"The Disappearance: A Novella and Stories" contains three masterful gems. The novella, *Morirse esta en hebreo*, is a thought-provoking meditation on continuity and tradition among Mexican Jews; *Xerox Man* is an intriguing story about a book thief with a bizarre theological obsession; and the title story, *The Disappearance*, is the resonant tale of a Belgian actor who kidnaps himself in an attempt to respond to neo-Nazi groups."

A New York Times Bestseller From the author of the New York Times bestseller *All the Bright Places* comes a heart-wrenching story about what it means to see someone—and love someone—for who they truly are. Everyone thinks they know Libby Strout, the girl once dubbed “America’s Fattest Teen.” But no one’s taken the time to look past her weight to get to know who she really is. Following her mom’s death, she’s been picking up the pieces in the privacy of her home, dealing with her heartbroken father and her own grief. Now, Libby’s ready: for high school, for new friends, for love, and for EVERY POSSIBILITY LIFE HAS TO OFFER. In that moment, I know the part I want to play here at MVB High. I want to be the girl who can do anything. Everyone thinks they know Jack Masselin, too. Yes, he’s got swagger, but he’s also mastered the impossible art of giving people what they want, of fitting in. What no one knows is that Jack has a newly acquired secret: he can’t recognize faces. Even his own brothers are strangers to him. He’s the guy who can re-engineer and rebuild anything in new and bad-ass ways, but he can’t understand what’s going on with the inner workings of his brain. So he tells himself to play it cool: Be charming. Be hilarious. Don’t get too close to anyone. Until he meets Libby. When the two get tangled up in a cruel high school game—which lands them in group counseling and community service—Libby and Jack are both pissed, and then surprised. Because the more time they spend together, the less alone they feel. . . . Because sometimes when you meet someone, it changes the world, theirs and yours. Jennifer Niven delivers another poignant, exhilarating love story about finding that person who sees you for who you are—and seeing them right back. "Niven is adept at creating characters. . . . [Libby's] courage and body-positivity make for a joyful reading experience." --The New York Times “*Holding Up the Universe* . . . taps into the universal need to be understood. To be wanted. And that’s what makes it

such a remarkable read.” —TeenVogue.com, “Why New Book *Holding Up the Universe* Is the Next *The Fault in Our Stars*” “Want a love story that will give you all the feels? . . . You’ll seriously melt!”—Seventeen Magazine

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?\* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. *THE DISAPPEARING SPOON* masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. \*Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

A curious tale spun from the life of mysterious hermit Joseph Plummer, who lived in the woods of central New Hampshire in the late 1700s. Two centuries later an unsuspecting man purchased the mythical loner’s land and built a hideaway cabin for himself — only to discover the legend of Joseph lurking deep in the seclusion of the forest. This atmospheric photobook explores our human desire to escape and find peaceful solitude, far from the burdens and apparatus of modern society.

From the vogue for nubile models to the explosion in the juvenile crime rate, this modern classic of social history and media traces the precipitous decline of childhood in America today—and the corresponding threat to the notion of adulthood. Deftly marshaling a vast array of historical and demographic research, Neil Postman, author of *Technopoly*, suggests that childhood is a relatively

recent invention, which came into being as the new medium of print imposed divisions between children and adults. But now these divisions are eroding under the barrage of television, which turns the adult secrets of sex and violence into popular entertainment and pitches both news and advertising at the intellectual level of ten-year-olds. Informative, alarming, and aphoristic, *The Disappearance of Childhood* is a triumph of history and prophecy.

A study of what would happen to Earth if the human presence was removed examines our legacy for the planet, from the objects that would vanish without human intervention to those that would become long-lasting remnants of humankind.

