Modernist understandings of technology effectively insulated infrastructure from the gaze of anthropologists, as a domain of technical solutions and arrangements that were independent of the political and the lived experience (Graham, Thrift 2007). ANTHROPOLOGY OF INFRASTRUCTURE Cultural Anthropology has published many articles that present and analyze situations where people create and interact with networks that

facilitate flows of value. Rather than considering infrastructure to be something with static effects, anthropological approaches to the study of infrastructure look for its construction and maintenance through everyday practices in particular ethnographic contexts.
