ROBERTSON PATRICK

Digital Transformation John Wiley & Sons
Tried and tested practical wisdom about participatory, long range and strategic planning. In rapidly changing, complex landscapes organization leaders need concrete plans not simplistic advice. Reactive plans often entrench the problem. But when many minds focus together a new array of ideas and options can generate profound insight, creative strategy and high resolve in the whole group. What can leaders, consultants and facilitators do to ensure this happens? As a master practitioner of ICA's Technology of Participation (ToPTM) Bill Staples fully illustrates the breadth and depth of the transformation that comes from fully engaging people in the decisions that affect their work and lives. This book pulls back the veil on today's most powerful facilitation and reveals transformational philosophy, methods and tools used around the world. ToP practitioners will especially benefit from the case studies and detailed procedures that launch organizational transformation. There are

few organizations that have contributed so much to the improvement of group problem solving and decision-making as the Institute of Cultural Affairs. Over the past 25 years, its Technology of Participation has become known the world over and is applied in every sector of society. This book provides a thorough introduction to ToP including its background, purpose, methods, and applications. Bill Staples integrates and presents this information in a way that makes it accessible to anyone concerned with engaging people in effective problem solving and decision-making. —Sandy Schuman, author of *Creating a Culture of Collaboration: The International Association of Facilitators Handbook* and *The Handbook for Working with Difficult Groups: How They Are Difficult, Why They Are Difficult and What You Can Do About It* ICA is truly one of the pioneers of the participatory approach to planning and deliberation. Its commitment to participatory, democratic values is authentic and trustworthy. —Sam Kaner, author *Energy Research Abstracts* Springer
We all live incredibly busy and stressful lives. Most of us find it impossible to take even a little bit of time-out to hit the pause button, kick back, and just relax a little. There's so much to do, too much to worry about, which can make indulging in a bit of me time nothing but

a pipe dream. Believe me, I know how easy it is to not give your need for relaxation the priority you should. After many years of burning the candle at both ends, I became completely burned out. How to Have a Day Spa at Home is based upon the journey I made myself to pick up the pieces and start again. Having a day spa at home is such a treat. Consider reading this book as an investment in your overall health and well-being. You will learn how to spend the day completely indulging, pampering, and nourishing yourself from head to toe with DIY natural beauty treatments, as well as nutritious healthy meals. You don't need to spend a lot of money buying creams and potions. A lot of what you need for a day spa at home is right in your kitchen!

Corporate Governance Springer Science & Business Media

This tutorial volume includes revised and extended lecture notes of six long tutorials, five short tutorials, and one peer-reviewed participant contribution held at the 4th International Summer School on Generative and Transformational Techniques in Software Engineering, GTTSE 2011. The school presents the state of the art in software language engineering and generative and transformational techniques in software engineering with coverage of foundations, methods, tools, and case studies.

I. In Traders Uluslararası Ticaret Kongresi Kongre Kitabı= First In Traders International Conference on International Trade Conference Book MIT Press

Corporate Governance (Fourth Edition) continues to inform on all aspects of corporate governance, while keeping readers up to date with the latest developments. It is now established as

the leading South African work on the subject. The past five years since publication of the third edition has seen a number of changes in the application of corporate governance in South Africa and beyond. Locally, we have seen the application of the 2008 Companies Act, and in the United Kingdom, a new Corporate Governance Code has been introduced. Significant developments have taken place in the area of corporate reporting, via the appearance of an International Integrated Reporting Framework, widening the scope of the traditional annual report. The Fourth Edition deals with these changes. Key additions are chapters on types of entities, and a comparison of local and international practice. *Corporate Governance* was first published in 2002 shortly after the publication of the original King Report, to help explain the need for corporate governance in the private and public sectors and to provide South African executives and professionals with a practical framework to establish governance systems and practices in their own organisations.

