The 5 Gears John Wiley & Sons  
 Direct injection spark-ignition engines are becoming increasingly important, and their potential is still to be fully exploited. Increased power and torque coupled with further reductions in fuel consumption and emissions will be the clear trend for future developments. From today's perspective, the key technologies driving this development will be new fuel injection and combustion processes. The book presents the latest developments, illustrates and evaluates engine concepts such as downsizing and describes the requirements that have to be met by materials and operating

fluids. The outlook at the end of the book discusses whether future spark-ignition engines will achieve the same level as diesel engines.

**Electric Field Analysis** CRC Press

This book presents the use of a microprocessor-based digital system in our daily life. Its bottom-up approach ensures that all the basic building blocks are covered before the development of a real-life system. The ultimate goal of the book is to equip students with all the fundamental building blocks as well as their integration, allowing them to implement the applications they have dreamed up with minimum effort.

Politics, Ideology and Football Fandom Harvard University Press

How do you teach tolerance, self-awareness, and responsibility? How can you help children deal with

fear, mistrust, or aggression? Play a game with them! Games are an ideal way to help children develop social and emotional skills; they are exciting, relaxing, and fun. **101 LIFE SKILLS GAMES FOR CHILDREN: LEARNING, GROWING, GETTING ALONG (Ages 6-12)** is a resource that can help children understand and deal with problems that arise in daily interactions with other children and adults. These games help children develop social and emotional skills and enhance self-awareness. The games address the following issues: dependence, aggression, fear, resentment, disability, accusations, boasting, honesty, flexibility, patience, secrets, conscience, inhibitions, stereotypes, noise, lying, performance, closeness, weaknesses, self confidence, fun, reassurance, love, respect, integrating a new classmate, group conflict. Organized in three main chapters: (I-Games, You-Games and We-Games), the book is well structured and easily accessible. It specifies an objective for every game, gives step-by-step instructions, and offers questions for reflection. It provides possible variations for each game, examples, tips, and ideas for role plays. Each game contains references to appropriate follow-up games and is illustrated with charming drawings.

#### **ARM Microprocessor Systems** Springer Nature

In *Learning with Information Systems* the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Be present, connect more effectively, all while being as productive as possible **5 Gears: How to Be Present and Productive When There Is Never Enough Time** teaches you to shift into the right gear at the right time so that you can grow in your relational intelligence and increase your influence. This revolutionary text introduces you to the five different gears, or mindsets, that carry you through various facets of your day. These include: First gear—when you fully rest and recharge Second gear—when you connect with family or friends without the involvement of work Third gear—when you are socializing Fourth gear—when you are working and multi-tasking Fifth gear—when you are fully focused and 'in the zone,' working without interruption Using these gears consistently allows you to bring a new level of relational intelligence to your life that offers a competitive advantage in our task-driven world. All too often people go through life without truly connecting—and can, as a result, miss out on experiences and relationships that have the power to bring them great joy. By understanding how the five gears presented in this engaging book work, you can improve your ability to connect with the world around you. Explore why some people stay disconnected from the people and events around them, and why others always seem to have a deep connection to their friends, family, and surroundings Learn how to set triggers and markers that help you shift into the right gears at the right time, which will increase your relational dynamics and make you more productive Create positive change in the dynamics of your relationships Improve your respect and influence—and learn a sign language that, when used, can change your perspective and your world.

**5 Gears: How to Be Present and Productive When There Is Never Enough Time** is the perfect resource for anyone who wants to live and lead connected.

*From Career to Calling* Notion Press

A politically polarized America is coming together over a new kind of car--the plug-in hybrid that will save drivers money, reduce pollution, and increase US security by reducing dependence on imported oil. *Plug-in Hybrids* points out that, where hydrogen fuel-cell cars won't be ready for decades, the technology for plug-in hybrids exists today. Unlike conventional hybrid cars that can't run without gasoline, plug-in hybrids use gasoline or cheaper, cleaner, domestic electricity--or both. Although plug-in hybrids are not yet for sale, demand for them is widespread, coming from characters across the political spectrum, such as: \* Chelsea Sexton, the automotive insider: working for General Motors, Sexton fought attempts to destroy the all-electric EV1 car and describes how car companies are resisting plug-in hybrids--and why they'll make them -anyway. \* Felix Kramer and the tech squad: Kramer started a nonprofit organization using the Internet to tap into a small army of engineers who built the first plug-in Prius hybrids. \* R. James Woolsey, former CIA director and national security hawk: seeing the end of oil supplies looming, Woolsey is demanding plug-in hybrids to wean us from petroleum. Cautioning that the oil and auto companies know how to undermine the success of plug-in car programs to protect their interests, the book gives readers tools to ensure that plug-in hybrids get to market--and stay here.

