An autobiographical novel, set in the early 20th century, about the life of a boy born to a poor family in northern Syria. Fragments of Memory offers a picture of reality that is simple, direct, and quite emotional... an image of Syrian society in the thirties and forties through the struggle of an impoverished family- of an origin that is neither rural nor urban- which moves from the city to the countryside, only to be forced back unwillingly, groping for survival. Khaldoun Shamaa's Fragments of Memory is an autobiographical novel about the life of a boy born to a poor family in northern Syria. Mina sets these personal events against a richly detailed description of events in the history of early 20th century Syria, as the silkworm industry gave way to modern foreign technology. The mode of life described is one of a bygone era.

My Name Is Emily Marie shares a journey of memory and loss from author Margot Sharp, based upon the relationship between her mother and granddaughter. Little Emily Marie was named after her great-grandmother and feels close to her. But it is confusing to her when her great-grandma does not seem to remember her at all. She wonders how that could happen; she loves her great-grandma so much. Emily Marie's natural curiosity helps her to accept the changes in her great-grandma and to find fun ways to spend their time together, like running down the hall at the nursing home while Great-Grandma rolls along beside her in her wheelchair. Through the whimsical and tender illustrations of Judy Stead, we realize that it is okay that Great-Grandma cannot remember and that she is sometimes confused about simple things. My Name Is Emily Marie is a sweet and inspiring story that speaks straight to the heart and opens the door to beginning a conversation about memory loss in the elderly with anyone.

### **Memory's Wake Omnibus** Vintage

Like a librarian, she stores everyone's memories, from the day they were born until the day they leave this earth. She guides children on how to think in alignment with happy thoughts, tapping into helpful memories and teaching everyone how these experiences can have a positive impact. Memory Minder is never happier than when she is holding up a future memory and seeing all of the wonderful things children can create for themselves as they grow. Genius and his friends live in a place called MindWorld, which is a community in your mind. It is a very special place, created by you. Your thoughts are unique and special, so enjoy each character as they take you on a journey of your feelings, emotions and critical thinking skills through MindWorld. Wendy is a powerful educator whose Genius series is a must have in every classroom. Wendy's foresight in education, and her wish to inspire young minds, is remarkable. In this book of the series, she beams in on 'memory'- a fundamental ideal which helps children comprehend the beauty and intricacies of the mind. ★How to Improve Your Memory★ If I asked you for some tips on how to improve my general fitness, chances are you'd be able to give some good, solid advice. You may suggest a couple of exercises that would suit my current strength level, or give your thoughts on how to create a gym schedule to fit my lifestyle. The same may be true if I were looking for information on how to eat well, go vegetarian, or try Banting. Most folk have a pretty good idea of how to maintain their body's health in terms of exercising and eating well. But if I asked for advice on how to train or maintain my memory, would you be able to give me some stellar

tips? Memory seems to have taken a backseat when it comes to self-improvement. This baffles me! Without memories, we lose a part of ourselves. We leave behind an element of life that makes us who we are. Half-formed or half-recalled memories have the same effect. Apart from long-term memory problems, we've all experienced that frustration of not remembering what we wanted to buy at the store, or struggling to remember the name of that person we met yesterday. If I told you it's easy, fun, and effective to train your memory, just like building muscle in the gym, would you give it a try? That's what this book is designed to do-teach you easy ways to improve your memory that actually work. ★What have you got to lose? Give it a go★ I guarantee you'll impress yourself with your own memorization skills after only a few weeks of practice!

"[A] gripping, emotional story set in the part of history we'll never forget." - New York Daily News On the morning of September 11, 2001, sixteen-year-old Kyle Donohue watches the first twin tower come down from the window of Stuyvesant High School. Moments later, terrified and fleeing home to safety across the Brooklyn Bridge, he stumbles across a girl perched in the shadows, covered in ash, and wearing a pair of costume wings. With his mother and sister in California and unable to reach his father, a NYC detective likely on his way to the disaster, Kyle makes the split-second decision to bring the girl home. What follows is their story, told in alternating points of view, as Kyle tries to unravel the mystery of the girl so he can return her to her family. But what if the girl has forgotten everything, even her own name? And what if the more Kyle gets to know her, the less he wants her to go home? The Memory of Things tells a stunning story of friendship and first love and of carrying on with our day-to-day living in the midst of world-changing tragedy and unforgettable pain—it tells a story of hope.

