This book is designed to address anyone who is just above the “raw beginner” level. This book will explain some basic process such as entering commands and execute simple code instructions using a Command-Line- Interface (CLI) instead of using high resource-intensive Graphical User Interfaces (GUI). You may review some basic definitions and concepts, or skip directly to the working Formulas, as you'll prefer. It is a book intended for both the beginner and the expert developer, but suitable also for creatives, social media managers, webmasters, writers, musicians, photographers, video-makers, audio engineers, archival and restoration technicians, radio/tv broadcasters, streamers, You-Tubers, etc. and anyone who needs to automate and speed-up the manipulation, editing and conversion of many different audio/video/pictures formats. What's the difference between this book and other basic books about FFMPEG? FFMPEG has a pretty steep learning curve and the books currently around lacks on the very basics terms and syntax explanations of the commands. This book contains lots of explanations about the basic BASH terms, which unleash the functionalities and the true power of FFMPEG. Also: this book will cover other great tools for content creation, editing and automation, such as ImageMagick, Bento4, Ghostscript along with scripting automation formulas and examples. Why a book on the basics of FFMPEG? Because FFMPEG can be powerful and can

be very easy for anyone, once it's core technology and syntax are understood. If you would like to know more about a ultra-fast way that gives you for free the same results that you achieve with expensive subscription-based softwares for content creation/video editing/image or audio manipulation/conversion, then this is the right book for you.

The ultimate must-read handbook for the modern mother: a practical, and positive tool to help free women from the debilitating notion of being the "perfect mom," filled with funny and all too relatable true-life stories and realistic suggestions to stop the burnout cycle, and protect our kids from the damage burnout can cause. Moms, do you feel tired? Overwhelmed? Have you continually put off the things you need to do for you? Do you feel like it's all worth it because your kids are happy? Are you "over" being a mother? If you answered yes to these questions, you're not alone. Parents today want to create the ideal childhood for their children. Women strive to be the picture-perfect Pinterest mother that looks amazing, hosts the best birthday parties in town, posts the most "liked" photos, and serves delicious, nutritious home-cooked meals in her neat, organized home after ferrying the kids to school and a host of extracurricular activities on time. This drive, while noble, can also be destructive, causing stress and anxiety that leads to "mommy burnout." Psychologist and family counselor Dr. Sheryl Ziegler is well-versed in the stress that moms face, and the burden of guilt they carry because they often feel like they aren't doing enough for their kids' happiness. A mother of three herself, Dr. Z—as she's affectionately known by her many patients—recognizes and understands that modern moms are all too often plagued by exhaustion, failure, isolation, self-doubt, and a general lack of self-love, and their families are also feeling the effects, too. Over the last nineteen years working with families and children, Dr. Z has devised a prescriptive program for addressing "mommy burnout"—teaching moms that they can learn to re-energize

themselves and still feel good about their families and their lives. In this warm and empathetic guide, she examines this modern epidemic among mothers who put their children's happiness above their own, and offers empowering, proven solutions for alleviating this condition, saving marriages and keeping kids happy in the process.

The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The *Global Smartphone* presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland - all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.
