What is the purpose of history today, and how can sporting research help us understand the world around us? In this stimulating book, Nicholas Piercey constructs four new histories of early Dutch football, exploring urban change, club members, the media, and the diaries of Cornelis Johannes Karel van Aalst, a stadium director, to propose practical examples of how history can become an important democratic tool for the 21st century. Using early Dutch football as a field for experimental thinking about the past, the four histories offer new insights into the lives, interests and passions of those connected to the

sport in the 1910s and the cities they lived in. How did the First World War impact on Dutch football? Were new stadia a form of social control? Is the spread of the beautiful game really a good thing? And why was one of the sport's most prominent figures more concerned with potatoes? These stories of early Dutch football suggest how vital sport and history can be in shaping our lives, perceptions and actions, and why we need to challenge the influence they have today.

The evolution and manipulation of language from the celebrated author of *After Babel*. "A keenly discriminating literary mind at work on what it loves" (*The New York Times Book Review*). *Language and Silence* is a book about language—and politics, meaning, silence, and the future of literature. Originally published between 1958 and 1966, the essays that make up this collection ponder whether we have passed out of an era of verbal primacy and into one of post-linguistic forms—or partial silence. Steiner explores the idea of the abandonment of

contemporary literary criticism, from the classics to the works of William Shakespeare, Lawrence Durrell, Thomas Mann, Leon Trotsky, and more.

For undergraduate and graduate courses in business. Understanding The Vast And Expanding Field of E-Commerce
Laudon's E-Commerce 2016: Business, Technology, Society emphasizes three driving forces behind the expanding field of e-commerce: technology change, business development, and social issues. A conceptual framework uses the templates of many modern-day companies to further demonstrate the differences and complexities in e-commerce today. An in-depth investigation of companies such as Uber, Pinterest, and Apple kick-off the course while preparing students for real-life scenarios. In the Twelfth Edition, Laudon and Traver add new or update existing case studies to match developments in the e-commerce field as they exist in today's tech world. They built in additional video cases for

each chapter, making the material even more accessible to students as they prepare for their future roles in business.

Although rarely explored in academic literature, most inhabitants and visitors interact with an urban landscape on a day-to-day basis is on the street level. Storefronts, first floor apartments, and sidewalks are the most immediate and common experience of a city. These "plinths" are the ground floors that negotiate between inside and outside, the public and private spheres. The City at Eye Level qualitatively evaluates plinths by exploring specific examples from all over the world. Over twenty-five experts investigate the design, land use, and road and foot traffic in rigorously researched essays, case studies, and interviews. These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design, but also the concerns of urban communities. The editors have put together a comprehensive guide for anyone concerned with

improving or building plinths, including planners, building owners, property and shop managers, designers, and architects.

Football hooliganism periodically generates widespread political and public anxiety. In spite of the efforts made and resources invested over the past decades, football hooliganism is still perceived by politicians, policymakers and media as a disturbing social problem. This highly readable book provides the first systematic and empirically grounded comparison of football hooliganism in different national and local contexts. Focused around the six Western European football clubs on which the author did his research, the book shows how different clubs experience and understand football hooliganism in different ways. The development and effects of anti-hooligan policies are also assessed. The emphasis throughout is on the importance of context, social interaction and collective identity for understanding football hooliganism. This book will be essential reading

for anyone interested in football culture, hooliganism and collective violence.