At the Edge of the Universe GENERAL PRESS

The second book in the Web Shifter's Library series returns to the adventures of Esen, a shapeshifting alien who must navigate the perils of a hostile universe. Relationships get complicated when you don't know who—or what—you really are. Esen must find a way to rescue a hapless group of chimeras, beings who are a new and unique blend of species she knows, when she can't become one herself. When Evan Gooseberry tries to help, he is shattered to learn he himself isn't entirely Human and begins to suspect his new friend Esen isn't what she seems. Complicating matters, a mysterious contagion has killed the crew of the ship that brought the chimeras—and Evan—to Botharis. Everyone's been quarantined inside the All Species' Library of Linguistics and Culture, including over a hundred disgruntled alien scholars. The risks climb as Skalet and Lionel continue their quest to solve the disappearance of Paul's mother's ship, the Sidereal Pathfinder, only to find themselves caught in a tangle of loyalties as Skalet is betrayed by her own Kraal affiliates, who infiltrate the Library. All of which would be quite enough for one Web-being's day, but Paul Ragem hopes to rekindle the romance of his first love. A shame Esen hasn't told him who's hiding in their greenhouse.

What would you do if you were sitting quietly in your living room when a mysterious couple appeared from out of nowhere—and then told you they were “ascended masters” who had come to reveal some shocking secrets of existence and teach you the miraculous powers of advanced forgiveness? When two such teachers appeared before Gary Renard in 1992, he chose to listen to them (and ask a lot of impertinent questions). The result is this startling book: an extraordinary record of 17 mind-bending conversations that took place over nearly a decade, reorienting the author's life and giving the world an uncompromising introduction to a spiritual teaching destined to change human history.

Greene takes us on a journey from the big bang to the end of time, exploring how lasting structures formed, how life and mind emerged, and how we grapple with our existence through narrative, myth, religion, creative

expression, science, the quest for truth, and a deep longing for the eternal. From particles to planets, consciousness to creativity, matter to meaning—Brian Greene allows us all to grasp and appreciate our fleeting but utterly exquisite moment in the cosmos.

What determines whether complex life will arise on a planet, or even any life at all? Questions such as these are investigated in this groundbreaking book. In doing so, the authors synthesize information from astronomy, biology, and paleontology, and apply it to what we know about the rise of life on Earth and to what could possibly happen elsewhere in the universe. Everyone who has been thrilled by the recent discoveries of extrasolar planets and the indications of life on Mars and the Jovian moon Europa will be fascinated by Rare Earth, and its implications for those who look to the heavens for companionship.

This is a book about the philosophy of time, and in particular the philosophy of the great logician Kurt Godel (1906-1978). It evaluates Godel's attempt to show that Einstein has not so much explained time as explained it away. Unlike recent more technical studies, it focuses on the reality of time. The book explores Godel's conception of time, existence, and truth with special reference to Plato, Aristotle, Kant, and Frege. In the light of this investigation an attempt is made to shed light on such issues as the precise sense in which Godel believed in the possibility of time travel, the relationship of the reality of time to the objectivity of temporal becoming, and the significance of time for human existence. Spoken Miracles is an anecdotal account of Martha Lucia Espinosa's 30-year-long search for answers from God, as well as the result of a request that has been made by thousands of readers of author Gary R. Renard's *The Disappearance of the Universe*, lovingly called “D.U.” Near the end of D.U., one of Gary's teachers mentions that there were 365 quotations from the modern spiritual guide *A Course in Miracles* (ACIM) used in the D.U. book. We are told also that if these quotations were read on their own, they could either be used as a thought for the day throughout the year, or they could simply be read like a book, in which case they would constitute a “refresher course” by Jesus, the Voice of *A Course in Miracles*. Many people requested that these quotations be put into book form, but it was a bigger job than most realized. Gary and his teachers had used more than 11,000 words from ACIM during the course of their discussions. Additionally, inspiration guides this book to be written in a way that it can stand on its own, to help introduce people to both D.U. and *A Course in Miracles*, as well as to inspire and entertain a little, so it includes a short story as a way to introduce readers to the basic concepts of these remarkable and miraculous books.

