Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

This book contains the papers presented at the 20th UK Workshop on Computational Intelligence (UKCI 2021), held virtually by Aberystwyth University, 8–10th September 2021. This marks the 20th anniversary of UKCI; a testament to the increasing role and importance of Computational Intelligence (CI) and the continuing interest in its development. UKCI provides a forum for the academic community and industry to share ideas and experience in this field. EDMA 2021, the 4th International Engineering Data- and Model-Driven Applications workshop, is also incorporated and held in conjunction with UKCI 2021. Paper submissions were invited in the areas of fuzzy systems, neural networks, evolutionary computation, machine learning, data mining, cognitive computing, intelligent robotics, hybrid methods, deep learning and applications of CI.

How do the rich get rich? An updated edition of the "remarkable" New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don't live in Beverly Hills or on Park Avenue. They live next door. America's wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don't realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as "rich" are actually a tiny minority of America's truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, *The Millionaire Next Door* was a groundbreaking examination of America's rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the financial crash and the twenty-first century. "Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today's earn-and-consume culture." —Library Journal

Jakou výbavu měla speciální série vozů Aston Martin, nazvaná Alfred Dunhill? Jak souvisí logo

Maserati s fontánou z 16. století? Je slovo Aero spojeno jen s českou automobilkou, nebo najdeme vozy tohoto jména i v jiných částech světa? Co přesně jsou „daňové koně“? Vymysleli název Citroën Elysée Číňané? Jak ovlivnil vývoj automobilového průmyslu fakt, že zakladatelé značek Ferrari a Lamborghini spolu nevycházel? Ing. Jiří Fiala (publicista, automobilový historik a sběratel automobilové literatury) a doc. Petr Strossa (vědec, expert přes jazyky a dorozumívání s počítači) předkládají všem automobilovým fanatikům unikátní výkladový slovník jmen značek a jejich typů, který obsahuje hesla o přibližně 1600 značkách a více než 5000 typech a modelech. Čtenáři v knize najdou mimo jiné základní informace o výrobcích automobilů, jejich filozofii označování typů, používání interních kódů či recyklování názvů vozů. Dozvědí se, proč se jeden automobil prodával pod různými názvy, proč se některá jména nesměla používat nebo jakých dosáhly jednotlivé vozy sportovních úspěchů. Vůbec poprvé je u nás pak publikován systém kódů sovětských vozidel a přehled čínských značek a výrobců. Zvláštní pozornost je věnována znakům (logům) všech důležitých značek, jejich vzniku a proměnám v čase. Celá tato speciální problematika je navíc zasazena do kontextu společenských a geopolitických událostí a okořeněná množstvím pozoruhodných historek a kuriozit souvisejících s auty, jejich jmény a výrobci.