"This book concerns a cohort of ultra-orthodox Jews based in the greater New York area who, while retaining membership and close familial and other ties with their strictly observant communities, seek out secular knowledge about the world on the down low (so to speak), both online and via in-person encounters. Ayala Fader conducted her ethnographic research in these rarified social circles for years, developing relationships of trust with the mostly young married men and women who have taken to clandestine methods to find alternative social spaces in which to question what it means to be ethical and what a life of self-fulfillment looks like. Fader's book reveals

the stresses and strains that such "double-lifers" experience, including the difficulty these life choices inject into relationships with wives, husbands, and one's children. Not all of these "double-lifers" become atheists. Fader's interlocutors can be placed on a broad spectrum ranging from religiously observant but open-minded at one end to atheism on the other. The rabbinical leadership of these ultra-orthodox communities are well aware of this phenomenon and of how unfiltered internet access makes such alternative forms of seeking an ever-present temptation. (Some ultra-orthodox rabbis have been sounding the alarm for years, claiming that the internet represents more of a threat to community survival today than the Holocaust did in the last century.) Fader's book examines the institutional responses of ultra-orthodox communities to the double-lifers. These include what is typically referred to as a Torah-based type of "religious therapy" conducted by trained members of these communities who as therapists and "life coaches" blend elements of modern psychiatry with

ultra-orthodoxy and "treat" troubling, potentially life-altering doubt and skepticism as symptoms of underlying emotional pathology"--

Digital Passages: Migrant Youth 2.0 Random House Emblem books, which feature combinations of images and text with a moral lesson for the reader, grew out of the Renaissance and were most popular in the Netherlands. Enigmatic, erudite, and often pious, Dutch love emblems synthesized the traditions of European visual and literary arts--and in turn influenced architecture, painting, poetry, and interior design for centuries to come. Learned Love offers an introduction to this enthralling genre and celebrates the completion of Emblem Project Utrecht, an undertaking that digitized twenty-five of the most representative emblem books. This unprecedented volume explores the delicate network of visual motifs and textual mottos that characterize Dutch love emblems. Learned Love demonstrates how emblem books form a web of closely interrelated references, which the contributors liken to the Internet, and traces the cutting-edge digitization project from inception to finish. This book will interest anyone intrigued by the fruitful gray areas

between image and text, scholarship and technology. Why is the number seven lucky--even holy--in almost every culture? Why do we speak of the four corners of the earth? Why do cats have nine lives (except in Iran, where they have seven)? From literature to folklore to private superstitions, numbers play a conspicuous role in our daily lives. But in this fascinating book, Annemarie Schimmel shows that numbers have been filled with mystery

and meaning since the earliest times, and across every society. In The Mystery of Numbers Annemarie Schimmel conducts an illuminating tour of the mysteries attributed to numbers over the centuries. She begins with an informative and often surprising introduction to the origins of number systems: pre-Roman Europeans, for example, may have had one based on twenty, not ten (as suggested by the English word "score" and the French word for 80, *quatrevingt* --four times twenty), while the Mayans had a system more sophisticated than our own. Schimmel also reveals how our fascination with numbers has led to a rich cross-fertilization of mathematical knowledge: "Arabic" numerals, for instance, were picked up by Europe from the Arabs, who had earlier adopted them from Indian sources ("Algorithm" and "algebra" are corruptions of the Arabic author and title names of a mathematical text prized in medieval Europe). But the heart of the book is an engrossing guide to the symbolism of numbers. Number symbolism, she shows, has deep roots in

Western culture, from the philosophy of the Pythagoreans and Platonists, to the religious mysticism of the Cabala and the Islamic Brethren of Purity, to Kepler's belief that the laws of planetary motion should be mathematically elegant, to the unlucky thirteen. After exploring the sources of number symbolism, Schimmel examines individual numbers ranging from one to ten thousand, discussing the meanings they have had for Judaic, Christian, and Islamic traditions, with examples from Indian, Chinese, and Native American cultures as well. Two, for instance, has widely been seen as a number of contradiction and polarity, a number of discord and antithesis. And six, according to ancient and neo-platonic thinking, is the most perfect number because it is both the sum and the product of its parts ($1+2+3=6$ and $1 \times 2 \times 3=6$). Using examples ranging from the Bible to the Mayans to Shakespeare, she shows how numbers have been considered feminine and masculine, holy and evil, lucky and unlucky. A highly respected scholar of Islamic culture, Annemarie Schimmel

draws on her vast knowledge to paint a rich, cross-cultural portrait of the many meanings of numbers. Engaging and accessible, her account uncovers the roots of a phenomenon we all feel every Friday the thirteenth.

