Within the European context, linguistic diversity can be studied at the level of both official state languages and non-national languages. This comprehensive overview offers insightful crossnational and crosscontinental perspectives on non-national languages in terms of both regional and immigrant languages. The book focuses on mapping linguistic diversity in both the private and public domain. Methodological issues and empirical outcomes are explored for a variety of European and non-European countries and languages. The book consists of four parts. Part 1 provides an introduction to the subject, as well as an overview and discussion of migration statistics and language use. Part 2 deals with the mapping of regional languages in Europe, exemplified by case studies on Welsh, Basque, and Frisian. Part 3 focuses on immigrant languages in Europe and includes case studies from both national (Switzerland, Italy, France) and crossnational (Multilingual Cities Project) perspectives. Part 4 turns to mapping linguistic diversity abroad with case studies on Australia, South Africa, Turkey, and Japan.

Approaches to Language Testing FrancoAngeli

While research into aspects of standardised language tests is growing, the area of classroom-based language assessment (CBLA) is still not well-defined and relatively under-researched. Studies investigating CBLA practices within the ESL/EFL school contexts as well as the tertiary level have

stressed the need for further research as the picture is not yet complete. The volume aims to address this challenge by presenting a wide scope of research interests that discuss theoretical and practical underpinnings of CBLA. It is also meant to promote the notion of CBLA for a wide membership of the language teaching and testing community covering topics that consider both realities and prospects of CBLA in the assessment world.

The relationship between Western democracies and Islam, rarely entirely comfortable, has in recent years become increasingly tense. A growing immigrant population and worries about cultural and political assimilation—exacerbated by terrorist attacks in the United States, Europe, and around the world—have provoked reams of commentary from all parts of the political spectrum, a frustrating majority of it hyperbolic or even hysterical. In *The Fear of Barbarians*, the celebrated intellectual Tzvetan Todorov offers a corrective: a reasoned and often highly personal analysis of the problem, rooted in Enlightenment values yet open to the claims of cultural difference. Drawing on history, anthropology, and politics, and bringing to bear examples ranging from the murder of Theo van Gogh to the French ban on headscarves, Todorov argues that the West must overcome its fear of Islam if it is to avoid betraying the values it claims to protect. True freedom, Todorov explains, requires us to strike a delicate balance between protecting and imposing cultural values, acknowledging the primacy of the law, and yet strenuously protecting minority views that do not interfere with its aims. Adding force to Todorov's arguments is his own experience as a native of communist Bulgaria: his admiration of French civic identity—and Western freedom—is vigorous but non-nativist, an inclusive vision whose very flexibility is its core strength. The record of a penetrating mind grappling with a complicated, multifaceted problem, *The Fear of Barbarians* is a powerful, important book—a call, not to arms, but to thought.

