Feminism and the Mastery of Nature Villard Books

“It’s a time of change in the world, with dictators toppling and new opportunities rising, but any revolution that doesn’t create equality for women will be incomplete. The time has come to realize the full potential of half the world’s population.”

—Christiane Amanpour, from the foreword *The Unfinished Revolution* tells the story of the global struggle to secure basic rights for women and girls, including in the Middle East where the Arab Spring raised high hopes, but the political revolutions are so far insufficient to guarantee progress. Around the world, women and girls are trafficked into forced labor and sex slavery, trapped in conflict zones where rape is a weapon of war, prevented from attending school, and kept from making deeply personal choices in their private lives, such as whom and when to marry. In many countries, women are second-class citizens by law. In others,

religion and traditions block freedoms such as the right to work, study or access health care. Even in the United States, women who are victims of sexual violence often do not see their attackers brought to justice. More than 30 writers—Nobel Prize laureates, leading activists, top policymakers, and former victims—have contributed to this anthology. Drawing from their rich personal experiences, they tackle some of the toughest questions and offer bold new approaches to problems affecting hundreds of millions of women. This volume is indispensable reading, providing thoughtful analysis from a never-before assembled group of advocates. It shows that the fight for women’s equality is far from over. As Leymah Gbowee, 2011 Nobel Peace Prize Laureate says, “Women are not free anywhere in this world until all women in the world are free.”

Two of the most important political movements of the late twentieth century are those of environmentalism and feminism. In this book, Val Plumwood argues that feminist theory has an important opportunity to make a major contribution to the

debates in political ecology and environmental philosophy. *Feminism and the Mastery of Nature* explains the relation between ecofeminism, or ecological feminism, and other feminist theories including radical green theories such as deep ecology. Val Plumwood provides a philosophically informed account of the relation of women and nature, and shows how relating male domination to the domination of nature is important and yet remains a dilemma for women.

Extrait de la couverture : "Here, for the first time, is a book that brings women's writings out of exile to rethink anthropology's purpose at the end of the century. ... As a historical resource, the collection undertakes fresh readings of the work of well-known women anthropologists and also reclaims the writings of women of color for anthropology. As a critical account, it bravely interrogates the politics of authorship. As a creative endeavor, it embraces new Feminist voices of ethnography that challenge prevailing definitions of theory and experimental writing."

The most comprehensive Zionist collection ever published, *The Zionist Ideas: Visions for the Jewish Homeland--Then, Now, Tomorrow* sheds light on the surprisingly diverse and shared visions for realizing Israel as a democratic Jewish state. Building on Arthur Hertzberg's classic, *The Zionist Idea*, Gil Troy explores the backstories, dreams, and legacies of more than 170 passionate Jewish visionaries--quadruple Hertzberg's original number, and now including women, mizrachim, and others--from the 1800s to today. Troy divides the thinkers into six Zionist schools of thought--Political, Revisionist, Labor, Religious, Cultural, and Diaspora Zionism--and reveals the breadth of the debate and surprising syntheses. He also presents the visionaries within three major stages of Zionist development, demonstrating the length and evolution of the conversation. Part 1 (pre-1948) introduces the pioneers who founded the Jewish state, such as Herzl, Gordon, Jabotinsky, Kook, Ha'am, and Szold. Part 2 (1948 to 2000) features builders who actualized and modernized the Zionist blueprints, such as Ben-Gurion, Berlin, Meir, Begin, Soloveitchik, Uris, and Kaplan. Part 3 showcases today's torchbearers, including Barak, Grossman, Shaked, Lau, Yehoshua, and Sacks. This mosaic of voices will engage equally diverse readers in reinvigorating the Zionist conversation--weighing and developing the moral, social, and political character of the Jewish state of today and tomorrow.

In spite of the double burden of racial and gender discrimination, African-American women have developed a rich intellectual tradition that is not widely known. In *Black Feminist Thought*, Patricia Hill Collins explores the words and ideas of Black feminist intellectuals as well as those African-American women outside academe. She provides an interpretive framework for the work of such prominent Black feminist thinkers as Angela Davis, bell hooks, Alice Walker, and Audre Lorde. The result is a superbly crafted book that provides the first synthetic overview of Black feminist thought.

There are deeper issues at work here, but ultimately "surface level purity culture" and Christian celebrity culture are problematic. I have many issues with the so-called "chastity" that has been preached in many circles. That understanding falls short-and we've watched the failures play out in modern culture. To me, the underlying issue is consistency -- consistency between what you preach and how you live your life, consistency between what you say and who you are.

