 From the author of the "hugely entertaining" (Publishers Weekly) *The Pig That Wants to Be Eaten*, lessons in debunking the faulty arguments we hear every day This latest book from the pop philosophy author of *The Pig That Wants to Be Eaten* tackles an endlessly fascinating area of popular debate—the faulty argument. Julian Baggini provides a rapid-fire selection of short, stimulating, and entertaining quotes from a wide range of famous people in politics, the media, and entertainment, including Donald Rumsfeld, Emma Thompson, Tony Blair, Bill Clinton, and Chris Martin. Each entry takes as its starting point an example of highly questionable—though oddly

persuasive—reasoning from a broad variety of subjects. As Baggini teases out the logic in the illogical, armchair philosophers and aficionados of the absurd will find themselves nodding their heads as they laugh out loud. *The Duck That Won the Lottery* is perfect fodder for any cocktail party and pure pleasure for anyone who loves a good brain twister.

The New York Times bestselling true story of an all-American girl and a boy from Zimbabwe -- and the letter that changed both of their lives forever. It started as an assignment. Everyone in Caitlin's class wrote to an unknown student somewhere in a distant place. Martin was lucky to even receive a pen-pal letter. There were only ten letters, and fifty kids in his class. But he was the top student, so he got the first one. That letter was the beginning of a correspondence that spanned six years and changed two lives. In this compelling dual memoir, Caitlin and Martin recount how they became best friends--and better people--through their long-distance exchange. Their story will

inspire you to look beyond your own life and wonder about the world at large and your place in it.

Eco facts come to light as a plastic duck narrates this beautifully illustrated true story of thousands of bath toys that were lost at sea and swept to the four corners of the Pacific. If a shipping container filled with 28,000 plastic ducks spilled into the Pacific Ocean, where would all those ducks go? Inspired by a real incident, this captivating and innovative look at the pollution crisis in our oceans follows one of the ducks as it is washed away on ocean currents, encountering plastic-endangered whales and sea turtles and passing through the giant floating island of marine debris known as the Great Pacific Garbage Patch. From the author-illustrator of the acclaimed *Curiosity: The Story of a Mars Rover* comes a highly accessible and graphically stylish picture book with an ultimately hopeful message about environmental issues and the state of our oceans. An end map documents the widely scattered journey of the real-life plastic ducks, showing where they have been found, as well as facts about the ways plastic is affecting various parts of the world.

Using his own journey of discovery as the starting point, Kimball presents the 'other side of truth' - the world not as we have been told it is, but as we are being encouraged to imagine that it could become.