Living Labs Springer Science & Business Media

2020 - the year of the COVID-19 pandemic - changed everything. Its ripple effects will be felt for many years to come. At the same time there have been incredible advances in digitization. We are amid a digital revolution with unprecedented innovations. The pandemic has accelerated the requirements for "Digital Transformation." Organizations need to adopt and transform to survive and hopefully thrive. At the core of digitization there is very much an underlying principle of "debt." It comes originally from what is called "technical debt." Simply, technical debt "reflects

the implied cost of additional rework caused by choosing an easy solution now instead of using a better approach that would take longer." Difficult transformative choices need to be made now - especially post-COVID-19. If an organization ignores digital transformation for "easy solutions", the "debt" accumulates and can have disastrous consequences. The pandemic has accelerated the accumulation of digital transformation debt! It has also provided an opportunity to thrive in the post-COVID-19 era. What does Digital Transformation mean? What are the opportunities? What are the core digital technologies? What are the best practices? What are practical recommendations to alleviate the Digital Transformation Debt!? This book addresses Digital Transformation Debt holistically and makes recommendations on how to alleviate the debt.

Pharmacy Management, Leadership, Marketing, and Finance IGI Global Transformation is a process of bringing radical change to the context that sets a new direction and takes the organization to an entirely different level of effectiveness with little to no resemblance to the past. There is always a need for positive change and for transforming people's lives regardless of what has been achieved so far by the organization or the society. There is always room for people to dream big, think big, make a difference, and make an impact to bring about transformative change. Transformation is required in virtually any field, whether it is business, technology, education, health care, banking, agriculture, politics, poverty reduction, entertainment, transportation, cities, or manufacturing. Transforming an organization or the lives of people within a society is purely a leadership-

based mission that requires a creative and innovative mind-set. The aspects of the transformation process include purpose-driven vision, creativity, innovation, design thinking, agile transformation, cultural transformation, digital capabilities, human experience transformation, and business model transformation. Transformational leadership is about envisioning the future and making it brighter by way of bringing about transformative change. Transformational leaders must be courageous and empathetic. Several qualities that transformational leaders need to possess in order to embrace transformation include vision, creativity, inspiration, courage, collaboration, commitment, empathy, and emotional intelligence. These aspects, along with their appropriate components and subcomponents, are discussed in *The Art and Science of Transformational Leadership*.

The Second Edition of the award-winning *Pharmacy Management, Leadership, Marketing, and Finance* has been updated to make this quality textbook an even more integral resource for your Pharmacy Management course. All previous chapters have been updated and multiple new chapters have been added including "Quality Improvement," "The Basics of Managing Risk," "Insurance Fundamentals," "Integrating Pharmacoeconomic Principles and Pharmacy Management," and "Developing and Evaluating Clinical Pharmacy Services." Chapters continue to be written in a concise and reader-friendly style, facilitating a deeper level of understanding of essential leadership and management concepts. The updated

content has been designed with the next generation of pharmacists in mind and to prepare them using an integration of knowledge, skills, attitudes, and values. This includes new in-text features, such as the Management Challenge found at the end of each chapter, and online self-assessment questions and answers. With an easy-to-read and colorful new layout, engaging pedagogical features, and online tools and resources for both students and instructors, this new edition has everything needed to provide a complete and enriched learning experience. Instructor Resources Lesson Plans PowerPoint Presentations Sample Syllabus Answers to End of Chapter Questions Case Studies Test Bank Student Companion Website includes: Self-Assessment Questions Interactive Glossary Crossword Puzzles Flashcards Web Links to additional learning materials

