 This short account of the discipline of archaeology tells of spectacular discoveries and the colorful lives of the archaeologists who made them, as well as of changing theories and current debates in the field. Spanning over two thousand years of history, the book details early digs as well as covering the development of archaeology as a multidisciplinary science, the modernization of meticulous excavation methods during the twentieth century, and the important discoveries that led to new ideas about the evolution of human societies. A Brief History of Archaeology is a vivid narrative that will engage readers who are new to the discipline, drawing on the authors' extensive experience in the field and classroom. Early research at Stonehenge in Britain, burial mound excavations, and the exploration of Herculaneum and Pompeii culminate in the nineteenth century debates over human antiquity and the theory of evolution. The book then moves on to the discovery of the world's pre-industrial civilizations in Egypt, Mesopotamia, and Central America, the excavations at Troy and Mycenae, the Royal Burials at Ur, Iraq, and the dramatic finding of the pharaoh Tutankhamun in 1922. The book concludes by considering recent sensational discoveries, such as the Lords of Sipán in Peru, and exploring the debates over processual and postprocessual theory which have intrigued archaeologists in the early 21st century. The second edition updates this respected introduction to one of the sciences' most fascinating disciplines.

 Archaeology, Language, and the African Past is an overview of theories and methods, a fusion of African linguistics and archaeology. Roger Blench provides a comprehensive look at the history of all African language families, incorporating the latest linguistic classifications, current evidence from archaeology, genetic research, and recorded history. This original and definitive volume examines the economic culture of the continent—from major crops and plant life to animals and livestock—from a multi-dimensional perspective. It provides students of linguistics, archaeology, and anthropology with a critical discussion on the history of African languages and the cultures they articulate.

 In History, Archaeology and the Bible Forty Years after "Historicity", Hjelm and Thompson argue that a 'crisis' broke in the 1970s, when several new studies of biblical history and archaeology were published, questioning the historical-critical method of biblical scholarship. The crisis formed the discourse of the Copenhagen school's challenge of standing positions, which—together with new achievements in archaeological research—demand that the regional history of ancient Israel, Judaea and Palestine be reconsidered in all its detail. This volume examines the major changes that have taken place within the field of Old Testament studies since the ground breaking works of Thomas Thompson and John van Seters in 1974 and 1975 (both republished in 2014). The book is divided in three sections: changing perspectives in biblical studies, history and cult, and ideology and history, presenting new articles from some of the field's best scholars with comprehensive discussion of

historical, archaeological, anthropological, cultural and literary approaches to the Hebrew Bible and Palestine's history. The essays question: "How does biblical history relate to the archaeological history of Israel and Palestine?" and "Can we view the history of the region independently of a biblical perspective?" by looking at the problem from alternative angles and questioning long-held interpretations. Unafraid to break new ground, History, Archaeology and the Bible Forty Years after "Historicity" is a vital resource to students in the field of Biblical and East Mediterranean Studies, and anyone with an interest in the archaeology, history and religious development in Palestine and the ancient Near East.

James Delle has solved a number of problems in Caribbean archaeology with *An Archaeology of Social Space*. He deals with most of the problems by using historical archaeology, and clearly implicates Americanist prehistorians. Although this book is about coffee plantations in the Blue Mountains area of Jamaica, it is actually about the whole Caribbean. Just as it is about all archaeology, not only historical archaeology, it is also a book about colonialism and national independence and how these two enormous events happened in the context of eighteenth and nineteenth century capitalism. The first issue raised appears to be an academic topic that has come to be known as landscape archaeology. Landscape archaeology considers the planned spaces around living places. The topic is big, comprehensive, and new within historical archaeology. Its fundamental insight is that in the early modern and modern worlds everything within view could be made into money. Seeing occurs in space and from 1450, or a little before, everything that could be seen could, potentially, be measured. The measuring—and the accompanying culture of recording called a scriptural economy—became a way of controlling people in space, for a profit. Dr. Delle thus explores maps, local philosophies of settlement, town dwelling, housing, and the actual condition of plantations and their buildings now, so as to describe coffee-Jamaica from 1790-1860.

