 Of Fluid Mechanics Sw Yuan - ROGER
 MONTGOMERYThe first step in Fluid
 Mechanics was certainly carried out by
 Archimedes ! (- 287, - 212) who was a
 mathematician and a physicist in
 Antiquity. He formulated a now well-known
 theorem which says that a body immersed
 in a fluid supports an upward push equal

to the weight of the displaced fluid.The

 YuanDimensionless numbers in fluid
 mechanics are a set of dimensionless
 quantities that have an important role in
 analyzing the behavior of fluids.Common
 examples include the Reynolds or the
 Mach numbers, which describe as ratios
 the relative magnitude of fluid and
 physical system characteristics, such as
 density, viscosity, speed of sound, flow
 speed, etc.Dimensionless numbers in fluid
