Long-awaited biography of an African American avant-garde composer Alice Coltrane was a composer, improviser, guru, and widow of John Coltrane. Over the course of her musical life, she synthesized a wide range of musical genres including gospel, rhythm-and-blues, bebop, free jazz, Indian devotional song, and Western art music. Her childhood experiences playing for African-American congregations in Detroit, the ecstatic and avant-garde improvisations she performed on the bandstand with her husband John Coltrane, and her religious pilgrimages to India reveal themselves on more than twenty albums of original music for the Impulse and Warner Brothers labels. In the late 1970s Alice Coltrane became a swami, directing an alternative spiritual community in Southern California. Exploring her transformation from Alice McLeod, Detroit church pianist and bebopper, to guru Swami Turiya Sangitananda, Monument Eternal illuminates her music and, in turn, reveals the exceptional fluidity of American religious practices in the second half of the twentieth century. Most of all, this book celebrates the hybrid music of an exceptional, boundary-crossing African-American artist.

Essential reading for anyone interested in the most famous American crime of the twentieth century Since its original publication in 2004, *The Case That Never Dies* has become the standard account of the Lindbergh Kidnapping. Now, in a new afterword, historian Lloyd C. Gardner presents a surprise conclusion based on recently uncovered pieces of evidence that were missing from the initial investigation as well as an evaluation of Charles Lindbergh's role in the search for the kidnappers. Out of the controversies surrounding the actions of Colonel Lindbergh, Norman Schwarzkopf, commander of the New Jersey State Police, and FBI director J. Edgar Hoover, Gardner presents a well-reasoned argument for what happened on the night of March 1, 1932. *The Case That Never Dies* places the Lindbergh kidnapping, investigation, and trial in the context of the Depression, when many feared the country was on the edge of anarchy. Gardner delves deeply into the aspects of the case that remain confusing to this day, including Lindbergh's dealings with crime baron Owney Madden, Al Capone's New York counterpart, as well as the inexplicable exploits of John Condon, a retired schoolteacher who became the prosecution's best witness. The initial investigation was hampered by Colonel Lindbergh, who insisted that the police not attempt to find the perpetrator because he feared the investigation would endanger his son's life. He relented only when the child was found dead. After two years of fruitless searching, Bruno Richard Hauptmann, a German immigrant, was discovered to have some of the ransom money in his possession. Hauptmann was arrested, tried, and sentenced to death. Throughout the book, Gardner pays special attention to the evidence of the case and how it was used and misused in the trial. Whether Hauptmann was guilty or not, Gardner concludes that there was

insufficient evidence to convict him of first-degree murder. Set in historical context, the book offers not only a compelling read, but a powerful vantage point from which to observe the United States in the 1930s as well as contemporary arguments over capital punishment.

A great benefit of being a clinical child psychologist is the opportunity to conduct and review research on fascinating areas of human, youthful behavior. And perhaps no behavior is as central to human existence as social behavior, and the lack thereof. In writing this book, therefore, I have been doubly blessed with the chance to examine seminal works on behaviors that are so critical to the development and quality of life of children. This book covers the major historical aspects, characteristics, assessment strategies, and psychological treatment techniques for youths with social anxiety and social phobia. Chapter 1 provides an introduction to the related constructs and history of social phobia. Chapters 2 and 3 provide a summary of the characteristics and etiological variables that pertain most to youths with social anxiety and social phobia. Chapters 4 and 5 provide an overview of research- and clinically-based assessment strategies and recommendations for this population. Chapters 6-9 provide a description of treatment techniques that are most relevant and empirically supported for youths with social anxiety and social phobia. Chapter 10 covers issues regarding general and relapse prevention as well as difficult cases and future directions.

Less than a decade has elapsed since the publication in 2000 of the first anthology devoted to lipocalins (*Biochim Biophys Acta* 1482, 2000), and only a few years since the first Lipocalin International Symposium in Copenhagen in 2003 (Benzon Symposium no. 50 "The Lipocalin Protein Superfamily," Copenhagen, 2003) and the introduction of a public lipocalin website (<http://www.jenner.ac.uk/lipocalins.htm>). In spite of all these recent joint actions from the lipocalin community, the need for another anthology has been expressed. Many new exciting publications have been issued during the past five years, partially outdating the 2000 BBA lipocalin anthology. Likewise, the three events mentioned above have undoubtedly had a positive effect upon lipocalin research and the exchange of research information. As a result the community of lipocalin researchers is highly motivated to continue such pan-lipocalin activities. Several of the chapters in this volume are reviews of groups of lipocalins with a similar phylogenetic or tissue distribution (Chapters 4-6, 12 and 13). Furthermore, two chapters discuss the evolutionary and structural relationships between the lipocalins (Chapters 2 and 3) and the penultimate three chapters are treatises on themes in lipocalin research: receptors, allergy, and clinical diagnosis (Chapters 14-16); the final chapter discusses how lipocalin research might go in future.

After arriving from South Asia approximately a thousand years ago, cannabis quickly spread throughout the African continent. European accounts of cannabis in Africa—often fictionalized and reliant upon racial stereotypes—shaped widespread myths about the plant and were used to depict the continent as a cultural backwater and Africans as predisposed to drug use. These myths continue to influence contemporary thinking about cannabis. In *The African Roots of Marijuana*, Chris S. Duvall corrects common misconceptions while providing an authoritative history of cannabis as it flowed into, throughout, and out of Africa. Duvall shows how preexisting smoking cultures in Africa transformed the plant into a fast-acting and easily dosed drug and how it later became linked with global capitalism and the slave trade. People often used cannabis to cope with oppressive working conditions under colonialism, as a recreational drug, and in religious and political movements. This expansive look at Africa's importance to the development of human knowledge about marijuana will challenge everything readers thought they knew about one of the world's most ubiquitous plants.

Context-sensitive solutions (CSS) reflect the need to consider highway projects as more than just transportation facilities. Depending on how highway projects are integrated into the community, they can have far-reaching impacts beyond their traffic or transportation function. CSS is a comprehensive process that brings stakeholders together in a positive, proactive environment to develop projects that not only meet transportation needs, but also improve or enhance the community. Achieving a flexible, context-sensitive design solution requires designers to fully understand the reasons behind the processes, design values, and design procedures that are used. This AASHTO Guide shows highway designers how to think flexibly, how to recognize the many choices and options they have, and how to arrive at the best solution for the particular situation or context. It also strives to emphasize that flexible design does not necessarily entail a fundamentally new design process, but that it can be integrated into the existing transportation culture. This publication represents a major step toward institutionalizing CSS into state transportation departments and other

agencies charged with transportation project development.
