 Deitel's C++ How to Program is the world's
 best-selling introduction to C++
 programming. Now, this classic has been
 thoroughly updated! The authors have
 given this edition a general tune-up of
 object-oriented programming
 presentation. The new Fourth Edition has a
 new code-highlighting style that uses an

alternate background color to focus the
 reader on new code elements in a
 program. The Deitels' C++ How to
 Program is the most comprehensive,
 practical introduction to C++ ever
 published -- with hundreds of hands-on
 exercises, roughly 250 complete programs
 written and documented for easy learning,
 and exceptional insight into good
 programming practices, maximizing
 performance, avoiding errors, debugging,
 and testing. This new Fourth Edition has
 an upgraded OOD/UML case to latest UML
 standard, as well as significant
 improvements to exception handling and
 operator overloading chapters. Features
 enhanced treatment of strings and arrays
 as objects earlier in the book using
 standard C++ classes, string and vector.
 The Fourth Edition retains every key
 concept and technique ANSI C++
 developers need to master: control

structures, functions, arrays, pointers and
 strings, classes and data abstraction,
 operator overloading, inheritance, virtual
 functions, polymorphism, I/O, templates,
 exception handling, file processing, data
 structures, and more. It also includes a
 detailed introduction to Standard
 Template Library (STL) containers,
 container adapters, algorithms, and
 iterators. The accompanying CD-ROM
 includes all the code from the book as well
 as essential software for learning C++. For
 anyone who wants to learn C++, improve
 their existing C++ skills, and master
 object-oriented development with C++.

 As new social actors have emerged in
 Latin America, the process of dealing with
 the legacy of still-unresolved human rights
 abuses has been significantly
 reinvigorated. This powerful text provides

the first systematic analysis of the second wave of memory and justice mobilization throughout the region. A multidisciplinary group of authors, many from the global south, consider the changed political, economic, and social conditions that have led to new forms of social action. They trace the growth of human rights groups as fundamental political organizations in the post-dictatorship era, the participation of public authorities in the investigation and persecution of human rights abusers, and the implementation of national and international human rights legislation. Pairing clear explanations of concepts and debates with cases studies, the book offers a unique opportunity for students to understand and interpret the history and politics of a range of Latin American countries.

Dwellers of Memory is an ethnographic study of how urban youth in Colombia came to be at the intersection of multiple forms of political, drug-related, and territorial violence in a country undergoing forty years of internal armed conflict. It examines the ways in which youth in the city of Medellin reconfigure their lives and, cultural worlds in the face of widespread violence. This violence has transgressed familiar boundaries and destroyed basic social supports and networks of trust. This volume attempts to map and understand its patterns and flows. The author explores how Medellin's youth locate themselves and make sense of violence through contradictory and shifting memory practices. The violence has not completely taken over their cultural worlds or their subjectivities. Practices of remembering and forgetting are key methods by which these youth rework their identities and make sense of the impact of violence on their lives. While the experience of violence is rooted in urban space and urban youth, the memory dwellers use a sense of place, oral histories of death, and narratives of fear as survival strategies for inhabiting violent neighborhoods. The book also examines fissures in memory, the contradictory constructions of young people's subjective selves, and practices of gendered violence and terror. All have and continue to pose risks to the historical memory and cultural survival of the residents of Medellin. *Dwellers of Memory* offers an alternative ethnographic approach to the study of memory and violence, one that calls into question whether the role of the ethnographer of violence is to be a mere witness of terror, or to oppose it by writing against it. It will be of interest to sociologists,

anthropologists, and students of, ethnography.

This book studies how religion influences the way people in Colombia remember a massacre of 79 civilians that occurred in a Catholic church in 2002. It analyses how strategies of memorialisation are part of religious peacebuilding initiatives that aim to resist and denounce crimes against human, ethnic, cultural and economic rights.

At the turn of the twenty-first century, Argentina was in the midst of its worst economic crisis in decades, the result of years of drastic neoliberal reforms. This book looks at the way ideas about race and nationhood were conveyed during this period of financial meltdown and national emergency, examining in particular how the neoliberal crisis led to the critical self-questioning of the dominant imaginary of Argentina as homogeneously white – allegedly the result of European immigration and the extinction of most indigenous and black people in the nation-building age. *The Darkening Nation* focuses on how the self-examination of racial and national identity triggered by this crisis was expressed in culture, through the analysis of literary texts, films, artworks and music styles. By considering a wide range of artistic and cultural products, and different forms of racial identity and difference (white, indigenous, Afro-descendant, immigrant and negro as it is understood in local contexts), this study constitutes a timely addition from a literary and cultural studies perspective to recent academic enquiry into race and nation in Argentina.

The public authorities have not successfully resolved the management of the traumatic memory of the wars, dictatorships and massacres to which the European project was always intended to be a counterpoint. The conflict of memories and the public discourses about the past are latent on ideological, political

and cultural levels. However, if in the past the conflict concerning memories tended to develop inside the borders of countries, it has now leapt into the European arena. This has also led to the confrontation and questioning of the great narratives established in the common memory, especially with countries of the East joining the European Union. Each community, group or nation maintains common memories that do not always fit in or converge with a general overall account. The origins of the UB Solidarity Foundation's European Observatory on Memories lie in these debates, and through this book – which includes the contributions of specialists in multiple disciplines and the speeches that were given at the first international symposium, "Memory and Power: A Transnational Perspective" – it hopes to present some of the key challenges that this conflict of memories has in store for us in the present and in the future.

