These Principles reflect the current state of EC law in a structure which allows for the identification of commonalities, contradictions, and gaps in the Acquis. The Acquis Principles include: general rules formulated on the basis of existing EC law; an accompanying commentary, outlining the foundations in the Acquis; and definitions of core legal terms and a glossary on terminology. This book is the first in a series of essay collections on defences in private law. It addresses defences to liability arising in tort. The essays range from those adopting a primarily doctrinal approach to others that examine the law from a more theoretical or historical perspective. Some essays focus on individual defences, while some are concerned with the links between defences, or with how defences relate to the structure of tort law as a whole. A number of the essays also draw upon concepts and literature that have been developed mainly in relation to the criminal law, and consider their application to tort law. The essays make several original contributions to this complex, important but neglected field of academic enquiry.

Studies in Jurisprudence and Legal Theory Cornell University Press Derived from the renowned multi-volume *International Encyclopaedia of Laws*, this book provides ready access to how the legal dimension of prevention against harm and loss

allocation is treated in India. This traditional branch of law not only tackles questions which concern every lawyer, whatever his legal expertise, but also concerns each person's most fundamental rights on a worldwide scale. Following a general introduction that probes the distinction between tort and crime and the relationship between tort and contract, the monograph describes how the concepts of fault and unlawfulness, and of duty of care and negligence, are dealt with in both the legislature and the courts. The book then proceeds to cover specific cases of liability, such as professional liability, liability of public bodies, abuse of rights, injury to reputation and privacy, vicarious liability, liability of parents and teachers, liability for handicapped persons, product liability, environmental liability, and liability connected with road and traffic accidents. Principles of causation, grounds of justification, limitations on recovery, assessment of damages and compensation, and the role of private insurance and social security are all closely considered. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for lawyers with an interest in India. Academics and researchers will also welcome this very useful guide, and will appreciate its value not only as a contribution to comparative law but also as a stimulus to harmonization of the rules on tort.

In The Future of the Internet: And How to Stop It Jonathan Zittrain explores the dangers the internet faces if it fails to balance ever more tightly controlled technologies with the flow of innovation that has generated so much progress in the field of technology. Zittrain argues that today's technological market is dominated by two contrasting business models: the generative and the non-generative. The generative models - the PCs, Windows and Macs of this world - allow third parties to build upon and share through them. The non-generative model is more restricted; appliances such as the xbox, iPod and tomtom might work well, but the only entity that can change the way they operate is the vendor. If we want the internet to survive we need to change. People must wake up to the risk or we could lose everything.