The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the "blazing network of focused confluences" from which Mike Kelley's styles are generated is on display in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection concentrates on Kelley's own work, ranging from texts in "voices" that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections.

"Statements" consists of twenty pieces produced between 1984 and 2002 (most of which were written to accompany exhibitions), including "Ajax," which draws on

Homer, Colgate-Palmolive, and Longinus to present its eponymous hero; "Some Aesthetic High Points," an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of "creative writings" that use mass cultural tropes in concert with high art mannerisms—approximating in prose the visual styles that characterize Kelley's artwork. "Video Statements and Proposals" are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. "Image-Texts" offers writings that accompany or are part of artworks and installations. This section includes "A Stopgap Measure," Kelley's zestful millennial essay in social satire, and "Meet John Doe," a collage of appropriated texts. "Architecture" features an discussion of Kelley's Educational Complex (1995) and an interview in which he reflects on the role of architecture in his work. Finally, "Ufology" considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios.

For years theater director Bryan Doerries has been producing ancient Greek tragedies for a wide range of at-risk people in society. His is the personal and deeply passionate story of a life devoted to reclaiming the timeless power of an ancient artistic tradition to comfort the afflicted. Doerries leads an innovative public health project—Theater of War—that produces ancient dramas for current and returned soldiers, people in recovery from alcohol and substance abuse, tornado and hurricane survivors, and more. Tracing a path that links the personal to the artistic to the social and back again, Doerries shows us how suffering and healing are part of a timeless process in which dialogue and empathy are inextricably linked. The originality and generosity of Doerries's work is startling, and *The Theater of War*—wholly unsentimental, but intensely felt and emotionally engaging—is a humane, knowledgeable, and accessible book that will both inspire and enlighten.

When most people think about the Netherlands, images of tulips and peaceful pot smoking residents spring to mind. Bring up soccer, and most will think of Johan Cruyff, the Dutch player thought to rival Pele in preternatural skill, and Ajax, one of the most influential soccer clubs in the world whose academy system for young athletes has been replicated around the globe (and most notably by Barcelona and the 2010 world champions, Spain). But as international bestselling author Simon Kuper writes in *Ajax, The Dutch, The War: Soccer in Europe During the Second World War*, the story of soccer in Holland cannot be understood without investigating what really occurred in this country during WWII. For decades, the Dutch have enjoyed the reputation of having a "good war." The myth is even resonant in Israel where Ajax is celebrated. The fact is, the Jews suffered shocking persecution at the hands of Dutch collaborators.

Holland had the second largest Nazi movement in Europe outside Germany, and in no other country except Poland was so high a percentage of Jews deported. Kuper challenges Holland's historical amnesia and uses soccer -- particularly the experience of Ajax, a club long supported by Amsterdam's Jews -- as a window on wartime Holland and Europe. Through interviews with Resistance fighters, survivors, wartime soccer players and more, Kuper uncovers this history that has been ignored, and also finds out why the Holocaust had a profound effect on soccer in the country. Ajax produced Cruyff but was also built by members of the Dutch resistance and Holocaust survivors. It became a surrogate family for many who survived the war and its method for producing unparalleled talent became the envy of clubs around the world. In this passionate, haunting and moving work of forensic reporting, Kuper tells the breathtaking story of how Dutch Jews survived the unspeakable and came to play a strong role in the rise of the most exciting and revolutionary style of soccer -- "Total Football" - the world had ever seen.