Sex and the sexual have for far too long been consigned to the dark corners by social scientists in general and tourism and leisure scholars in particular. *Sex and the Sexual During People's Leisure and Tourism Experiences* seeks to begin to rectify this situation by bringing the position and nature of sex and the sexual into the light of academic debate. As such, this book is designed to highlight cross-disciplinary emerging work on sex and the sexual in leisure and tourism and provide the readers with insights into this social realm. It encompasses a broad array of sex-related issues and tourism and leisure environments from across a variety of countries. The book should appeal to researchers and students across the humanities and social sciences both for the value of the research in its own right and the ability of it to be used as a lens through which to view the position of sex and the sexual as well as tourism and leisure in today's world. Overall, it is argued that sex and the sexual should play a part in the academic discourse, especially if we wish to describe what is actually happening out there as far as tourism and leisure are concerned.

War memory and commemoration have had increasingly high profiles in public and academic debates in recent years. This volume examines some of the social changes that have led to this development, among them the passing of the two world wars from survivor into cultural memory. Focusing on the politics of war memory and commemoration, the book illuminates the struggle to install particular memories at the center of a cultural world, and offers an extensive argument about how the politics of commemoration practices should be understood. *Commemorating War* analyzes a range of forms of remembrance, from public commemorations orchestrated by nation-states to personal testimonies of war survivors; and from cultural memories of war represented in films, plays and novels to investigations of wartime atrocities in courts of human rights. It presents a wide range of international case studies, encompassing lesser-known national histories and wars beyond the well-trodden terrain of Vietnam and the two world wars in Europe. Emerging from this book is an important critique of both "state-centered" approaches to war memory and those that regard commemoration primarily as a human

response to loss and grief. Offering a wealth of empirical research material, this book will be important for cultural and oral historians, sociologists, researchers in international relations and human rights, and anybody with an interest in the cultural construction of memory in contemporary society. Timothy G. Ashplant is a member of the Research Center for Literature and Cultural History at Liverpool John Moores University. This book constitutes the refereed proceedings of the 12th International Conference on Digital Forensics and Cyber Crime, ICDF2C 2021, held in Singapore in December 2021. Due to COVID-19 pandemic the conference was held virtually. The 22 reviewed full papers were selected from 52 submissions and present digital forensic technologies and techniques for a variety of applications in criminal investigations, incident response and information security. The focus of ICDS2C 2021 was on various applications and digital evidence and forensics beyond traditional cybercrime investigations and litigation.

This book aims to address the importance of natural enemies and functional diversity for biological control in Neotropical agroecosystems. Several aspects related to the conservation of natural enemies, such as vegetation design and climate change, are discussed in Part 1 and the bioecology of several insects groups used in biological control in Latin America is presented in Part 2. Part 3 is devoted to mass production of natural enemies while Part 4 describes how these insects have been used to control of pests in major crops, forests, pasture, weeds and plant diseases. Lastly, Part 5 reports Latin-American experiences of integration of biological in pest management programs.

The 2015 law granting Spanish nationality to the descendants of Jews expelled in 1492 is the latest example of a widespread phenomenon in contemporary Spain, the "re-discovery" of its Jewish heritage. In *The Memory Work of Jewish Spain*, Daniela Flesler and Adrián Pérez Melgosa examine the implications of reclaiming this memory through the analysis of a comprehensive range of

emerging cultural practices, political initiatives and institutions in the context of the long history of Spain's ambivalence towards its Jewish past. Through oral interviews, analyses of museums, newly reconfigured "Jewish quarters," excavated Jewish sites, popular festivals, tourist brochures, literature and art, *The Memory Work of Jewish Spain* explores what happens when these initiatives are implemented at the local level in cities and towns throughout Spain, and how they affect Spain's present.

Formato del archivo: PDF The present volume collects the updated versions of several contributions already published elsewhere and some new chapters on the history of education in Spain and Germany which have been brought together in this form for the benefit of those attending English-language classes on the topic aimed at international as well as Spanish

students. The individual articles function as case studies of different fields in the history of education. They are characterised not only by their difference in focus, but also in the methods and sources they include, providing an insight into the breadth and variety of the field. It is particularly noteworthy that the comparative orientation of several articles moves beyond a national perspective of history, demonstrating concrete examples of the transnational interconnectedness of producing and circulating educational knowledge.

Memorials are proliferating throughout the globe. States recognize the political value of memorials: memorials can convey national unity, a sense of overcoming violent legacies, a commitment to political stability or the strengthening of democracy. Memorials represent fitful

negotiations between states and societies symbolically to right wrongs, to recognize loss, to assert distinct historical narratives that are not dominant. This book explores relationships among art, representation and politics through memorials to violent pasts in Spain and Latin America. Drawing from curators, art historians, psychologists, political theorists, holocaust studies scholars, as well as the voices of artists, activists, and families of murdered and disappeared loved ones, *Politics and the Art of Commemoration* uses memorials as conceptual lenses into deep politics of conflict and as suggestive arenas for imagining democratic praxis. Tracing deep histories of political struggle and suggesting that today's commemorative practices are innovating powerful forms of collective political action, this work will be of great interest to students and scholars of international relations, Latin American studies and memory studies.
