Introduction to Infant Development: Canadian Edition, Book

...The Canadian Paediatric Society recommends the use of an infant formula based on extensively hydrolyzed protein for the formula-fed infant with a cow milk protein allergy (CPS, 2009). When a diagnosis of non-IgE-mediated cow milk protein allergy can be ruled out, the use of soy-based infant formula may be considered (CPS, 2009).

Nutrition for Healthy Term Infants:
Recommendations from ...Health Canada currently recommends breastfeeding infants exclusively until they are 6 months old, while acknowledging that in individual practice, signs of infant readiness may guide the introduction of complementary foods a few weeks earlier. There is emerging evidence that early food introduction, between 4 to 6 months of age, ...Timing of introduction

of allergenic solids for infants at ...Recommendations for the introduction of common allergens to infants has changed over the last few years as research has emerged on ways to help prevent the development of food allergy in babies. In 2019, the Canadian Paediatric Society (CPS) released updated recommendations on the specific timing of early introduction of allergenic foods for high-risk infants. The new guidance is to actively offer non-choking forms of foods containing common allergens (e.g. peanuts, egg) around 6 months of ...Early introduction - Food Allergy Canada
