SCADA system SIMATIC WinCC Open Architecture allows you to implement solutions tailored to specific customers. Saving valuable engineering time is top priority! With a philosophy that puts the focus on people, we offer comprehensive solutions. Efficiency SIMATIC WinCC Open Architecture - SCADA System As part of the SIMATIC HMI family, the SCADA System SIMATIC WinCC Open Architecture (WinCC OA) is aimed at applications with a high requirement for customer-specific adaptations, large and/or complex applications, and projects that call for specific system requirements and functions. SCADA System SIMATIC WinCC Open Architecture SIMATIC WinCC V7 - The scalable and open SCADA system for maximum plant transparency and productivity. With SIMATIC WinCC V7, you choose an innovative, scalable process-visualization system with numerous high-performance functions for monitoring automated processes. SIMATIC SCADA Systems | Automation Software | USA Within the SIMATIC HMI product category, we offer a comprehensive HMI

software portfolio. The range runs from configuration software to software for machine-oriented visualization to powerful SCADA systems with Plant Intelligence. Our objective for our software development is to make HMI as efficient as possible by making it more flexible, transparent and open.
