JOHN SINGH

Geriatric Nursing Springer Publishing Company

Praise for previous editions: "The evidence-based protocols are designed as a primary reference and are useful, substantive, and timely....The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice." --The Gerontologist "As a gerontological clinical educator/research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice." Score: 97 --Doodys The result of a collaboration between expert practitioners and educators in geriatric nursing, the seventh edition of this acclaimed reference has been updated and revised with new information on chronic conditions and emerging models of care presented in 10 completely new chapters. It provides the most current, evidence-

based protocols for improving both quality of care and patient outcomes when caring for older adults in multiple disciplines and settings. As in past editions, the seventh edition is distinguished by its use of a rigorous systematic method (AGREE: Appraisal of Guidelines for Research and Evaluation) to improve the validity of the book's evidence-based content. Chapters provide assessment and management principles, clinical interventions, and information on specialty practice and models of care. Included in most chapters are protocols developed for each clinical condition by experts in that specific area. Evidence is current and derived from all settings of care, including community, primary, acute, and long-term care. Protocols include an overview and evidence-based assessment and intervention strategies. Illustrative case studies with discussion are presented in most chapters, along with chapter objectives and references with evidence ratings. Instructor's resources include an AACN Mapping Grid, Course Cartridge, Transition Guide, PowerPoints, and Test Bank. New to the Seventh Edition: Updated to encompass the latest trends in older adult care, chronic conditions, and emerging models of care New chapters on care and management of diabetes and respiratory care New chapters on issues surrounding nutrition and

dementia, and mental illness New chapter on care and comfort at the end of life New chapters on adopting principles of diversity, equity, and inclusion and an age-friendly health system into practice New chapters on models of care in long-term, community-based, and primary care Key Features: Delivers easy-to-follow geriatric protocols for best practices Updates evidence regularly to reflect current practice standards Encompasses a broad scope of content including detailed information rarely covered in professional literature Offers case studies and discussions to illustrate application of protocol to practice Written by renowned leaders in geriatric nursing education and practice Use of AGREE (Appraisal of Guidelines for Research and Evaluation) to improve the validity of evidence throughout the text Gerontological Nursing Competencies for Care SIGMA Theta Tau International, Center for Nursing Press

Written for the nurse who is responsible for the provision of care to elderly persons with interventions that are appropriate and interdisciplinary Handbook of Gerontological Nursing Cengage Learning

"Gerontological Nursing: Competencies for Care, Fourth Edition focuses on caring for the elderly by employing a holistic and interdisciplinary approach. The text follows the framework of the core competencies for baccalaureate nursing education published by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. This framework is structured to ensure nursing students attain the recommended knowledge to achieve the competencies necessary to provide excellent care to older adults."--Back cover.

Gerontological Nursing Springer Publishing Company

These are exciting and challenging times for gerontological nursing. Nurses are at center stage for defining and improving health care for our nation's older adults. "Ways of Knowing and Caring for the Older Adult" is a powerful resource on the broad range of issues that face nurses seeking excellence in this increasingly important specialty. Any health care professional who works with the elderly will benefit greatly from this outstanding collection of scholarly and experiential papers.

Gerontological Nursing Review Springer Publishing Company

Essentials of Gerontological Nursing presents the best practices needed to care for older adults. Its brief, yet comprehensive, grasp of issues in elder care is a refreshing addition to the current literature, which is more commonly focused on theory than on clinical practice. Designed primarily for students in gerontological nursing courses in BSN and graduate programs, the book provides: Essential clinical information and "best practices" needed to care for older adults Current research and new patient approaches in gerontological nursing Overviews of rarely discussed issues, such as elder abuse, cultural considerations, and restraint alternatives Clinical specifications and practical applications Content designed to fit into a one-semester course Essentials of Gerontological Nursing is everything the nursing student needs to know when caring for older adults.

Essentials of Gerontological Nursing Lippincott Williams & Wilkins

Fourth Edition Named a 2013 Doody's Core Title! Praise for the Fourth Edition: The evidence-based protocols are designed as a primary reference and are useful, substantive, and timely...The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice." --The Gerontologist As a gerontological clinical educator/research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice. Score: 97, 5 Stars. --Doody's The new fifth edition of one of the premier references for geriatric nurses in hospital, long-term, and community settings, delivers current guidelines, real-life case studies, and evidence-based protocols developed by master educators and practitioners. With a focus on improving quality of care, cost-effectiveness, and outcome, the fifth edition is updated to provide the most current information about care of common clinical conditions and issues in older adults. Several new expert contributors present current guidelines about hip fractures, frailty, perioperative and postoperative care, palliative care, and senior-friendly emergency departments. Additionally, chapters have been reorganized to enhance logical flow of content and easy information retrieval. Protocols are organized in a consistent format and include an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, protocols are embedded within chapter text, providing the context and detailed evidence for each. Chapter objectives, annotated references, and evidence rating for each protocol are provided along with resources for additional study. New to the Fifth Edition: Reorganized to enhance logical flow of information and ease of use Updated and revised Includes new contributions from expert educators and practitioners Provides new chapters on perioperative and postoperative care, general surgical care, care of hip fracture, palliative care, and the senior-friendly emergency department Key Features: Delivers evidence-based, current guidelines and protocols for care of common clinical conditions in the elderly Illustrates application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known geriatric leaders who are endorsed by the Hartford Institute for Geriatric Nursing Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles **Strategies for Long-term Care** McGraw-Hill Companies