Sicily has been at the crossroads of the Mediterranean for thousands of years. As close to Africa as it is to many parts of Europe, and directly astride major sea routes, it has been a convenient landfall for both merchants and warriors. Its invasion in the year 827 A.D. by Muslim armies from North Africa set the stage for a fascinating interplay of cultures. As these Arab and Berber soldiers slowly conquered Sicily and extended their reach to parts of the Italian mainland, they came in contact with, and for some two hundred years ruled over, Greek-speaking Orthodox Christians loyal to the Byzantine emperor in Constantinople, Latin-speaking Christians obedient to the pope in Rome, and small but significant communities of Jews. As the fortunes of attackers and defenders ebbed and flowed, fortresses and castles surrendered, cities and towns changed hands repeatedly, and local populations found themselves subject to first one and then another ruler, sometimes in quick succession. Despite the often brutal violence, victors and vanquished managed an uneasy accommodation in which different languages, multiple religions, and several ethnicities could coexist. Adding themselves to this mix, groups of Norman mercenaries arrived in southern Italy early in the eleventh century. They quickly found employment with one or another of the local Latin-speaking Longobard princes who were in constant conflict with each other and who also had to contend with a Greek-speaking Byzantine empire that was trying to expand its territory on the Italian mainland. The descendants of Viking raiders who had settled in the French province of Normandy, and kin to those who invaded England under William the Conqueror in the year 1066, these Normans, or Norsemen, were fierce fighters and soon began to accumulate power and influence in the Italian south. Muslims remained in control of Sicily, but the Normans saw their prospects improve with the arrival of Robert de Hauteville, a military leader of great energy and ability known to history as Robert Guiscard, or Robert the shrewd one. With his younger brother Roger, later known as the Great Count, he eventually conquered Sicily and large parts of southern Italy. Roger's descendants Roger II, William I, and William II ruled in Sicily as kings until the late twelfth century. Very sympathetic to Muslim culture, in their dress and in their tastes they were more like Oriental potentates than European monarchs. Served by a civil bureaucracy largely staffed by Muslims that drafted documents in Latin, Greek, and Arabic, these Normans presided over a monumental building program that produced some of the most breathtakingly beautiful mosaics and building interiors in the world. Incorporating both Christian and Muslim motifs, these emphasized their divine right to rule as well as the luxury and magnificence of their court, in a style and manner meant to echo imperial Byzantium and the splendor of the East.

Migration represents one of the key issues in both Italian and European politics, and it has triggered EU-wide debates and negotiations, alongside alarmist and often sensationalist news reporting on the activities of government, party and social movement actors. *The Politics of Migration in Italy* explores what happens when previously undiscussed issues become central to political agendas and are publicly debated in the mass media. Examining how political actors engage with the issue of migration in electoral campaigning, this book highlights how complex policy issues are addressed selectively by political entrepreneurs and how the responses of political actors are influenced by strategic incentives and ongoing events. This book studies the dynamics of the politicization of the immigration issue across three local contexts in Italy – Prato, Milan and Rome – which differ systematically with respect to crucial economic, cultural and security dimensions of immigration. Offering an innovative exploration of party competition and migration in Italy, as well as providing the conceptual and analytical tools to understand how these dynamics play out beyond the Italian case, this book is essential reading for students, scholars and policymakers working in the areas of migration studies, agenda-setting and European politics more generally.

Joel, aka 'The Rink' (because his bald patch is shiny enough to skate on), the unpopular owner of the only bar in town has been murdered. There are so many suspects, it's not so much a question of who didkill him as who didn't. There's Magalie, the temperamental teenager obsessed with Paris Hilton; her troublemaker boyfriend, Tani; Tani's mother, Madame Levi; her unemployed, daytime-TV addicted husband; Yeznig, their younger son, who has learning difficulties but perfect memory recall; and newcomers Ali and Nadia, the Muslim twins struggling to fit in. As the tension mounts and we're still none the wiser, the ending is as tragic as it is unexpected.

Language policies are increasingly acknowledged as being a necessary component of many decisions taken in the areas of the labor market, education, minority languages, mobility, and social inclusion of migrants. They can affect the democratic control of political organizations, and they can either entrench or reduce inequalities. These are the central topics of this book. Economists, philosophers, political scientists, and sociolinguists discuss - from an interdisciplinary perspective - the distributive socio-economic effects of language policies, their impact on justice and inequality at the national or international level, as well as the connection between language choices and an inclusive access to public services. The range of social and economic issues raised by linguistic diversity in contemporary societies is large, and this requires new approaches to tackle them. This book provides new input to design better, more efficient, and fair language policies in order to manage linguistic diversity in different areas. Topics covered include: theoretical models of linguistic justice and linguistic disadvantage; the assessment of the socio-economic consequences of language policies; the evaluation of the costs, benefits, and degree of inclusion of language planning measures; the politics of migrants' linguistic integration; as well as multilingualism and economic activities. These topics are discussed in different contexts, including the areas inhabited by linguistic minorities, cities receiving migrants, and supranational organizations.
