"This study is a feasibility analysis of a European platform for data and information exchange for the European fruit and vegetable market. The specific tasks of the study are defined in details by the Tender specifications as follows: Task 1- Legal assessment: compatibility of the platform with European Union law, and national law on competition and data privacy, if relevant. Task 2 - Collection of existing data and methodology: overview on existing data collection and processing mechanisms in at least 3 of the main producing Countries. Task 3- Technical requirements of the platform: technical requirements for the platform. Task 4- Conclusions and recommendations: feasibility of the platform implementation."--Editor.

Events Feasibility and Development: From Strategy to Operations describes the latest tools and techniques used for the strategic growth of the event industry around the world. It illustrates how events and festivals are assets to countries, companies and their people. This book answers two fundamental questions faced by all events planners and organizers: "how do I justify this event to the client?" and "why are we spending money on this event?" This book is supported by video presentations for teaching and training. Events Feasibility and Development: From Strategy to Operations unpicks core issues such as: Developing a viable events program for the company or

region Forecasting models and return on investment Operational integrity and its feasibility Integrating all the management processes to ensure best practice International case studies and examples are used throughout with practical insights and supporting theory. Case studies include: crowd number forecasting, planning a torch relay around the world, getting the most out of volunteers, and examples are drawn from around the world, from Scotland to Saudi Arabia to Sydney.

A Feasibility Study Into the Planning, Setting Up and Operation of a Roll on Roll Off Ferry Service Between the Ports of Avonmouth and Dublin Vienna : United Nations Industrial Development Organization

This dissertation, "Undeclared Passion and Ungraded Beauty: a Feasibility Study of Setting up a Heritage Trail on a Non-historic Campus" by Siu-ye, Yeung, 葉蔚, was obtained from The University of Hong Kong (Pokfulam, Hong Kong) and is being sold pursuant to Creative Commons: Attribution 3.0 Hong Kong License. The content of this dissertation has not been altered in any way. We have altered the formatting in order to facilitate the ease of printing and reading of the dissertation. All rights not granted by the above license are retained by the author. Abstract: The aim of this dissertation is to test the feasibility of setting up a heritage trail on a non-historic campus as an effective educational tool to facilitate cultural identification among students. The ELCHK Lutheran Secondary School is used as a case study. Since understanding the place is fundamental to value-based conservation, heritage education for students should start from their acquainted environment with a sense of belonging. Existing external heritage resources provided to schools are not sufficient to meet the mounting needs for cultural heritage education. One's own campus should be incorporated into the design of teaching and learning activities. In this dissertation, an in-house, on-campus heritage trail is set up on a non-historic campus, with neither declared monuments nor graded historic buildings, through a stakeholder participation approach. Major visiting points are determined according to an opinion survey of the stakeholders. The proposed trail can also be used for docent service for visitors and other orientation programs. The proposed campus heritage trail may only be operated on a pilot scale in view of its inherent limitations of small campus size and low degree of attractiveness. Its non-historic nature also implies lack of adequate funding for management and impetus for conservation. Nonetheless, implementation and evaluation of the proposed learning activities should still be tried out. If review proves that utilization of the trail is an effective tool to cultivate a sense of identity, continuity and belongings among students, the feasibility of the proposal can be verified. An ordinary school, as long as it is loved and has its own identity and individuality, deserves recognition and conservation. Regardless of age, non-historic places have to be taken care of with passion and enthusiasm before they can gradually evolve into more historic and precious jewels.