This book provides a short, readable introduction to historical archaeology, which focuses on modern history in all its fascinating regional, cultural, and ethnic diversity. Accessibly covering key methods and concepts, including fundamental theories and principles, the history of the field, and basic definitions, Historical Archaeology also includes a practical look at career prospects for interested readers. Orser discusses central topics of archaeological research such as time and space, survey and excavation methods, and analytical techniques, encouraging readers to consider the possible meanings of artifacts. Drawing on the author's extensive experience as an historical archaeologist, the book's perspective ranges from the local to the global in order to demonstrate the real importance of this subject to our understanding of the world in which we live today. The third edition of this popular textbook has been significantly revised and expanded to reflect recent developments and discoveries in this exciting area of study. Each chapter includes updated case studies which demonstrate the research conducted by professional historical archaeologists. With its engaging approach to the subject, Historical Archaeology continues to be an ideal resource for readers who wish to be introduced to this rapidly expanding global field. "

This edited volume gathers contributions focused on understanding the environment through the lens of Historical Archaeology. Pressing issues such as climate change, global warming, the Anthropocene and loss of biodiversity have pushed scholars from different areas to examine issues related to the causes, processes, and consequences of these phenomena. While traditional barriers between natural and social sciences have been torn down, these issues have gradually occupied a

central place in the field of anthropology. As archaeology involves the transdisciplinary study of cultural and natural evidence related to the past, it is in a privileged position to discuss the historical depth of some of the processes related to environment that are deeply affecting the world today. This volume brings together substantial and comprehensive contributions to the understanding of the environment in a historical perspective along three lines of inquiry: Theoretical and methodological approaches to the environment in Historical Archaeology Studies on environmental Historical Archaeology Historical Archaeology and the Anthropocene Historical Archaeology and Environment will be of interest to researchers in both social and environmental sciences, working in different disciplines and research areas, such as archaeology, history, geography, anthropology, climate change studies, environmental analysis and sustainable development studies.

This unique book offers a theoretical framework for historical archaeology that explicitly relies on network theory. Charles E. Orser, Jr., demonstrates the need to examine the impact of colonialism, Eurocentrism, capitalism, and modernity on all archaeological sites inhabited after 1492 and shows how these large-scale forces create a link among all the sites. Orser investigates the connections between a seventeenth-century runaway slave kingdom in Palmares, Brazil and an early nineteenth-century peasant village in central Ireland. Studying artifacts, landscapes, and social inequalities in these two vastly different cultures, the author explores how the archaeology of fugitive Brazilian slaves and poor Irish farmers illustrates his theoretical concepts. His research underscores how network theory is largely unknown in historical archaeology and how few historical archaeologists apply a global perspective in their studies. A Historical Archaeology of the Modern World features data and illustrations from two previously unknown sites and includes such intriguing findings as the provenance of ancient Brazilian smoking pipes that will be new to historical archaeologists.

"By analyzing what she describes as richly detailed archaeological site biographies, De Cunzo reconstructs how Delaware's farming people actively created their identities and shaped their interactions at home, at work, at church, and in the marketplace as they began to confront industrial capitalism. Informed by a contextual, interpretive perspective, this valuable work reveals the complex interrelationships among environment, technology, economy, social order, and cultural praxis that defined the "cultures of agriculture" in Delaware during the last three centuries."--Jacket.

Historical Archaeology The Cambridge Companion to Historical Archaeology provides an overview of the international field of historical archaeology (c.AD 1500 to the present) through seventeen specially-commissioned essays from leading researchers in the field. The volume explores key themes in historical archaeology including documentary archaeology, the writing of historical archaeology, colonialism, capitalism, industrial archaeology, maritime archaeology, cultural resource management and urban archaeology. Three special sections explore the distinctive contributions of material culture studies, landscape archaeology and the archaeology of buildings and the household. Drawing on case studies from North America, Europe, Australasia, Africa and around the world, the volume captures the breadth and diversity of contemporary historical archaeology, considers archaeology's relationship with history, cultural anthropology and other periods of archaeological study, and provides clear introductions to alternative conceptions of the field. This book is essential reading for anyone studying or researching the material remains of the recent past.