Requirements Engineering: Foundation for Software Quality ABC-CLIO Behavioral Specifications of Businesses and Systems deals with the reading, writing and understanding of specifications. The papers presented in this book describe useful and sometimes elegant concepts, good practices (in programming and in specifications), and solid underlying theory that is of interest and importance to those who deal with increased complexity of business and systems. Most concepts have been successfully used in actual industrial projects, while others are from the forefront of research. Authors include practitioners, business thinkers, academics and applied mathematicians. These seemingly different papers address different aspects of a single problem - taming complexity. Behavioral Specifications of Businesses and Systems emphasizes simplicity and

elegance in specifications without concentrating on particular methodologies, languages or tools. It shows how to handle complexity, and, specifically, how to succeed in understanding and specifying businesses and systems based upon precise and abstract concepts. It promotes reuse of such concepts, and of constructs based on them, without taking reuse for granted. Behavioral Specifications of Businesses and Systems is the second volume of papers based on a series of workshops held alongside ACM's annual conference on Object-Oriented Programming Systems Languages and Applications (OOPSLA) and European Conference on Object-Oriented Programming (ECOOP). The first volume, Object-Oriented Behavioral Specifications, edited by Haim Kilov and William Harvey, was published by Kluwer Academic Publishers in 1996.

Information Systems Transformation John Wiley & Sons

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

XBRL For Dummies Springer

The perfect guide to help you understand XBRL-from the "father of XBRL" What is XBRL and how can it help you streamline your business reporting? This plain-English guide from the "father of XBRL," Charles Hoffman, will tell you what it is, why it is, and how you can get on the bus with this new SEC-mandated business reporting standard for publicly-traded companies. A CPA, Hoffman is credited with the idea of applying XML data to financial reporting; XBRL is the language that resulted. Learn to prepare financial statements with XBRL, use it for

strategic planning, move all relevant departments in your company to the same system, and more. XBRL (eXtensible Business Reporting Language) is an XML-based open standard for accounting data; author Charles Hoffman is credited with the idea of applying XML data to financial reporting Plan for XBRL implementation, set action-oriented agendas, and identify stakeholders and subject-matter experts within your organization Learn to choose from and adapt existing XBRL taxonomies to comply with US GAAP and IFRS standards Topics also include how to adapt your existing financial information into XBRL.

Public Sector Transformation Processes and Internet Public Procurement: Decision Support Systems "O'Reilly Media, Inc."

This book constitutes the thoroughly refereed post-proceedings of the 5th International Workshop on Product-Family Engineering, PFE 2003, held in Siena, Italy in November 2003. The 36 revised full papers presented together with an introductory overview and 3 keynote presentations were carefully selected during two rounds of reviewing and improvement. The papers are organized in topical sections on variation mechanisms, requirements analysis and management, product derivation, transition to family development, industrial experience, evolution, and decision and derivation.

The Palgrave Handbook of Learning for Transformation Xlibris Corporation

The Digital Age is having a broad and profound impact on companies and entire industries. Rather than simply automate or embed digital technology into existing offerings, your business needs to rethink everything. In this practical book, three ThoughtWorks

professionals provide a game plan to help your business through this transformation, along with technical concepts that you need to know to be an effective leader in a modern digital business. Chock-full of practical advice and case studies that show how businesses have transitioned, this book reveals lessons learned in guiding companies through digital transformation. While there's no silver bullet available, you'll discover effective ways to create lasting change at your organization. With this book, you'll discover how to: Realign the business and operating architecture to focus on customer value Build a more responsive and agile organization to deal with speed and ambiguity Build next generation technology capability as a core differentiator

Springer

This work, a tribute to renowned researcher Robert Paige, is a collection of revised papers published in his honor in the Higher-Order and Symbolic Computation Journal in 2003 and 2005. Among them there are two key papers: a retrospective view of his research lines, and a proposal for future studies in the area of the automatic program derivation. The book also includes some papers by members of the IFIP Working Group 2.1 of which Bob was an active member.

Next Level CMO Morgan Kaufmann

This tutorial book presents revised and extended lecture notes for a selection of the contributions presented at the International Summer School on Generative and Transformational Techniques in Software Engineering (GTTSE 2009), which was held in Braga, Portugal, in July 2009. The 16 articles comprise 7 long tutorials, 6 short tutorials and 3 participants

contributions; they shed light on the generation and transformation of programs, data, models, metamodels, documentation, and entire software systems. The topics covered include software reverse and re-engineering, model driven engineering, automated software engineering, generic language technology, and software language engineering.

