 Economics and Political Sciences.
 Abstract. The portfolio selection problem
 is traditionally modelled by two different
 approaches. The first one is based on an
 axiomatic model of risk-averse
 preferences, where decision makers are
 assumed to possess an expected utility
 function and the ... Reward-Risk Portfolio
 Selection and Stochastic Dominance
 ... Diversification is a fundamental
 concept in economics, decision theory,
 and finance, but the way in which it is
 implemented in the real world varies
 greatly. This paper asks how elementary
 the notion of diversification is by
 studying whether children apply it as a
 choice heuristic. We report on ... How