The Human Pulmonary Circulation CRC Press

'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN

This specialty buying guide presents easy-to-use historical profiles of some 200 models--cars, trucks, minivans, sport utility vehicles--giving readers a comprehensive view of each model as a used car.

Four Go in Search of Big Ideas Springer

"Football fans and football culture represent a unique prism through which to view contemporary society and politics. Based on in-depth empirical research into football in Poland, this book examines how fans develop political identities and how those identities can influence the wider political culture. It surveys the turbulent history of Poland in recent decades and explores the dominant right-wing ideology on the terraces, characterised by nationalism, 'traditional' values and anti-immigrant sentiment. As one of the first book-length studies of fandom in Eastern Europe, this book makes an important contribution to our understanding of society and politics in post-Communist states.

Politics, Ideology and Football Fandom is an important read for students and researchers studying sport, politics and identity, as well as those working in sports studies and political studies covering sociology of sport, globalisation studies, East European politics, ethnic studies, social movements studies, political history and nationalism studies"--

The People's Car CRC Press

This book gathers selected high-quality research papers presented at International Conference on Mobile Computing and Sustainable Informatics (ICMCSI 2021) organized by Pulchowk Campus, Institute of Engineering, Tribhuvan University, Nepal, during 29–30 January 2021. The book discusses recent developments in mobile communication technologies ranging from mobile edge computing devices, to personalized, embedded and sustainable applications. The book covers vital topics like mobile networks, computing models, algorithms, sustainable models and advanced informatics that supports the symbiosis of mobile computing and sustainable informatics.

**Mobile Computing and Sustainable Informatics** Yale University Press

This book analyses the mobilisation of race, rights and the law in Malaysia. It examines the Indian community in Malaysia, a quiet minority which consists of the former Indian Tamil plantation labour community and the urban Indian middle-class. The first part of the book explores the role played by British colonial laws and policies during the British colonial period in Malaya, from the 1890s to 1956, in the construction of an Indian "race" in Malaya, the racialization of labour laws and policies and labour-based mobilisation culminated in the 1940s. The second part investigates the mobilisation trends of the Indian community from 1957 (at the onset of Independent Malaya) to 2018. It shows a gradual shift in the Indian community from a "quiet minority" into a mass mobilising collective or social movement, known as the Hindu Rights Action Force (HINDRAF), in 2007. The author shows that activist lawyers and Indian mobilisers played a crucial part in organizing a civil disobedience strategy of framing grievances as political rights and using the law as a site of contention in order to claim legal rights through strategic litigation. Highly interdisciplinary in nature, this book will be of interest to scholars and researchers examining the role of the law and rights in areas such as sociolegal studies, law and society scholarship, law and the postcolonial, social movement studies, migration and labour studies, Asian law and Southeast Asian Studies.

World Travel in Low Budget: How to Plan International Trips on Our Own in Low Cost? Gabriola, B.C. : New Society Publishers

This adventurous work records Robert Edison Fulton's solo round-the-world tour on a two-cylinder Douglas motorcycle between July, 1932 and December, 1933. First published in 1937.

*Violence and Mental Health* Routledge

At the Berlin Auto Show in 1938, Adolf Hitler presented the prototype for a small, oddly shaped, inexpensive family car that all good Aryans could enjoy. Decades later, that automobile—the Volkswagen Beetle—was one of the most beloved in the world. Bernhard Rieger examines culture and technology, politics and economics, and industrial design and advertising genius to reveal how a car commissioned by Hitler and designed by Ferdinand Porsche became an exceptional global commodity on a par with Coca-Cola. Beyond its quality and low cost, the Beetle's success hinged on its uncanny ability to capture the imaginations of people across nations and cultures. In West Germany, it came to stand for the postwar "economic miracle" and helped propel Europe into the age of mass motorization. In the United States, it was embraced in the suburbs, and then prized by the hippie counterculture as an antidote to suburban conformity. As its popularity waned in the First World, the Beetle crawled across Mexico and Latin America, where it symbolized a sturdy toughness necessary to thrive amid economic instability. Drawing from a wealth of sources in multiple languages, *The People's Car* presents an international cast of characters—executives and engineers, journalists and advertisers, assembly line workers and car collectors, and everyday drivers—who made the Beetle into a global icon. The Beetle's improbable story as a failed prestige project of the Third Reich which became a world-renowned brand illuminates the multiple origins, creative adaptations, and persisting inequalities that characterized twentieth-century globalization.

