 Testing and diagnosis of hepatitis B (HBV) and C (HCV) infection is the gateway for access to both prevention and treatment services, and is a crucial component of an effective response to the hepatitis epidemic. Early identification of persons with chronic HBV or HCV infection enables them to receive the necessary

care and treatment to prevent or delay progression of liver disease. Testing also provides an opportunity to link people to interventions to reduce transmission, through counselling on risk behaviors and provision of prevention commodities (such as sterile needles and syringes) and hepatitis B vaccination. These are the first WHO guidelines on testing for chronic HBV and HCV infection and complement published guidance by WHO on the prevention,

care and treatment of chronic hepatitis C and hepatitis B infection. These guidelines outline the public health approach to strengthening and expanding current testing practices for HBV and HCV, and are intended for use across age groups and populations.

Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when

taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and

practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV

examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users.

depth to a previously under-researched area, the publication will be of interest not only to ELT teachers and students, but also to social science researchers in developing and marginalised countries. The book based on selected papers presented at the 2007 Aga Khan University, Centre of English Language seminar in Karachi exemplifies the issues of language and empowerment. The papers deal with complex educational and socio-cultural issues and force

readers to undertake a cultural journey to see them from a different perspective. The collection of papers, whatever one's (TM)s teaching-learning context, will become an essential resource book for all English language teachers, scholars, and researchers interested in learning more about the success stories and problems facing language education in the developing countries, especially Asia today.

Assessing English for Professional Purposes provides a state-of-the-art account of the various kinds of language assessments used to determine people's abilities to function linguistically in the workplace. At a time when professional expertise is

increasingly mobile and diverse, with highly trained professionals migrating across national boundaries to apply their skills in English-speaking settings, this book offers a renewed agenda for inquiry into language assessments for professional purposes (LAPP). Many of these experts work in high-risk environments where communication breakdowns can have serious consequences. This risk has been identified by governments and professional bodies,

who implement language tests for gate-keeping purposes. Through a sociological lens of risk and responsibility, this book: provides a detailed overview of both foundational and recent literature in the field; offers conceptual tools for specific purpose assessment, including a socially oriented theory of construct; develops theory and practice in key areas, such as needs analysis, test development, validation and policy; significantly broadens the scope of the

assessment of English for professional purposes to include a range of assessment practices for both professionals and laypeople in professional settings. Assessing

English for Professional Purposes is key reading for researchers, graduate students and practitioners working in the area of English for Specific Purposes assessment.