Archaeology of Louisiana provides a groundbreaking and up-to-date overview of archaeology in the Bayou State, including a thorough analysis of the cultures, communities, and people of Louisiana from the Native Americans of 13,000 years ago to the modern historical archaeology of New Orleans. With eighteen chapters and twenty-seven distinguished contributors, Archaeology of Louisiana brings together the studies of some of the most respected archaeologists currently working in the state, collecting in a single volume a range of methods and theories to offer a comprehensive understanding of the latest archaeological findings. In the past two decades alone, much new data has transformed our knowledge of Louisiana's history. This collection, accordingly, presents fresh perspectives based on current information, such as the discovery that Native Americans in Louisiana constructed some of the earliest-known monumental architecture in the world—extensive earthen mounds—during the Middle Archaic period (6000–2000 B.C.) Other contributors consider a variety of subjects, such as the development of complex societies without

agriculture, underwater archaeology, the partnering of archaeologists with the Caddo Nation and descendant communities, and recent research in historical archaeology and cultural resource management that promises to transform our current appreciation of colonial Spanish, French, Creole, and African American experiences in the Lower Mississippi Valley. Accessible and engaging, Archaeology of Louisiana provides a complete and current archaeological reference to the state's unique heritage and history.

A lively and accessible introduction to themes and debates in archaeological theory for students of all levels Archaeological Theory is a relatable, accessible, reader-friendly first step into the world of theory for archaeology students. Recognizing that many students shy away from the study of theory for fear that the material is too difficult or obscure, Archaeological Theory maintains that any student can develop an understanding of theory and that a knowledge of theory will lead to better practice. As one of the leading texts for introductory courses in archaeology and archaeological theory, it has provided many students with the essential foundation for a complete education in the discipline. With a focus on clarifying the history and development of archaeological theory, this valuable text serves as a roadmap to the different schools of theory in archaeology, clarifying the foundations of these schools of thought, the relationships between them, and the ideas that distinguish each from the other. Students will also learn about the relationship between archaeology and cultural and political developments, the origins of New and 'post-processual' archaeology, and current issues shaping the field. Written in a clear and informal style and incorporating examples, cartoons, and dialogues, this text provides an ideal introduction for students at all levels. The revised third edition has been updated with new and revised chapters and an expanded glossary and bibliography, as well as new readings to guide further study. Engages readers with informal and easy-to-understand prose, as well as examples, cartoons, and informal dialogues Prepares students to understand complex topics and current and perennial issues in the field such as epistemology, agency, and materiality in the context of archaeological practice Discusses current developments in associated disciplines New and revised chapters on the material turn, politics and other issues, and an expanded glossary and bibliography with updated reading suggestions Offers expanded coverage of materiality, cultural-historical archaeology, evolutionary theory, and the work of scholars of diverse backgrounds and specializations Engaging and illuminating, Archaeological Theory is an indispensable resource for undergraduate and graduate students in archaeology and related disciplines.

The recent work of anthropologists, historians, and historical archaeologists has changed the very essence of military history. While once preoccupied with great battles and the generals who commanded the armies and employed the tactics, military history has begun to emphasize the importance of the "common man" for interpreting events. As a result, military historians have begun to see military forces and the people serving in them from different perspectives. The Historical Archaeology of Military Sites has encouraged efforts to understand armies as human communities and to address the lives of those who composed them. Tying a group of combatants to the successes and failures of their military commanders leads to a failure to understand such groups as distinct social units and, in some instances, self-supporting societies: structured around a defined social and political hierarchy; regulated by law; needing to be supplied and nurtured; and often at odds with the human community whose lands they occupied, be they those of friend or foe. The Historical Archaeology of Military Sites will afford students, professionals dealing with military sites, and the interested public examples of the latest techniques and proven field methods to aid understanding and conservation of these vital pieces of the world's heritage.

What is historical archaeology and why is it important? Well-known archaeologist Barbara Little addresses these key questions for introductory students in this concise, inexpensive, and well-written text. Little covers the goals of historical archaeological work, the kinds of questions it asks, and the ethical and political concerns it raises. She shows what historical archaeology can provide that neither of its parent disciplines can offer alone. Little offers brief snapshots of key American sites: Jamestown, Mission San Luis, West Oakland, the African American Burial Ground, and the Garbage Project, among others. And she shows how historical archaeology is inextricably linked to public education, justice issues, and our collective understanding of the past. As an introductory guide for historical archaeology and similar courses, or as thought-provoking reading for professionals, this volume is unmatched in quality and scope.
