Mechatest Sampling Solutions is a global company and well known for it's intelligent steam and water sampling, collection and analyser solutions. The Steam and Water Analysis Systems (SWAS) solutions are designed with worlds best-in-class instrumentation parts to keep the reability of your water steam analysis safe at all times and to protect

your plant from corrosion and scaling. SWAS solutions - Steam and Water Analysis Systems (SWAS ... Compact Steam/Water Analysis System (SWAS) Compact SWAS panel solution for a reliable and safe monitoring of water and steam circuits. SWAS Compact is a solution for industrial steam generators that efficiently monitors the water quality and fits neatly into your system, requiring very little space. Compact Steam/Water Analysis System (SWAS) In a typical power plant, water and steam are in constant contact with metal surfaces, and corrosion is ever-present. The working fluid - water - threatens the integrity of the plant equipment :

condensers, heaters, pumps, piping, boilers and turbines. A major goal of plant chemical control is preventing solids buildup and corrosion in the plant. Brochure: Steam and Water Analysis System Brochure To prevent damage of steam turbine, steam boiler and other apparatus due to scaling and corrosion, on line steam and water analysis of critical parameters such as pH, Conductivity, Dissolved Oxygen, Silica, Sodium, Phosphate etc. is a must. The steam can be as hot as 560°C. The pressures can be as high as 250 bar.