Minorities, Rights and the Law in Malaysia Springer Nature

A practical do-it-yourself guide to plan international trips on our without having to avail expensive commercial packages. Covers all aspects such as selecting destinations, finding cheap flight tickets, visa, stay, food, local sightseeing, safety aspects, risk mitigation and more. Guaranteed savings on your future trips!

*Gasoline Engine with Direct Injection* Motorbooks

Finding and following an authentic calling challenges us to bridge both the intuitive, soulful and the hard-edged, material dimensions of everyday life. From Career to Calling: A Depth Psychology Guide to Soul-Making Work in Darkening Times opens new avenues for vocational exploration and career inquiry in an imaginative way. This unique book draws on insights from the field of Jungian and archetypal psychology to reimagine our attitudes and approaches to work, money, vocational guidance and career development. As people find themselves disillusioned with or disenfranchised from capitalist notions of work and career, Suzanne Cremen's interdisciplinary approach illuminates how a creative, meaningful and influential work-life can emerge from attending to the archetypal basis of experience. Interweaving elements of her own journey, Cremen connects individual experience with the collective in an original way, spotlighting depression in the legal profession, marginalization of the feminine principle in work environments, and how understanding the roots of

our cultural complexes can spark personal callings which facilitate collective transformation. Blending compelling real-life stories with robust scholarly analysis and reflective activities, this book will help practitioners to support individuals to develop a sense of their soul's calling and offer guidance on creating an authentic vocational life within the constraints of the contemporary era. Additionally, it will be invaluable to those in career transition, re-discovering their purpose at the end of a career, or commencing work-life.

Plug-in Hybrids Routledge

Sustainability and mobile computing embraces a wide range of Information and Communication Technologies [ICT] in recent times. This book focuses more on the recent research and development works in almost all the facets of sustainable, ubiquitous computing and communication paradigm. The recent research efforts on this evolving paradigm help to advance the technologies for next-generation, where socio-economic growth and sustainability poses significant challenges to the computing and communication infrastructures. The main purpose of this book is to promote the technical advances and impacts of sustainability and mobile computing to the informatics research. The key strands of this book include green computing, predictive models, mobility, data analytics, mobile computing, optimization, Quality of Service [QoS], new communicating and computing frameworks, human computer interaction, Artificial Intelligence [AI], communication networks, risk management, Ubiquitous computing, robotics, smart city and applications. The book has also addressed myriad of sustainability challenges in various computing and information processing infrastructures.

**Fresh from the Farm 6pk** Routledge

Electric Field Analysis is both a student-friendly textbook and a valuable tool for engineers and physicists engaged in the design work of high-voltage insulation systems. The text begins by

introducing the physical and mathematical fundamentals of electric fields, presenting problems from power and dielectric engineering to show how the theories are put into practice. The book then describes various techniques for electric field analysis and their significance in the validation of numerically computed results, as well as: Discusses finite difference, finite element, charge simulation, and surface charge simulation methods for the numerical computation of electric fields Provides case studies for electric field distribution in a cable termination, around a post insulator, in a condenser bushing, and around a gas-insulated substation (GIS) spacer Explores numerical field calculation for electric field optimization, demonstrating contour correction and examining the application of artificial neural networks Explains how high-voltage field optimization studies are carried out to meet the desired engineering needs Electric Field Analysis is accompanied by an easy-to-use yet comprehensive software for electric field computation. The software, along with a wealth of supporting content, is available for download with qualifying course adoption.

International Conference on Mobile Computing and Sustainable Informatics Vieweg+Teubner Verlag

This book discusses the recent advances in combustion strategies and engine technologies, with specific reference to the automotive sector. Chapters discuss the advanced combustion technologies, such as gasoline direct ignition (GDI), spark assisted compression ignition (SACI), gasoline compression ignition (GCI), etc., which are the future of the automotive sector. Emphasis is given to technologies which have the potential for utilization of alternative fuels as well as emission reduction. One special section includes a few chapters for methanol utilization in two-wheelers and four wheelers. The book will serve as a valuable resource for academic researchers and professional automotive engineers alike.