Craig Bromfield was just 13 years old when Brian Clough, on a whim, took him and his older brother Aaron in. They came from Southwick, a depressed area of Sunderland, where they lived with their abusive stepfather, and from where they longed to escape. After initially meeting Clough while out begging for money, Clough later invited the brothers to stay at his house. From there a relationship formed which would see Craig living with the Cloughs for nine years, where he was a first-hand witness to the many aspects of Clough's character - his gruffness, his humour, his big-heartedness. This is a beautiful, inspirational story, which has never before been told, about Clough's gentleness and capacity for generosity. Discover a very different side to this iconic man, one away from the cameras and the football, which shows him for the person he really was.

The first Muslim woman to receive the Nobel Peace Prize, Shirin Ebadi has inspired millions around the globe through her work as a human rights lawyer defending women and children against a brutal regime in Iran. Now Ebadi tells her story of courage and defiance in the face of a government out to destroy her, her family, and her mission: to bring justice to the people and the country she loves. For years the Islamic Republic tried to intimidate Ebadi, but after Mahmoud Ahmadinejad rose to power in 2005, the censorship and persecution intensified. The government wiretapped Ebadi's phones, bugged her law firm, sent spies to follow her, harassed her colleagues, detained her daughter, and arrested her sister on trumped-up charges. It shut down her lectures, fired up mobs to attack her home, seized her offices, and nailed a death threat to her front door. Despite finding herself living under circumstances reminiscent of a spy novel, nothing could keep Ebadi from speaking out and standing up for human dignity. But it was not until she received a

phone call from her distraught husband—and he made a shocking confession that would all but destroy her family—that she realized what the intelligence apparatus was capable of to silence its critics. The Iranian government would end up taking everything from Shirin Ebadi—her marriage, friends, and colleagues, her home, her legal career, even her Nobel Prize—but the one thing it could never steal was her spirit to fight for justice and a better future. This is the amazing, at times harrowing, simply astonishing story of a woman who would never give up, no matter the risks. Just as her words and deeds have inspired a nation, *Until We Are Free* will inspire you to find the courage to stand up for your beliefs. Praise for *Until We Are Free* “Ebadi recounts the cycle of sinister assaults she faced after she won the Nobel Prize in 2003. Her new memoir, written as a novel-like narrative, captures the precariousness of her situation and her determination to ‘stand firm.’”—The Washington Post “Powerful . . . Although [Ebadi’s] memoir underscores that

a slow change will have to come from within Iran, it is also proof of the stunning effects of her nonviolent struggle on behalf of those who bravely, and at a very high cost, keep pushing for the most basic rights.”—The New York Times Book Review “Shirin Ebadi is quite simply the most vital voice for freedom and human rights in Iran.”—Reza Aslan, author of *No god but God and Zealot* “Shirin Ebadi writes of exile hauntingly and speaks of Iran, her homeland, as the poets do. Ebadi is unafraid of addressing the personal as well as the political and does both fiercely, with introspection and fire.”—Fatima Bhutto, author of *The Shadow of the Crescent Moon* “I would encourage all to read Dr. Shirin Ebadi’s memoir and to understand how her struggle for human rights continued after winning the Nobel Peace Prize. It is also fascinating to see how she has been affected positively and negatively by her Nobel Prize. This is a must read for all.”—Desmond Tutu “A revealing portrait of the state of political oppression in Iran . . . [Ebadi] is an inspiring

figure, and her suspenseful, evocative story is unforgettable.”—*Publisher’s Weekly* (starred review) “Ebadi’s courage and strength of character are evident throughout this engrossing text.”—Kirkus Reviews

This study aims to counter right-wing discourses of belonging. It discusses key theoretical concepts for the study of home, focusing in particular on Marxist, feminist, postcolonial, and psychoanalytic contributions. The book also maintains that postmodern celebrations of nomadism and exile tend to be incapable of providing an alternative to conservative, xenophobic appropriations of home. In detailed readings of one film and six novels, a view is developed according to which home, as a spatio-temporal imaginary, is rooted in our species being, and as such constitutes the inevitable starting point for any progressive politics. *Sonnets* No Starch Press This book explores how since colonial times South Africa has created its own vernacular classicism, both in creative media and everyday life.