Erika Bachiochi offers an original look at the development of feminism in the United States, advancing a vision of rights that rests upon our responsibilities to others. In *The Rights of Women*, Erika Bachiochi explores the development of feminist thought in the United States. Inspired by the writings of Mary Wollstonecraft, Bachiochi presents the intellectual history of a lost vision of women's rights, seamlessly weaving philosophical insight, biographical portraits, and constitutional law to showcase the once predominant view that our rights properly rest upon our concrete responsibilities to God, self, family, and community. Bachiochi proposes a philosophical and legal framework for rights that builds on the communitarian tradition of feminist thought as seen in the work of Elizabeth Fox-Genovese and Jean Bethke Elshtain. Drawing on the insight of prominent figures such as Sarah Grimké, Frances Willard, Florence Kelley, Betty Friedan, Pauli Murray, Ruth Bader Ginsburg, and Mary Ann Glendon, this book is unique in its treatment of the moral roots of women's rights in America and its critique of the movement's current trajectory. *The Rights of Women* provides a synthesis of ancient wisdom and modern political insight that locates the family's vital work at the very center of personal and political self-government. Bachiochi demonstrates that when rights are properly understood as a civil and political apparatus born of the natural duties we owe to one another, they make more visible our personal responsibilities and more viable our common life together. This smart and sophisticated application of Wollstonecraft's thought will serve as a guide for how we might better value the culturally essential work of the home and thereby promote authentic personal and political freedom. *The Rights of Women* will interest students and scholars of political theory, gender and women's studies, constitutional law, and all readers interested in women's rights.

Essays and Speeches Rowman & Littlefield

The work of teachers is not just to teach. We are also responsible for the basic needs of students. Helping students eat and live, and also helping them find the tools they need to reflect on the present moment. This is exactly in keeping with Paulo Freire's insistence that critical pedagogy be focused on helping students read their world; but more and more, we must together reckon with that world. Teaching must be an act of imagination, hope, and possibility. Education must be a practice done with hearts as much as heads, with hands as much as books. Care has to be at the center of this work. For the past ten years, Hybrid Pedagogy has worked to help craft a theory of teaching and learning in and around digital spaces, not by imagining what that work might look like, but by doing, asking after, changing, and doing again. Since 2011, Hybrid Pedagogy has published over 400 articles from more than 200 authors focused in and around the emerging field of critical digital pedagogy. A selection of those articles are gathered here. This is the first peer-reviewed publication centered on the theory and practice of critical digital pedagogy. The collection represents a wide cross-section of both academic and non-academic culture and features articles by women, Black people, indigenous people, Chicana and Latinx writers, disabled people, queer people, and other underrepresented populations. The goal is to provide evidence for the extraordinary work being done by teachers, librarians, instructional designers, graduate students, technologists, and more - work which advances the study and the praxis of critical digital pedagogy.

Who's Afraid of Charles Darwin? Zed Books

The relationship between feminism and the biological sciences has always been particularly tense and hostile. Feminists have been inclined not to trust what scientists had to say about the sexes, with science often being pronounced a white, male enterprise. But why should feminism and the biological sciences remain at odds? And what might be gained from a reconciliation? In *Who's Afraid of Charles Darwin?* Griet Vandermassen shows that, rather than continuing this enmity, feminism and the biological sciences, and in particular evolutionary psychology,

have the potential and the need to become powerful allies. Properly understood, the Darwinian perspective proposed in this volume will become essential to tackling the major issues in feminism.

"Disability, like questions of race, gender, and class, is one of the most provocative topics among theorists and philosophers today. This volume, situated at the intersection of feminist theory and disability studies, addresses questions about the nature of embodiment, the meaning of disability, the impact of public policy on those who have been labeled disabled, and how we define the norms of mental and physical ability. The essays here bridge the gap between theory and activism by illuminating structures of power and showing how historical and cultural perceptions of the human body have been informed by and contributed to the oppression of women and disabled people."-- Pub. desc.

Toward a Feminist Theory of the State Anchor

The *Sleeping Beauty* in Roberta Seelinger Trites' intriguing text is no silent snoozer passively waiting for Prince Charming to energize her life. Instead she wakes up all by herself and sets out to redefine the meaning of "happily ever after." Trites investigates the many ways that *Sleeping Beauty's* newfound voice has joined other strong female voices in feminist children's novels to generate equal potentials for all children. Waking *Sleeping Beauty* explores issues of voice in a wide range of children's novels, including books by Virginia Hamilton, Patricia MacLachlan, and Cynthia Voigt as well as many multicultural and international books. Far from being a limiting genre that praises females at the expense of males, the feminist children's novel seeks to communicate an inclusive vision of politics, gender, age, race, and class. By revising former stereotypes of children's literature and replacing them with more complete images of females in children's books, Trites encourages those involved with children's literature—teachers, students, writers, publishers, critics, librarian, booksellers, and parents—to be aware of the myriad possibilities of feminist expression. Roberta Trites focuses on the positive aspects of feminism: on the ways females interact through family and community relationships, on the ways females have revised patriarchal images, and on the ways female writers use fictional constructs to transmit their ideologies to readers. She thus provides a framework that allows everyone who enters a classroom with a children's book in hand to recognize and communicate—with an optimistic, reality-based sense of "happily ever after"—the politics and the potential of that book.
