Addressing the beliefs and attitudes that can be detrimental to your organization's competitiveness, *Popular Manufacturing Myths: Eliminating Widely Held Beliefs That Reduce Competitiveness* offers time-tested insight into the most common myths encountered in manufacturing environments. It classifies these myths into management myths, shop floor

myths, and if appropriate, shared management and shop floor myths. Explaining the reasons why these deeply ingrained beliefs exist, the book outlines remedies that can help to quickly dispel them within your organization. It presents case studies that examine these myths and includes numerous real-world examples that outline simple, yet effective, solutions. Some of the myths dispelled in this book include: Increasing line speed always decreases quality and creates more scrap Reducing the cost of raw materials will decrease the cost of

manufacturing Increased inspection will boost quality If it is successful in R&D, it will be successful in production Process problems can only be solved by changing one process parameter at a time Covering the basics of data collection tools, techniques, and analysis, the text offers simple methods to structure your data to assist in communicating clear and logical conclusions across the organization. The author keeps the arithmetic and statistics to a minimum, so readers only require a basic understanding of averaging and normal variation. However, for those who

wish to understand a little bit more about a particular concept, technique, tool, or procedure, the book includes an addendum chapter with more detailed explanations and sample calculations.

Presents a framework of worldwide problems, issues and solutions relevant to the design of work and development of personnel in advanced manufacturing systems. Focuses on people and their central roles in automated production resulting from rapid computer-based integration. Addresses social, technical, organizational, managerial and ecological design issues relating to manufacturing success and the business objectives of a firm. Provides solutions to problems of integrating the human element into the production process.

Customs Bulletin and Decisions
 This book tells 101 stories of company
 efforts to implement the many aspects of
 flow manufacturing -- including such topics
 as just-in-time production, total quality
 control, reorganization of factories into
 product-focused or customer-focused cells,
 plants-in-a-plant, material flows by the
 simplicity of visual kanban, supplier
 partnerships, quick setup of equipment,
 cross-training and job rotation of the work
 force, and many more. The 101 mini-case
 studies - dubbed "caselets" -- include 26
 non-U.S. companies from 12 countries and
 cover a wide swath of industrial sectors,
 and include many well-known corporations
 such as Apple, Campbell Soup, Honeywell,
 and Boeing. From the 1980s to the
 present, the author has been taking the
 message of process improvement and
 customer-focused excellence far and wide.
 Most of these travels, usually in

connection with delivering a seminar,
 include brief factory tours in which he
 compiled detailed notes and then
 organized them as brief reports — his
 unvarnished analysis or take on what they
 do well and what needs improvement. In
 the main the reports were then sent back
 to the hosts of the plant tour. These
 factory tours and these follow-up reports
 form the basis of the large majority of this
 book's caselets. Many of the caselets bring
 to life process-improvement
 methodologies in detail. With lots of
 caselets to draw from, the readers will find
 vivid examples of similar companies and
 processes within their respective
 industries. For example, the caselets often
 include applications of advanced concepts
 in cost management, employee training,
 performance management, supply chains,
 and logistics as well as applications of
 plant layout, quick setup, material
 handling, quality assurance, scheduling,
 ergonomics, and flow analysis.

2005 Thomas Register

Clear, lucid, and extremely accessible,
 Problems and Materials on Commercial
 Law helps students understand black
 letter law and the statutory language in

the Uniform Commercial Code. Concise yet
 comprehensive coverage includes the
 most recent case and statutory
 developments in all fundamental areas of
 Commercial Law, including sales, payment
 systems, and secured transactions. A
 sensible, flexible organization follows the
 order of UCC Articles 2, 3, 4, and 9, and is
 adaptable to many teaching styles.
 Drawing on experience in both teaching
 and writing, the authors provide thorough
 and practical coverage using a popular
 problems approach. The text's effective
 format, manageable length, and inclusion
 of the most important cases make
 Problems and Materials on Commercial
 Law concise and efficient. New to the
 Twelfth Edition: New/expanded Problems
 throughout Updates on the fundamental
 areas of commercial law Sales: New cases
 in most chapters examining hot topics
 Expanded discussion of boilerplate clauses
 Updated discussion of Restatement 3d
 changes to strict product liability
 standards Examines whether Amazon is a
 seller of products or merely a distributor
 Payment: Updated rules on check imaging
 and collection are covered in some detail
 New cases, including DZ Bank AG Deutche

Zentral-Genossenschaftsbank v. McCranie; Majestic Building Maintenance, Inc. v. Huntington Bancshares Inc.; Wesseling v. Brackmann; Auto Sision, Inc. v. Wells Fargo; Peter E. Shapiro P.A. v. Wells Fargo Bank, N.A.; Knop v. Knop; and Cheatham I.R.A. v. Huntington National Bank Discussion of problems with accepting cashiers checks as payment Expanded coverage of electronic payment issues, such as duplicate deposit by phone and errors in wire transfers Secured Transactions: New cases, including Clark v. Missouri Lottery; BMW Financial Services, N.A. v. Felice; In re: Motors Liquidation Co.; Dr. Sena Yaddehige v. Xpert Technologies; and Hutzenbiler v. RJC Investment New materials on such issues as consignments of artworks; leases

distinguished from secured sales; Bitcoin as collateral; credit card receivables as accounts; name errors in financing statements; effectiveness of collateral descriptions; online filing of financing statements; bogus UCC filings; whether manufacturing robots are fixtures; certificate of title goods; and predatory auto lending practices Professors and student will benefit from: Effective format that makes black letter law accessible and helps students understand statutory language Sensible organization that is adaptable to many teaching styles Thorough and up-to-date—covers the latest changes in (and cases relating to) U.C.C. Articles 2, 3, 4, and 9, as well as other relevant laws and cases Popular

problems-based approach Distinguished authorship—draws on experience in both teaching and writing Manageable length Concise and lucid text The most important cases related to commercial law
