MCMAHON HIGGINS

The Routledge
International Handbook of
Early Literacy Education
SAGE

What is critical health psychology? How is it changing the way we think about topics like ageing, the community and gender? What can it tell us about our understanding of health and illness? The second edition of this highly regarded text has been thoroughly updated to take account of the changes in the field over the last decade. It includes new chapters on ageing and health, critical disability studies and critical anthropology, and it features contributions from worldleading researchers. Examining the debates and disputes that lie at the heart of health psychology, this new edition offers a refreshing critical perspective. It is invaluable reading for students of health psychology, critical psychology and

community psychology. Literacy Development in the Early Years Human Development Report In Early Literacy Development in Deaf Children, Connie Mayer and Beverly J. Trezek provide an in-depth, evidence-based description of how young deaf children learn to read and write, with a model of literacy development that makes clear links between theory and practice. *Early Childhood Educational Research Developing Early Literacy Assessment and Teaching* Developing early literacy: Assessment and teaching, third edition, updates the research and practical implications for teaching reading, writing, speaking and listening. It provides a comprehensive resource for teacher education students and practising teachers working with children from birth to eight years in early childhood settings, including preschools and the first years of school. There are new chapters on vocabulary and fluency to provide teacher education students and practising

teachers with the latest knowledge and practical application in these areas. It explores:- developmental phases of literacy-ways of assessing children's literacy development-research into oral language, home and community languages and literacy, play and literacy, reading and writing -the importance of children's literature and reading aloud using different text types for scaffolding children's reading and writing-phonemic awareness, phonics scope and sequences and high-frequency words -teacher scaffolding by modelling, sharing, guiding and encouraging independent activities-practical ideas for planning, teaching and managing the literacy program. Developing Early Literacy Report of the National Early Literacy Panel. Executive Summary. A Scientific Synthesis of Early Literacy Development and Implications for Intervention The National Assessment of Educational Progress reveals that 37 percent of U.S. fourth graders fail to

achieve basic levels of reading achievement. In 1997, the U.S. Congress asked that a review of research be conducted to determine what could be done to improve reading and writing achievement. The resulting "Report of the National Reading Panel: Teaching Children to Read" (NICHD, 2000) has been influential in helping to guide reading-education policy and practice in the United States. However, that report did not examine the implications of instructional practices used with children from birth through age 5. To address this gap in the knowledge base, the National Early Literacy Panel (NELP) was convened. The panel was asked to apply a similar methodological review process to that used by the National Reading Panel (NRP) to issues of instructional practices for young children so that parents and teachers could better support their emerging literacy skills. The NELP report represents a systematic and extensive synthesis of the published research literature concerning children's early literacy skills. It provides educators and policymakers with

important information about the early skills that are implicated in later literacy learning, as well as information about the type of instruction that can enhance these skills. The results also identify areas in which additional research is needed. The meta-analyses conducted by the panel showed that a wide range of interventions had a positive impact on children's early literacy learning. *Developing Early Literacy Assessment and Teaching Focuses on the development of reading, writing, speaking and listening for children from birth to eight years.* *Developing Early Literacy 0-8 From Theory to Practice* Current research increasingly highlights the role of early literacy in young children's development--and informs practices and policies that promote success among diverse learners. The *Handbook of Early Literacy Research* presents cutting-edge knowledge on all aspects of literacy learning in the early years. Volume 2 provides additional perspectives on important topics covered in Volume 1 and addresses critical new topics: the transition to school, the teacher-

child relationship, sociodramatic play, vocabulary development, neuroimaging work, Vygotskian theory, findings from international studies, and more.

[Report of the National Early Literacy Panel. Executive Summary. A Scientific Synthesis of Early Literacy Development and Implications for Intervention](#) Guilford Press

For early childhood classrooms - where curriculum is increasingly shaped by standards and teachers are pressed for time - *Beyond Early Literacy* offers a literacy method that goes beyond simply developing language arts skills. Known as *Shared Journal*, this process promotes young children's learning across content areas - including their communication and language abilities, writing skills, sense of community, grasp of diverse social and cultural worlds, and understanding of history, counting, numeracy, and time. Pairing interactive talk with individual writing in the classroom community, this rich method develops the whole child. Special features include: sample

lesson plans, rubrics, and templates throughout the book children's artifacts, including examples of oral and written work teacher accounts examining the use of Shared Journal in the classroom, including strategies and suggestions a Companion Website with templates, additional resources, and video clips of in-classroom teaching and examples of exciting ways to use new technologies. This two-part book is first framed by current theory and research about children's cognitive, language, and literacy development, and an extensive body of research and case studies on the efficacy of the method. The second part features strategies from on-the-ground teachers who have used the process with their students and explores how Shared Journal can be used with new technologies, can meet standards, and can be appropriate for diverse populations of children. This is a fantastic resource for use in early childhood education courses in emergent literacy, language arts, and curriculum.

