NEAL BROCK

Baby Bird National Geographic Books

Show your child how to fall in love with reading at a very early age! **Baby's First Book: Animals High-Contrast, Black & White Book For Newborns** This charming high-contrast, black and white book is an introduction to birds, and includes bold basic bird images to help stimulate your child's developing mind. Designed for babies 6 weeks to 6 months, the bold black-and-white high-contrast images will engage your baby and provide a calming, natural learning experience. Babies respond to the strong contrast between black and white, which helps to stimulate development within your baby's eyes. With all the activity going on around a newborn baby it is easy for his/her brain to become completely overwhelmed. High contrast shapes and patterns provide your baby with something simple and engaging to focus on, which in turn will allow his/her mind to rest. High-contrast shapes are usually very basic and may even appear to be a little boring to adults, but they are designed to hold your baby's attention. Researchers have shown that newborns actually prefer to look at black and white images, rather than bright colors....(that you will see in most "general" newborn baby books). Contrasting colors are most appealing to babies. Black and white provide the greatest contrast. Black and white are the easiest for your baby to perceive. Fixation Your baby can see clearly at birth and can fixate and maintain his/her gaze intently on an object. Allowing your child to repeatedly look at these contrasting black and white images will help increase your baby's attention span. There have been studies where many parents have reported that their newborn's attention span increased from 10 seconds to 90 seconds after only one week of looking at black and white image books for just a few minutes a day. Tracking Your baby will track appealing objects with his/her eyes. The more appealing the object, the more intense and prolonged the tracking. When you use high-contrast images your child will be able to track with more ease because of his/her increased interest. Tracking helps your baby to learn where an object is and how it differs from its background. Scanning When your baby scans, he/she learns how to see and compare entire objects. This ability eventually helps him/her to distinguish all the objects in the environment. The large images in this book will help to calm and also captivate your baby's interest while at the same time provide the building blocks for his/her developing mind.

ABC Birds Charlesbridge Publishing

When **Baby Bird** takes a tumble from her mama's nest in the middle of the night, she finds a friend in **Little Frog**.

Curious about Birds Charlesbridge Publishing

From Albatross to Zebra Finch, this stunning, oversized ABC book, developed in conjunction with the American Museum of Natural History, celebrates some of nature's most amazing creatures! Along with extra-large letters and fun facts, bright, detailed photos present 26 beautiful birds whose names each begin with a different letter. Young children will be awestruck as they learn the alphabet and meet cockatoos, flamingos, macaws, and more.

My Numbers Book Houghton Mifflin Harcourt

A charming first book of prayers for baby. Makes a wonderful gift for a new baby. Moms and Grandmoms alike will love this padded, foil-stamped and embossed edition of **My First Book of Prayers**. Baby will love it too as soon as Mom starts reading it.

Every Little Thing Cherry Lake

It's bath time in the animal kingdom! Meet eight little critters from around the world as they clean up, each in their own way. From plunging through a snowdrift to steaming in a hot spring, lyrically simple text and charming painted illustrations introduce little listeners to a world of hygiene. And of course, everyone will recognize the surprise ninth entry at the end! A list at the back of the book

gives the names of each baby animal in the order they appear. This is developmentally appropriate nonfiction for the youngest animal lovers — Kirkus Reviews

Baby Animals Day & Night Charlesbridge

Hello, World! is a series designed to help parents introduce simple nonfiction concepts to their babies and toddlers. Now even the youngest children can enjoy learning about the world around them. Told in simple terms and accompanied by bright, cheerful illustrations, **Hello, World!** makes learning easy for young children and offers useful prompts to the adult reader in order to help them engage with their child on each page. Every young child loves to look up at birds in the sky. Now they can learn all about a variety of birds—with colors, shapes, sizes, and super-simple facts ("Peck, peck, peck! This noisy woodpecker is looking for food inside a tree trunk."). It's a perfect way to bring the outside world of natural science into the busy world of a toddler, where learning never stops.

Starting conversations about the facts of life (From how babies are made to puberty and healthy relationships) Macmillan

Never-before-seen photographs of baby birds of the marshlands from a noted birding photographer Naturalist William Burt is known for seeking out wild places and elusive birds—and none fit the bill quite so well as the creatures featured in this book. This may well be his break out book, featuring the downy young of the wetlands, whose images are full of character and appeal. Most of these birds have never been captured on film until now. From the comic-monster herons to the fuzzy ducklings and stick-legged sandpipers, these tots have personality and spunk. In the wetlands, they come together, drawn by one essential need: for water. These babies then, are birds that get their feet wet; this book is one for bird lovers, naturalists, photographers, and animal lovers. "A perfectionist whose photographs of shy and elusive birds of the wetlands are unquestionably the finest ever taken." —Roger Tory Peterson "What really comes through, in the writing and the photographs, is his deep and sensitive appreciation of the uniqueness of each of these most intriguing birds."—David Allen Sibley

Baby Bird's First Nest *Baby's First Book of Birds & Colors*

From the author of *How Are You Feeling Today?* and *Will You Be My Friend?* comes a brand new picture book all about the birds and the bees (sex education). It's natural for young children to have questions about their bodies and where they came from, but it can seem a daunting task to answer honestly so that they understand the subtleties of puberty, sex, reproduction and relationships, and are comfortable with their bodies. This book uses clear, easy to understand language to answer complex questions about sex and relationships, and covers all manner of tricky subjects from puberty to consent with delicate accuracy and honesty. Filled with bright, fun illustrations and helpful advice for parents and carers, *Let's Talk About the Birds and the Bees* is the perfect book for explaining the facts of life to small children.

