The workforce today is facing ever increasing demands for higher productivity, usually at the severe cost of decreasing quality of work life and private life. Inhibited by limiting beliefs, decreasing motivation and the burden of past negative experiences, many employees have a hard time coping, even with their normal, daily challenges. Motivational speakers come and go, people are "high" for a week or so, but then they dive back into despair. This book addresses this problem, namely how to achieve higher productivity without sacrificing the quality of work life or private life. It also describes how this problem can be solved by utilizing Neuro-Linguistic Programming interventions. The research, which this book is based on, proves that lasting positive changes can be induced in a short period of time, and that a significant increase in work life quality has a profound influence on productivity. This

ground-breaking book contains descriptions of the research, the processes utilized, and the results achieved in an easy to read format.

This celebrated book, newly revised and updated, is a comprehensive treatment of organizational training and development: its basic ideas, organizational goals, and practical techniques. Dugan Laird, noted trainer, consultant, and author, shares his considerable experience in the whole field of human resource development and job-related training. The key to this book's ongoing popularity is its practicality: Laird's concern with the real-life problems and needs of T&D professionals. When and how should training be used, and what methods and techniques have worked and will work? The author's answers are supplemented by simple-to-follow process charts that outline each step of an effective training system. For this Second Edition, Laird has added material on new training technologies such as video and computer assisted instruction, explaining how and when they should be used to supplement traditional instructional techniques. How do you find training needs? What do you do when you don't give training? Learning objectives: who needs them? How do people learn? How important is teaching technique?