Gerontologic Nursing - E-Book Springer Publishing Company

Designated a Doody's Core Title! This twentieth volume of this landmark series focuses on geriatric nursing research. Clinicians, educators, students, and researchers will find an up-to-date synthesis

of nursing research relating to over a dozen important topics, including pain, pressure ulcers, dementia, home health and hearing impairment. Future-oriented topics include the implication of genetics and telehealth for geriatric care. Distinguished contributors include Mary Taylor, Patricia Flatley Brennan, and Terry Fulmer.

Gerontology Nursing Case Studies, Second Edition Singular

This book is designed to help clinicians, administrators, students, and families attain the goal of restraint-free care of the elderly. Written by leading experts in the field, the book contains specific strategies for understanding behavior, making constructive changes in the individual's environment, and managing the risk of falls and interference with necessary treatments. It is organized in outline form to highlight critical material and to be readily adaptable as a quick reference. The authors use individualized care as the book's underlying philosophy. The goals of individualized care include promoting comfort and safety, optimizing function and independence, and achieving the greatest possible quality of life. Such care requires clinicians to make sense of behavior rather than to control responses of clients. Numerous case studies, tables, and figures illustrate this practical and information-packed manual. Lists of resources are also included.

Evidence-Based Geriatric Nursing Protocols for Best Practice Tiresias Press, Incorporated Learn a positive, uniquely Canadian approach to older adult care. Canada's rapidly aging population will place an unprecedented burden on the health care system and on tomorrow's nurses. It is critical that health care professionals be properly equipped to address the needs and comfort of your older adult patients and clients. Ebersole and Hess' Gerontological Nursing and Healthy Aging, First Canadian Edition includes statistics, legislation, practice guidelines, standards of care, and examples relevant to Canadian practice. Chronic disorders are presented in the framework of health promotion and illness prevention. Canadian demographics and statistics Canadian practice guidelines Canadian law Roles of Canadian health care providers CNA code of ethics Canadian drug names Canadian lab values Canadian research findings Canadian assessment tools Canadian screening guidelines

Geriatric Nursing Protocols for Best Practice Springer Publishing Company

A new and updated version of this best-selling resource! Jones and Bartlett Publisher's 2011 Nurse's Drug Handbook is the most up-to-date, practical, and easy-to-use nursing drug reference! It provides: Accurate, timely facts on hundreds of drugs from abacavir sulfate to Zyvox; Concise, consistently formatted drug entries organized alphabetically; No-nonsense writing style that speaks your language in terms you use everyday; Index of all generic, trade, and alternate drug names for quick reference. It has all the vital information you need at your fingertips: Chemical and therapeutic classes, FDA pregnancy risk category and controlled substance schedule; Indications and dosages, as well as route, onset, peak, and duration information; Incompatibilities, contraindications; interactions with drugs, food, and activities, and adverse reactions; Nursing considerations, including key patient-teaching points; Vital features include mechanism-of-action illustrations showing how drugs at the cellular, tissue, or organ levels and dosage adjustments help individualize care for elderly patients, patients with renal impairment, and others with special needs; Warnings and precautions that keep you informed and alert.

Gerontological Nursing Elsevier Health Sciences

This convenient and easy-to-use pocket-sized reference provides gerontology nurses with the foundational knowledge they need to provide all aspects of safe, effective care to older patients. It contains crucial evidence-based information that enables nurses to differentiate between normal and abnormal findings, understand the presentation and management of common diseases of the gerontological population, and integrate age-specific considerations into care planning and implementation with older adults. Pervading the resource is a holistic approach in which all facets of the individual: physical and mental health, emotional and spiritual wellbeing, self-care, family relationships, and unique risks for this population, are considered. Designed for daily use, the guide is consistently organized in bullet-point Fast Facts style for easy access to information. Also included are such helpful features as "Clinical Snapshots" and "Fast Facts in a Nutshell" to reinforce content and aid in speedy information retrieval. A resources section guides nurses to additional information on each topic. Key Features: Presents all aspects of current evidence-based practice in gerontology in user-friendly style Uses a holistic approach that considers all facets of the individual Provides key information that demonstrates the impact of aging on assessing, planning, and implementing care Features "Clinical Snapshots" and "Fast Facts in a Nutshell" for speedy information retrieval Includes information on gerontology care that is needed daily **Journal of Gerontological Nursing 26(10)**. Springer Publishing Company

