success. They discuss the basic foundational law of contracts, property and tort, corporate law, and securities law, providing both a broad theoretical and empirical case for its value in financial markets.

The International Stock Exchange Official Yearbook Cambridge University Press

This book presents selected papers from the 5th International Conference on Inventive Systems and Control (ICISC 2021), held on 7-8 January 2021 at JCT College of Engineering and Technology, Coimbatore, India. The book includes an analysis of the class of intelligent systems and control techniques that utilises various artificial intelligence technologies, where there are no mathematical models and systems available to make them remain controlled. Inspired by various existing intelligent techniques, the primary goal is to present the emerging innovative models to tackle the challenges faced by the existing computing and communication technologies. The proceedings of ICISC 2021 aim at presenting the state-of-the-art research developments, trends, and solutions for the challenges faced by the intelligent systems and control community with the real-world applications. The included research articles feature the novel and unpublished research works on

intelligent system representation and control.

Builder Oxford University Press, USA

The Law of Finance aims, for the first time in a single volume, to account for the whole of international finance as understood in English law. The volume is divided into two halves with section one considering the principles of the law of finance and section two considering the full range of modern financial techniques in their legal context.

The Electrical Review Springer Science & Business Media

Facet Theory (FT) is presented in this volume as a methodological approach that combines content design and data analysis. Following a brief overview of FT design, FT data analysis and the correspondence hypotheses between the two, the authors consider the role facets play in observations and equivalence relations and discuss in detail: mapping sentences and their common range; constructing questionnaire items; correspondence hypotheses relating to FT design; bivariate regression hypotheses; and how to analyze data profiles with hypotheses for structures and similarity structures. In conclusion, the issues of using FT in practice including measurement theory and significance testing are addressed.

Computerworld Crown

A unique military and cultural history that chronicles the reigns of Philip and Alexander the Great in one sweeping narrative.

Popular Science Edward Elgar Publishing

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Duns Europa Springer

A report on genius inventor Dean Kaman's FIRST program follows a team of brilliant, misfit high school students through the program's 2009 robotics competition, during which the teens under the guidance of a dedicated teacher confronted other hopefuls in stadiums throughout the country.

Facet Theory SAGE Publications, Incorporated

Our understanding of human color vision has advanced tremendously in recent years, helped along by many new discoveries, ideas, and achievements. It is therefore timely that these new developments are brought together in a book, assembled specifically to include new research and insight from the leaders in the field. Although intentionally not exhaustive, many aspects of color vision are discussed in this Springer Series in Vision Research book including: the genetics of the photopigments; the anatomy and physiology of photoreceptors, retinal and cortical pathways; color perception; the effects of disorders; theories on neuronal processes and the evolution of human color vision. Several of the chapters describe new, state-of-the-art methods within genetics, morphology, imaging techniques, electrophysiology, psychophysics, and computational neuroscience. The book gives a comprehensive overview of the different disciplines in human color vision in a way that makes it accessible to specialists and non-specialist scientists alike. About the

Series: The Springer Series in Vision Research is a comprehensive update and overview of cutting edge vision research, exploring, in depth, current breakthroughs at a conceptual level. It details the whole visual system, from molecular processes to anatomy, physiology and behavior and covers both invertebrate and vertebrate organisms from terrestrial and aquatic habitats. Each book in the Series is aimed at all individuals with interests in vision including advanced graduate students, post-doctoral researchers, established vision scientists and clinical investigators. The series editors are N. Justin Marshall, Queensland Brain Institute, The University of Queensland, Australia and Shaun P. Collin, Neuroecology Group within the School of Animal Biology and the Oceans Institute at the University of Western Australia.

This title is designed to help you to relate all the reading and study throughout your course specifically to exam and assignment situations. Understand quickly what is required, organise your revision, and learn the keypoints with ease, to get the grades you need. Tested with examiners and students.

Investors Chronicle and Stock Exchange Gazette

The eighteenth and nineteenth centuries was an era of continuity as well as change. Though properly portrayed as the era of 'Protestant Ascendancy' it embraces two phases - the eighteenth century when that ascendancy was at its peak; and the nineteenth century when the Protestant elite sustained a determined rear-guard defence in the face of the emergence of modern Catholic nationalism. Employing a chronology that is not bound by traditional datelines, this volume moves beyond the familiar political narrative to engage with the economy, society, population, emigration, religion, language, state formation, culture, art and architecture, and the Irish abroad. It provides new and original interpretations of a critical phase in the emergence of a modern Ireland that, while focused firmly on the island and its traditions, moves beyond the nationalist narrative of the

twentieth century to provide a history of late early modern Ireland for the twenty-first century.

As the global economy turns more and more service oriented, Information Technology-Enabled Services (ITeS) require greater understanding. Increasing numbers and varieties of services are provided through IT. Furthermore, IT enables the creation of new services in diverse fields previously untouched. Because of the catalyzing nature of internet technology, ITeS today has become more than "Outsourcing" of services. This book illustrates the enabling nature of ITeS with its entailment of IT, thus contributing to the betterment of humanity. The scope of this book is not only for academia but also for business persons, government practitioners and readers from daily lives. Authors from a variety of nations and regions with various backgrounds provide insightful theories, research, findings and practices in various fields such as commerce, finance, medical services, government and education. This book opens up a new horizon with the application of Internet-based practices in business, government and in daily lives. Information Technology-Enabled Services works as a navigator for those who sail to the new horizon of service oriented economies.