*Love Never Stops* Random House Canada

An extraordinary debut novel of love that survives the fires of hell and transcends the boundaries of time. On a burn ward, a man lies between living and dying, so disfigured that no one from his past life would even recognize him. His only comfort comes from imagining various inventive ways to end his misery. Then a woman named Marianne Engel walks into his hospital room, a wild-haired, schizophrenic sculptress on the lam from the psych ward upstairs, who insists that she knows him – that she has known him, in fact, for seven hundred years. She remembers vividly when they met, in another hospital ward at a convent in medieval Germany, when she was a nun and he was a wounded mercenary left to die. If he has forgotten this, he is not to worry: she will prove it to him. And so Marianne Engel begins to tell him their story, carving away his disbelief and slowly drawing him into the orbit and power of a word he'd never uttered: love.

\*A New York Times bestseller\* 'Using her expertise as a neuroscientist and her gifts as a storyteller, Lisa Genova explains the nuances of human memory' - Steven Pinker, Johnstone Professor of Psychology, Harvard University, and bestselling author of *How The Mind Works* 'No one writes more brilliantly about the connections between the brain, the mind, and the heart. Remember is a beautiful, fascinating, and important book about the mysteries of human memory - what it is, how it works, and what happens when it is stolen from us. A scientific and literary treat that you will not soon forget.' - Daniel Gilbert ( New York Times bestselling author of *Stumbling on Happiness*) Have you ever felt a crushing wave of panic when you can't for the life of you remember the name of that actor in the movie you saw last week, or you walk into a room only to forget why you went there in the first place? If you're over forty, you're probably not laughing. You might even be worried that these lapses in memory could be an early sign of Alzheimer's or dementia. In reality, for the vast majority of us, these examples of forgetting are completely normal. Why? Because while memory is amazing, it is far from perfect. Our brains aren't designed to remember every name we hear, plan we make or day we experience. Just because your memory sometimes fails doesn't mean it's broken or succumbing to disease. Forgetting is actually part of being human. In *Remember*, neuroscientist and acclaimed novelist Lisa Genova delves into how memories are made and how we retrieve them. In explaining whether forgotten memories are temporarily inaccessible or erased forever and why some memories are built to exist for only a few seconds while others can last a lifetime, we're shown the clear distinction between normal forgetting (where you parked your car) and forgetting due to Alzheimer's (that you own a car). *Remember* shows us how to create a better relationship with our memory - so we no longer have to fear it any more, which can be life-changing.

They tell me that my memory will never be the same, that I'll start forgetting things. At first just a little, and then a lot. So I'm writing to remember. Sammie McCoy is a girl with a plan: graduate at the top of her class and get out of her small town as soon as possible. Nothing will stand in her way--not even the rare genetic disorder the doctors say will slowly steal her memories and then her health. So the memory book is born: a journal

written to Sammie's future self, so she can remember everything from where she stashed her study guides to just how great it feels to have a best friend again. It's where she'll record every perfect detail of her first date with longtime-crush Stuart, a gifted young writer home for the summer. And where she'll admit how much she's missed her childhood friend Cooper, and the ridiculous lengths he will go to make her laugh. The memory book will ensure Sammie never forgets the most important parts of her life--the people who have broken her heart, those who have mended it--and most of all, that if she's going to die, she's going to die living. This moving and remarkable novel introduces an inspiring

character you're sure to remember, long after the last page.

The story that you have asked me to tell you does not begin with the pitiful ugliness of Lloyd's death. It begins on a long-ago day in August when the sun seared my blistered face and I was nine years old and my father and mother sold me to a strange man. Memory, the narrator of Petina Gappah's *The Book of Memory*, is an albino woman languishing in Chikurubi Maximum Security Prison in Harare, Zimbabwe, after being sentenced for murder. As part of her appeal, her lawyer insists that she write down what happened as she remembers it. The death penalty is a mandatory

sentence for murder, and Memory is, both literally and metaphorically, writing for her life. As her story unfolds, Memory reveals that she has been tried and convicted for the murder of Lloyd Hendricks, her adopted father. But who was Lloyd Hendricks? Why does Memory feel no remorse for his death? And did everything happen exactly as she remembers? Moving between the townships of the poor and the suburbs of the rich, and between past and present, the 2009 Guardian First Book Award-winning writer Petina Gappah weaves a compelling tale of love, obsession, the relentlessness of fate, and the treachery of memory.