Early Childhood Literacy

John Wiley & Sons

Widely recognized as a leading text in its field,

this popular guide explores literacy development beginning in infancy and through fourth grade. The latest edition continues to prepare teachers to create and implement literacy-rich curricula in early childhood classrooms, while providing updates to federal legislation and highlighting the impact of state standards on educational settings. Recent technology is integrated into activities used to enhance literacy competencies.

Throughout the book, the author's approach to reflective teaching empowers teachers to become effective decision makers and thoughtful mediators in children's transactions with literacy. A conceptual and theoretical foundation for describing reading and writing processes is followed by research-based descriptions of the signs of emergent literacy and developmentally appropriate instructional strategies. The emphasis on linguistic and cultural diversity includes an array of approaches for supporting English language learners. Chapter extension activities challenge readers to apply concepts

through observation, research, curriculum development, and discussion. Sample observation and assessment forms assist in determining children's progress in developing literacy.

Macmillan International Higher Education

A valuable resource for professionals working with pre-school children, or with older children lacking basic literacy skills, this book provides practical photocopiable activities to develop the early skills required for success with literacy. Includes: rhyming activities; alphabet activities; phonological awareness; writing and handwriting; and reading. Each section is structured so that children can build up their knowledge and skills. Developed within the classroom, these ideas and activities can be used with a range of children in whole class, group and individual situations both at home and in pre-school settings. Designed to help children showing early signs of dyslexia or a specific learning difficulty, these activities will also benefit older children who lack a foundation of early literacy skills. This

updated edition reflects changes in legislation, and includes refreshed word lists and new subject areas, such as visual perception, fine and gross motor skills. It is invaluable for teachers, learning support assistants, nursery workers, parents and carers.

Teaching Early Literacy
SAGE

This book aims to help policy makers, stakeholders, practitioners, and teachers in psychology and education provide more effective interventions in educational contexts. It responds to disappointment and global concern about the failure to implement psychological and other interventions successfully in real-world contexts. Often interventions, carefully designed and trialed under controlled conditions, prove unpredictable or ineffective in uncontrolled, real-life situations. This book looks at why this is the case and pulls together evidence from a range of sources to create original frameworks and guidelines for effective implementation of interventions.

Handbook of Early Literacy Research

Routledge

The newborn is amazingly equipped to acquire language and literacy-- these early years are the foundation upon which later learning is built.

Drawing on current research, the authors examine the elements of beginning language and literacy and look at how families, programs, and communities can encourage beginning language and literacy in infants and toddlers.

Assessment and Teaching Pearson

College Division

The National Assessment of Educational Progress reveals that 37 percent of U.S. fourth graders fail to achieve basic levels of reading achievement. In 1997, the U.S. Congress asked that a review of research be conducted to determine what could be done to improve reading and writing achievement. The resulting "Report of

the National Reading Panel: Teaching Children to Read" (NICHD, 2000) has been influential in helping to guide reading-education policy and practice in the United States. However, that report did not examine the implications of instructional practices used with children from birth through age 5. To address this gap in the knowledge base, the National Early Literacy Panel (NELP) was convened. The panel was asked to apply a similar methodological review process to that used by the National Reading Panel (NRP) to issues of instructional practices for young children so that parents and teachers could better support their emerging literacy skills. The NELP report represents a systematic and extensive synthesis of the published research literature concerning children's early literacy skills. It provides educators and policymakers with important information about the early skills that are implicated in later literacy learning, as well as information about the type of instruction that can enhance these skills. The results also identify areas in which additional

research is needed. The meta-analyses conducted by the panel showed that a wide range of interventions had a positive impact on children's early literacy learning.

Early Childhood Experiences in Language Arts: Early Literacy Guilford Publications

This concise, accessible book explores the connection between language acquisition and emergent literacy skills, and how this sets the stage for later literacy development. Chapters address formative early experiences such as speaking and listening, being read to, and talking about print concepts and the alphabet. Written for early childhood professionals, reading specialists, and speech-language pathologists, the book describes effective assessment and instructional approaches for fostering language learning and emergent literacy in typically developing children and those at risk for language delays. Vivid case examples illustrate specific ways to collaborate with parents to give all children a strong foundation for

school readiness and success.