The Fifth Edition of this popular text continues to present--in a clear, concise manner--essential information on nursing care of the elderly. This edition offers updated content and an emphasis on holistic approaches to care. A "Point to Ponder" feature has been added, challenging students to examine how their own views and experiences influence their caregiving attitudes. Increased information on alternative and complementary therapies has been added. This book helps students deal with the challenges of providing services to the elderly in a variety of service settings, from hospitals to long-term care facilities. Other features include: a vivid two-color design; chapter outlines and learning objectives; key concepts and critical thinking exercises; and refined artwork that illustrates key concepts. Instructor's Manual and Testbank free to adoptors. A Brandon-Hill Recommended Title.

Ebersole and Hess' Gerontological Nursing and Healthy Aging, Canadian Edition - E-Book Springer Publishing Company

Compassionately care for the aging population with Gerontologic Nursing, 6th Edition, uniquely known for its comprehensive coverage of the most common medical-surgical problems associated with older adults. Organized by body system for easy retrieval of information, it delves into health promotion and both basic and complex gerontologic concepts and issues. This disorder-focused gerontologic nursing text features an enhanced focus on nursing management and care coordination across health care delivery settings. It emphasizes topics such as nutrition, chronic illness, emergency treatment, patient teaching, home care, and end-of-life care — and includes the latest guidelines for mammograms, colonoscopies, pneumonia, and shingles vaccinations. With the addition of new nursing theories, this edition offers a valuable framework for gerontologic care. - Overview of age-related changes in structure and function included in all body system chapters. - The most current standards and guidelines keep you in the know. - Psychologic and sociocultural issues and aspects of older adult care integrated throughout the text. - Critical thinking questions included at end of chapters. - UNIQUE! Patient/Family Teaching boxes emphasize key aspects of practice and teaching for self-care. - Health Promotion/Illness Prevention boxes provide tips to promote leading a healthy life. - UNIQUE! Nutritional Consideration boxes demonstrate special nutritional needs and concerns facing the aging population. - Evidence-Based Practice boxes pull the critical evidence-based information contained in the text into boxes for easy access and identification. - Cultural Awareness boxes highlight differences in how key concepts are understood or practiced in various cultures. - Home Care boxes highlight tips to promote practical, effective home care for the older adult. - Key Points at end of chapters summarize the important concepts discussed in the chapter. - EXPANDED! Increased focus on nursing management and care coordination across health care delivery settings. - NEW! New nursing theories in chapter 2 provide a framework for gerontologic care. - UPDATED! Up-to-date guidelines for mammograms, colonoscopies, pneumonia, and shingles vaccinations. - UPDATED! Fall prevention updates help you better protect your patients. - UPDATED! Updates on the challenges of caring for older adults with cognitive disorders ensure you are prepared. - UPDATED! Updated chapters throughout reflect the current evidence to guide practice.

Ways of Knowing and Caring for Older Adults Jones & Bartlett Learning

Designated a Doody's Core Title! "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics." Score: 90, 4 Stars. -Doody's Medical Reviews "Donna Bowles's Gerontology Nursing Case Studies is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice."--The Gerontologist "The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills." Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing "This is a terrific text that provides nurses and other health care providers [with] good basic information about clinical problems and challenges

we face in providing care to older adults. It should be considered required reading in all undergraduate programs." --From the foreword by Barbara Resnick, PhD, CRNP, FAAN, FAANP Professor, University of Maryland School of Nursing Sonya Ziporkin Gershowitz Chair in Gerontology At the heart of this unique volume are 100 case studies of older adults that address nearly every issue-physical, mental, and psychosocial-that may confront health care providers who work with the aging population. These case studies, culled from contributors with several centuries' worth of combined nursing expertise, are designed to guide nursing students in the development of interventions that encompass both complementary and alternative health strategies. Exercises interspersed throughout each case study are designed to foster critical thinking and decision-making skills. These case narratives provide a holistic approach to problem solving in regard to political, ethical, and legal issues; loss and end-of-life issues; elder abuse; depression, addiction and suicide; self-esteem and family relationships; sexuality; age-related health issues; cognitive impairment; cultural diversity as it relates to aging; pain management; and sleep disturbances. The volume also addresses such contemporary psychosocial issues as gambling addiction, hoarding behavior, emergency preparedness, the aging driver, and long-distance caregiving. Key Features: Provides 100 evidence-based case studies Cultivates development of critical thinking and decision-making skills Features realistic, contemporary scenarios Designed for use across the gerontology nursing curriculum Geared for AACN and NLN Accreditation Organized according to the needs of actual clinical settings

Evidence-Based Geriatric Nursing Protocols for Best Practice Jones & Bartlett Publishers
 Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. Gerontological Nursing: Competencies for Care, Second Edition is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. This innovative text is the first of its kind to have over 40 contributing authors from many different disciplines. Some of the key features of the text include chapter outlines, learning objectives, discussion questions, personal reflection boxes, case studies and more!

