Solkattu, the spoken rhythms and patterns of hand-clapping used by all musicians and dancers in the classical traditions of South India, is a subject of worldwide interest—but until now there has not been a textbook for students new to the practice. Designed especially for

classroom use in a Western setting, the manual begins with rudimentary lessons in the simplest South Indian tala, or metric cycle, and proceeds step-by-step into more challenging material. The book then provides lessons in the eight-beat adi tala, arranged so that by the end, students will have learned a full percussion piece they can perform as an ensemble. Solkattu Manual includes web links to video featuring performances of all 150 lessons, and full performances of all three of the outlined small-ensemble pieces. Ideal for

courses in world music and general musicianship, as well as independent study. Book lies flat for easy use.

 Marcel Mauss (1872-1950) was the leading social anthropologist in Paris between the world wars, and his Manuel d'ethnographie, dating from that period, is the longest of all his texts. Despite having had four editions in France, the Manuel has hitherto been unavailable in English. This contrasts with his essays, longer and shorter, many of which have long enjoyed the status of classics within anthropology. We are therefore pleased to present, in the English language for the first time, this extraordinary work that is based on the more than thirty lectures Mauss delivered each year under the title "Instructions in descriptive ethnography, intended for travelers, administrators and missionaries." Despite his dates, Mauss's treatment of fundamental questions, such as how to conceptualize and classify the range of social phenomena known to us from history and ethnography, has lost none of its freshness.

David Nelson wrote and compiled *Konnakkol Manual* to assist teaching an advanced course in the rhythmic compositions of Karnatak (South Indian)

music. This new instructional book picks up where his previous book, *Solkattu Manual*, left off. It includes advanced exercises for developing control of odd pulse divisions, such as three and five notes per beat. There is a chapter on the sources of Karnatak t̄aas (meters), and another on the evolution of rhythmic compositions—told through the work of three generations of musicians. The main body of the book comprises full tani āvartanam̄s (spoken percussion solos) in three t̄aas, together with instructions for practice, and *Solkattu* notation. Nelson created 150 instructional videos to accompany the text. They are accessible at wesleyan.edu/wespress/konnakkol/.
