Presents nearly 600 concise entries
describing the major advances in military
technology from prehistory to the present,
written by an internationally recognized

expert in military history and technology.
MH. Greenwood Publishing Group
Contents: Pt. 1: Introduction. Container
trade growth - an introduction -- Container
handling techniques and trends -- Trends
in vessel design and container
characteristics - the implications for
terminal development. Pt. 2: Terminal
design. Systems analysis - a terminal
design tool -- Basic operational design of
sea container terminals -- Terminal
capacity -- Terminal design with particular
reference to civil engineering. Pt. 3:
Terminal operations. Limited-user
container terminals with particular

reference to Southampton -- A multi-user terminal based on rail mounted yard gantry cranes -- A common-user terminal based on the rubber tyred yard gantry system -- A multi-user container terminal based on straddle carrier handling with particular reference to Bremerhaven -- The combi-terminal concept with particular reference to Antwerp. Pt. 4: Terminal equipment. Equipment selection -- Equipment - engineering features -- Equipment specification and tender evaluation -- Equipment maintenance. Pt. 5: Other operating factors. The manpower aspects of container terminal operation -- Documentation and control at a multi-user terminal -- Container safety -- Security -- Costs and charges. Pt. 6: Container service operating philosophy. Integrated deep-sea service based on sea-land philosophy -- An integrated short-sea container service -- A ro-ro philosophy explained. Pt. 7: The inland interface. Inland ports - the UK containerbase system -- Rail transport - the freightliner system -- Containers and the road transport industry in Europe. Pt. 8: Developing countries. Planning for the change to containers in developing countries. App. 1. Simulation to test the

viability of the proposed operating system -- App. 2. A combined physical/computer model for simulation of terminal operations -- App. 3. Estimating container yard and container freight station space requirements -- App. 4. Establishing terminal operational control procedures -- App. 5. Extracts from reports or telexes sent on terminals becoming operational in the early 1970s -- App. 6. Basic specification outline for a dockside crane -- App. 7. Computers in the maintenance environment -- App. 8. A maintenance management computer system -- App. 9. International comparison of container ship productivity.

Encyclopedia of Military Technology and Innovation John Wiley & Sons

Some issues include special catalog, survey and directory number.

Canadian Mining Journal's Reference Manual & Buyer's Guide Simon and Schuster

Bizarre military history: In 1979, a crack commando unit was established by the most gifted minds within the U.S. Army. Defying all known laws of physics and accepted military practice, they believed that a soldier could adopt the cloak of

invisibility, pass cleanly through walls, and—perhaps most chillingly—kill goats just by staring at them. They were the First Earth Battalion, entrusted with defending America from all known adversaries. And they really weren't joking. What's more, they're back—and they're fighting the War on Terror. An uproarious exploration of American military paranoia: With investigations ranging from the mysterious "Goat Lab," to Uri Geller's covert psychic work with the CIA, to the increasingly bizarre role played by a succession of U.S. presidents, this might just be the funniest, most unsettling book you will ever read—if only because it is all true and is still happening today.

[Essentials of Paleomagnetism](#)

"This booklet is written for managers and supervisors in industries that involve the manual handling of containers. It offers suggestions to improve the handling of rectangular, square, and cylindrical containers, sacks, and bags. "Improving Manual Material Handling in Your Workplace" lists the benefits of improving your work tasks. It also contains information on risk factors, types of ergonomic improvements, and effective

training and sets out a four-step proactive action plan. The plan helps you identify problems, set priorities, make changes, and follow up. Sections 1 and 2 of "Improvement Options" provide ways to improve lifting, lowering, filling, emptying, or carrying tasks by changing work practices and/or the use of equipment. Guidelines for safer work practices are also included. Section 3 of "Improvement Options" provides ideas for using equipment instead of manually handling individual containers. Guidelines for safer equipment use are also included. For more help the "Resources" section contains additional information on administrative

improvements, work assessment tools and comprehensive analysis methods. This section also includes an improvement evaluation tool and a list of professional and trade organizations related to material handling."--Page 6.

The Poultry Farmer

"This book by Lisa Tauxe and others is a marvelous tool for education and research in Paleomagnetism. Many students in the U.S. and around the world will welcome this publication, which was previously only available via the Internet. Professor Tauxe has performed a service for teaching and research that is utterly unique."—Neil D. Opdyke, University of Florida