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. This text covers the theory and practice of wellness-oriented gerontological nursing, addressing both physiologic and psychosocial aspects of aging. Organized around the author's unique Functional Consequences Theory, the book explores age-related changes as well as the risk factors that often interfere with optimal health and functioning. Key features include: NEW! Technology to Promote Wellness in Older Adults boxes describe examples of technology-based interventions that can be effective for promoting wellness for older adults. NEW! Interprofessional Collaboration (IPC) material, which is found in boxes or is highlighted with orange bars in the margins, indicates the responsibilities of nurses to collaborate with other professionals and paraprofessionals in health care and community-based settings when caring for older adults. NEW! Global Perspective boxes provide examples of the various ways in which health care professionals in other countries provide care for older adults. NEW! Unfolding Patient Stories, written by the National League for Nursing, are an engaging way to begin meaningful conversations in the classroom. These vignettes, which open each unit, feature patients from Wolters Kluwer's vSim for Nursing | Gerontology (co-developed with Laerdal Medical) and DocuCare products; however, each Unfolding Patient Story in the book stands alone, not requiring purchase of these products. For your convenience, a list of these case studies, along with their location in the book, appears in the "Case Studies in This Book" section later in this frontmatter. NEW! Transitional Care Unfolding Case Studies, which unfold across Chapters 27 through 29, to illustrate ways in which nurses can provide effective transitional care to an older adult whose progressively worsening condition requires that her needs be met in several settings. For your convenience, a list of these case studies, along with their location in the book, appears in the "Case Studies in This Book" section later in this frontmatter. Updated unfolding case studies illustrate common experiences of older adults as they progress from young-old to old-old and are affected by combinations of age-related changes and risk factors. Evidence-based information is threaded through the content and summarized in boxes in clinically oriented chapters. Assessment and intervention guidelines help nurses identify and address factors that affect the functioning and quality of life of older adults. Nursing interventions focus on teaching older adults and their caregivers about actions they can take to promote wellness. Case studies include content on transitional care, interprofessional collaboration, and

QSEN!

Evidence-Based Geriatric Nursing Protocols for Best Practice Elsevier Health Sciences

The NICHE model demonstrates improved clinical outcomes, positive fiscal results, enhanced nursing competencies, community recognition, and greater patient, family, and staff satisfaction. This official guidebook to the NICHE model of care provides nurses with the knowledge and skills for delivering best practice in the care of older adults. Primarily hospital-based, NICHE currently has a network of over 600 national and international healthcare organizations. The NICHE model ensures that every adult age 65 and over receives care that promotes dignity, autonomy and function. Written by world-leading experts in gerontological nursing, this distinguished publication serves as the gold standard manual for nurses and all clinical care providers looking to provide optimal, evidence-based care to their older patients. As the leading nurse-driven program designed to address the complex needs of older adults, the NICHE model emphasizes the role of the nurse as a change agent and leader for effective program development, implementation of best practices, and formulation of healthcare policy. This model engages frontline practicing nurses and staff, providing the requisite knowledge and skills to work autonomously with full responsibility and authority in complex healthcare systems. Key Features Reflects the best practices of the over 600 NICHE hospitals Features multiple case studies and exemplars Uses an interprofessional approach to care Draws on leading gerontological nursing experts nationally and internationally Highly relevant to a global audience This publication also serves as the policy, planning and implementation companion to Evidence-Based Geriatric Nursing Protocols for Best Practice, edited by Marie Boltz, PhD, RN, GNP-BC, FGSA, FFAN et al
Nursing Care of the Older Adult Jones & Bartlett Learning

The purpose of restorative care nursing is to take an active role in helping older adults maintain their highest level of function, thus preventing excess disability. This book was written to help formal and informal caregivers and administrators at all levels to understand the basic philosophy of restorative care, and be able to develop and implement successful restorative care programs. The book provides a complete 6-week education program in restorative care for caregivers, many suggestions for suitable activities, and practical strategies for motivating both older adults and caregivers to engage in restorative care. In addition, the book provides an overview of the requirements for restorative care across all settings, the necessary documentation, and ways in which to complete that documentation.