[Report of the National Early Literacy Panel. Executive Summary. A Scientific Synthesis of Early Literacy Development and Implications for Intervention](#) SAGE

How to Develop Children's Early Literacy is a practical guide designed to support all early literacy educators and addresses current issues relating to early literacy.

How to Develop Children's Early Literacy Guilford Press

Grounded in cutting-edge theory and research about literacy development, this book is filled with practical assessment and instructional ideas for teachers of pre-K through grade 3. Engaging vignettes show how everyday conversations and activities offer rich opportunities both for evaluating children's current level of knowledge and for helping them progress toward more sophisticated and rewarding interactions with reading and writing. Throughout, the book highlights ways to work effectively with English language learners and their families, a theme that is the exclusive focus of two chapters. Other

timely topics covered include creative uses of technology and ways to incorporate popular culture into the classroom. Over two dozen reproducible assessment tools and handouts enhance the utility of this volume as an instructional resource, professional development tool, or graduate-level text.

Language and Literacy in the First Three Years

Allyn & Bacon
Preschool teachers and early childhood professionals know that storybook reading is important, but they may not know how to maximize its benefits for later reading achievement. This indispensable guide presents research-based techniques for using reading aloud to intentionally and systematically build children's knowledge of print. Simple yet powerful strategies are provided for teaching preschoolers about book and print organization, print meaning, letters, and words, all while sharing engaging, commercially available books. Appendices include a detailed book list and 60 reproducibles that feature activities and prompts

keyed to each text.
The National Early Literacy Panel and Beyond Zero to Three
Learning to read is an exciting and vital part of every child's development. The new edition of this book continues to provide trainees and teachers with a broad understanding of teaching reading and phonics, and equip them with the skills necessary to face the reality of the early years classroom in order to meet the needs of individual children. With vital information on constructing relationships with young readers, and how to plan phonics within a rich, interactive and playful literacy pedagogy, the second edition now includes: A brand new chapter on babies and early reading More information on language acquisition and how children learn A discussion of children with SEN An appreciation for the rise of digital technologies in relation to reading Whether you're training to become a teacher, or already working in the classroom this book is ideal for those who wish to embed the teaching of phonics into carefully selected high quality materials -

particularly in children's literature.

A Guide for Professional Carers and Educators

Routledge
'Developing Early Literacy presents an interesting range of literacy-related topics which address issues of current importance to early years practice and, in places, question current thinking. There is an excellent balance of theoretical background and case study examples which would make this a relevant and practical text for both students and early years professionals.'
- Mary-Louise Maynes, Lecturer in Early Childhood Studies, Bishop Grosseteste University
Providing clear guidance on how to develop early literacy, this book offers support with the planning and teaching of this vital aspect of the curriculum using innovative and exciting methods. Linking theory with practice, topics covered include: babies and very early communication the importance of role play corners outdoor learning and literacy how rhyme and repetition help to develop literacy teaching literacy to children who have English as an Additional Language (EAL)

literacy and diversity using picture books to develop literacy supporting transitions different approaches to the teaching of phonics and early reading. Each chapter has learning objectives, case studies featuring younger and older children from the Birth to 8 age range, a summary and suggested Further Reading. This text is essential reading for those on Early Childhood Studies, Early Years, Primary PGCE and Early Years teacher education courses. Virginia Bower is Senior Lecturer at Canterbury Christ Church University.

Beyond Early Literacy
Routledge
Early Childhood educational research is a constantly evolving field. This book brings together Cathy Nutbrown's considerable knowledge and expertise in the field, to deliver a comprehensive and critical overview of national and international research. The strengths of various types of research, and their influence on theory, policy and practice, are identified along with new and emerging research areas, and anticipated future topics and patterns of research. Through an

analytical discussion of research topics addressing Children, Adults and Pedagogy, these key areas are highlighted: - Issues in research design - Types of and trends in methodological approaches - The ethics of research With digestible chapter introductions, thinking points and suggestions for research or dissertation topics, readers are also able to locate their own work in an international landscape. This is the perfect 'go to' resource for all early childhood education and social science researchers.

Early Literacy Development in Deaf Children Cambridge University Press
Bringing together prominent scholars, this book shows how 21st-century research and theory can inform everyday instructional practices in early childhood classrooms (PreK-3). Coverage includes foundational topics such as alphabet learning, phonological awareness, oral language development, and learning to write, as well as cutting-edge topics such as digital literacy, informational texts, and response to intervention.

Every chapter features guiding questions; an overview of ideas and findings on the topic at hand; specific suggestions for improving instruction, assessment, and/or the classroom environment; and an engrossing example of the practices in action.