Baby's First Book Penguin

The colorful world of birds! Birds come in all different shapes, sizes, and yes, colors, too! From the eastern bluebird and blue jay to the scarlet tanager and northern cardinal, little ones will discover the natural world and learn the names and colors of Phyllis Limbacher Tildes's exquisitely illustrated birds in their natural habitats. The color word appears large and bold, and each bird is labeled by name, as are flowers, fruits, and foliage. Each bird is color coded and has a name and gender for children to easily identify.

Water Babies: The Hidden Lives of Baby Wetland Birds Harper Collins

A stunning album of some of the most beautiful birds in North America. Geraldo Valério is an artist who loves birds, from majestic Golden Eagles and Snowy Owls to brilliant cardinals and jays to the tiniest of hummingbirds. Here he presents his favorites, with beautiful collage illustrations and brief descriptions that highlight intriguing facts about each one. The illustrations show a variety of

feathered creatures in their natural habitats as they hunt for food, impress their mates, nest, and care for their young. The concise, accessible text provides information ranging from clever techniques for finding food to remarkable physical features to fascinating behaviors. But above all, Geraldo Valério shares his passion for birds in this lovingly created album, inspiring young readers with their beauty and the excitement of discovery. Includes an introduction, glossary, index and sources for further information. Correlates to the Common Core State Standards in English Language Arts: CCSS.ELA-LITERACY.RI.K.4 With prompting and support, ask and answer questions about unknown words in a text.

An Artist Looks into the Nest Legare Street Press

"All birds are born to fly," thinks Baby Bird, watching the other hatchlings leave the nest. "I suppose it's now or never..." But one of Baby's wings is twisted and shrunken and not at all like the other one. Instead of flying, Baby plummets to the ground. There, Baby makes a new friend, and learns that sometimes you have to find unexpected ways to achieve your dreams. A moving story about the power of friendship and the importance of accepting yourself just the way you are, this lovely watercolor picture book shows how friends can help you overcome difficulty.

My First Book of Garden Birds Sterling Children's Books

Baby's First Book of Birds & Colors Charlesbridge Publishing

Baby Loves Scientists Bloomsbury Publishing

A sweet tiger cub, padding softly on its paws across the ground. A little lion getting its head nuzzled by mama as they soak in the sun. Two young kangaroos—joeys—at play. An infant chimpanzee, clinging lovingly to its mother's back. Nothing's more irresistible than an animal baby, and with these magnificent photos, kids can meet the cutest ones of all, and their families, too. From two fox kits climbing on logs, to an adorable baby bunny, to a trio of polar bears huddling close to stay warm, to penguins, polar bears, eaglets, and foals, these precious creatures will fascinate human "cubs"—and entice them to look at the pictures over and over again.

[Dot the Bird](#) Charlesbridge Publishing

Sleepy babies and wide-awake babies, day and night. This companion to Pyllis Limbacher Tildes's *Baby Animals Black and White* and *Baby Animals Spots and Stripes*, *Baby Animals Day and Night* introduces diurnal and nocturnal animals in lovingly detailed black and white images, perfect for developing eyes. Meet otter, bobcat, and a host of other baby critters wild and domestic as they go about their daily and nightly routines! Sweet and simple, introducing the love of books to even the very youngest babies is fun and easy with this adorable board book.

RSPB First Book of Birds Astra Publishing House

Babies who love science can be anything! Move over Wonder Woman and Superman--here come Aerospace Engineer and Particle Physicist! Baby loves to explore the world of science! What's next for Baby after learning about physics, engineering, computers, and the natural world? Becoming a scientist of course! In this fun look at several scientific careers, parents and children can talk about

different science fields and the everyday heroes that work in them. Beautiful, visually stimulating illustrations complement age-appropriate language to encourage baby's sense of wonder. Parents and caregivers may learn a thing or two as well.

The Definitive Guide to the Evolutionary Biology of Sex Doubleday Books for Young Readers

While one page presents specific information which serves as a clue to the identity of a particular black and white animal, the next page reveals the name of the animal.

[RSPB First Book of Mammals](#) Orchard Books (NY)

Hear the songs and learn about 12 of North America's woodland birds. Being able to identify a bird's song is a skill that brings joy and fosters an appreciation of nature. Some bird songs are distinctive and easily recognized, like the common loon and wild turkey. Hawks as a group are distinctive but the individual species vary, as do the owls. Picking up the songs of a Black-capped Chickadee and a White-breasted Nuthatch, however, is not easy. That is where this enchanting book comes into its own. The *Little Book of Woodland Bird Songs* features recordings of twelve bird songs from some of the best-known woodland species seen and heard in North America. It is an interactive board book that is ideal for curious young readers. The sturdy pages are easy to turn and the twelve song buttons, each with a portrait of the bird, are easy to activate. The high-quality sound module is encased in durable plastic and the one-inch (3-cm) speaker makes it easy to hear and differentiate the elements of the bird's song, such as pitch, tempo and trills. Beautiful lifelike illustrations aid in identifying the birds and a descriptive paragraph and facts panel provide information such as the time of day the bird is likely to sing, what it eats, behavior traits and how it constructs its nest. All twelve birds have winter or summer ranges in the United States or Canada. This means that readers are sure to see most if not all the birds in at least one season over the year. Red Crossbill Sharp-shinned Hawk Hermit Thrush Blue-gray Gnatcatcher Black-capped Chickadee Purple Finch Common Loon Barred Owl Red-eyed Vireo Wild Turkey White-breasted Nuthatch Downy Woodpecker. Birds can be hard to spot at the best of times and never more so than in the woods. Once you learn to recognize these bird sounds, a walk through the forest will never be the same. This partner to *The Little Book of Backyard Bird Songs* is sure to become another family favorite.