The Art and Science of Transformational Leadership John Wiley & Sons

This handbook offers an expanded discourse on transformative learning by making the turn into new passageways to explore the phenomenon of transformation. It curates diverse discourses, knowledges and practices of transformation, in ways that both includes and departs from the adult learning mainstay of transformative learning and adult education. The purpose of this handbook is not to resolve or unify a theory of transformation and all the disciplinary contributions that clearly promote a living concept of transformation. Instead, the intent is to catalyze a more complex and deeper inquiry into the “Why of transformation.” Each discipline, culture, ethics and practice has its own specialized care and reasons for paying attention to transformation. How can scholars, practitioners, and active members of discourses on transformative learning make a difference? How can they foster and create conditions that allow us to move on to other, unaddressed or understudied questions? To answer these questions, the editors and their authors employ the metaphor of the many turns into passageways to convey the potential of transformation that may emerge from the many connecting

passageways between, for instance, people and society, theory and practice, knowledge created by diverse disciplines and fields/professions, individual and collective transformations, and individual and social action.

Leveraging Applications of Formal Methods, Verification and Validation. Technologies for Mastering Change Springer Science & Business Media
 The two-volume set LNCS 8802 and LNCS 8803 constitutes the refereed proceedings of the 6th International Symposium on Leveraging Applications of Formal Methods, Verification and Validation, ISoLA 2014, held in Imperial, Corfu, Greece, in October 2014. The total of 67 full papers was carefully reviewed and selected for inclusion in the proceedings. Featuring a track introduction to each section, the papers are organized in topical sections named: evolving critical systems; rigorous engineering of autonomic ensembles; automata learning; formal methods and analysis in software product line engineering; model-based code generators and compilers; engineering virtualized systems; statistical model checking; risk-based testing; medical cyber-physical systems; scientific workflows; evaluation and reproducibility of program analysis; processes and data integration in the networked healthcare; semantic heterogeneity in the formal development of complex systems. In addition, part I contains a tutorial on automata learning in practice; as well as the preliminary manifesto to the LNCS Transactions on the Foundations for Mastering Change with several position papers. Part II contains information on the industrial track and the doctoral symposium and poster session.
Generative and Transformational Techniques in Software Engineering II

Springer

While many social, economic, and political changes have occurred recently in internet public procurement and its decision support systems, there is still a lot of opportunity for improvement.

Public Sector Transformation Processes and Internet Public Procurement: Decision Support Systems brings together research on different perspectives from academics and practitioners on the methods, theories, and practices involved in the growth and expansion of decision support systems as it relates to the public sector transformation process and internet public procurement.

Transformational Products novum premium Verlag

This book constitutes the refereed proceedings of the 13th International Working Conference on Requirements Engineering: Foundation for Software Quality, REFSQ 2007, held in Trondheim, Norway. It covers goal-driven requirements engineering (RE), products and product-lines, value-based RE and the value of RE, requirements elicitation, requirements specification, industrial experience of RE, and requirements quality and quality requirements.

Global Business Citizenship: A Transformative Framework for Ethics and Sustainable Capitalism Siber Ink

This book constitutes the thoroughly refereed post-conference proceedings of the Second International Symposium on Foundations of Health Information Engineering and Systems, FHIES 2012, held in Paris, France, in August 2012.

The 11 revised full papers presented together with 3 short papers in this volume were carefully reviewed and selected from 26 submissions. Topics of interest covered in this volume are such as software engineering; systems engineering; data engineering; applied mathematics; and psychology.

Generative and Transformational Techniques in Software Engineering III Springer

This book constitutes the thoroughly refereed post-conference proceedings of the Third International Symposium on Foundations of Health Information Engineering and Systems, FHIES 2013, held in Macau, China, in August 2013.

The 19 revised full papers presented together with 1 invited talk in this volume were carefully reviewed and selected from 22 submissions. The papers are organized in following subjects: panel position statements, pathways, generation and certification, interoperability, patient safety, device safety, formal methods and HIV/AIDS and privacy.