The moving and suspenseful new novel that Ann Patchett calls "smart and thrilling and impossible to put down... the book that every reader longs for." "This summer's undoubtable smash hit... an addictive, heart-palpitating story." —Marie Claire The sun is shining, the sea is blue, the children have disappeared. When Liv and Nora decide to take their husbands and children on a holiday cruise, everyone is thrilled. The adults are lulled by the ship's comfort and ease. The four children—ages six to eleven—love the nonstop buffet and their newfound independence. But when they all go ashore for an adventure in Central America, a series of minor misfortunes and miscalculations leads the families farther from the safety of the ship. One minute the children are there, and the next they're gone. The disintegration of the world the families knew—told from the perspectives of both the adults and the children—is both riveting and revealing. The parents, accustomed to security and control, turn on each other and blame themselves, while the seemingly helpless children discover resources they never knew they possessed. Do Not Become Alarmed is a story about the protective force of innocence and the limits of parental power, and an insightful look at privileged illusions of safety. Celebrated for her spare and moving fiction, Maile Meloy has written a gripping novel about how quickly what we count on can fall away, and the way a crisis shifts our perceptions of what matters most.

What if you knew there was only one problem and one solution to all the problems we face? How is peace possible in a world that seems impossible sometimes? How do we heal ourselves in a world where the silent epidemics of suicide, depression, and cyber-bullying run so rampant? Answers to these questions and other topics such as covid-19, black lives matter, parenting, relationships and even E.T.'s, will be found in this book, all discussed within the context of the non-dualistic teachings of A Course in Miracles, in which forgiveness is a key theme in helping one to awaken from the illusion of separation to the reality that we are one in God or Spirit. There is a way to practice forgiveness and experience true peace regardless of what is happening in your life or in the world, which puts you in an empowering position of cause instead of being at the effect or a victim of circumstances. Understanding forgiveness and knowing how to apply it in your everyday life can truly be a life-saver!

It is the 1970s. After a bloody struggle, Bangladesh is an independent nation. But thousands are pouring into Dhaka from all over the country, looking for food and shelter. Amongst them is Nur

Hussain, an uneducated young man from a remote village, who is only good at mimicking a famous speech of the prime minister's. He turns up at journalist Khaleque Biswas's doorstep, seeking employment. He is initially a burden for Khaleque, but then Khaleque, who has recently lost his job, has the idea of turning Nur into a fake Sheikh Mujib. With the blessings of the political establishment, he starts chasing in on the nationalist fervour of the city's poorest. But even as the money rolls in, the tension between the two men increases and reaches a violent climax when Nur refuses to stick to the script. Intense yet chilling, this brilliant first novel is a meditation on power, greed and the human cost of the politics.

In this fascinating book, Gary Renard and his Ascended Master Teachers, Arten and Pursah, teach you how to integrate advanced spiritual principles into your everyday life. Doing so leads beyond theory to an experience of the Divine and the undoing of the ego. Your progress will be accelerated to such a degree that, with continued practice, you can't help but stop the need to reincarnate . . . once and for all. Like Gary's first book, *The Disappearance of the Universe*, this work elaborates on the teachings of two spiritual classics, *The Gospel of Thomas* and *A Course in Miracles*. By focusing on a unique brand of quantum forgiveness, rather than the old-fashioned kind, and taking the understanding of the importance of thought up to a whole new level, your goal will become nothing less than to break the cycle of birth and death.

### The Disappearance of God John Hunt Publishing

Have you ever contemplated the cause of the universe beyond simply attributing it to God or The Big Bang? If so, in that causal contemplation, have you ever entertained the idea that the universe is but a dream? Which is to say, have you ever considered that the cause of the universe is that you dreamt it up? At first glance, the idea that you dreamt up the universe perhaps seems implausible. However, what if you really took that idea seriously and followed it to its logical conclusion? What would you discover? Well, this book answers that question. Using the unique form of a graphic novel, artist and writer Alexander Marchand takes you on an artistic, humorous, irreverent, and extremely informative romp through the advanced, nondualistic metaphysics of the contemporary spiritual document known as *A Course in Miracles*. In the end, you'll not only have a coherent picture of the true nature of the universe and existence, but you'll also have essential, practical knowledge of what you'll need to do to if you are ready to wake up."
