The Tactical Emergency Casualty Care Course Manual is the printed component for the NAEMTs 16-hour continuing education Tactical Emergency Casualty Care (TECC) Course. It may be used by both instructors and students as a resource to prepare for the TECC course and as a reference that discusses the current best practices for EMS providers to utilize in the response to and care of patients in a civilian tactical environment. The TECC Course does not offer certification as a tactical medic it is intended to teach all EMS providers the best patient care and safety practices in a civilian tactical environment, such as an active shooting hostile event. Composed of 10 lessons, The TECC Course Manual will: Cover the phases of care in a civilian tactical environment, Describe step-by-step the life-saving skills that may be performed in a civilian tactical environment, Provide safety and survival strategies for EMS providers and their patients In addition to the TECC Course Manual, instructors may also purchase the TECC Online Instructors Toolkit (9781284483888). This resource features 10 lesson presentations in PPT, as well as interactive patient simulations and skill stations that allow students to gain experience in a safe environment monitored by experienced EMS providers.

Advanced Trauma Life Support Jones & Bartlett Learning

Now published in partnership with the National Association of EMTs, the Second Edition of this national continuing education curriculum is the most credible and complete source of prehospital medical information for the older population. Geriatric Education for Emergency Medical Services (GEMS), Second Edition builds off the previous edition and includes expanded content that will cover new areas addressed in the National EMS Education Standards, including mobile integrated healthcare and disasters. The GEMS course is an innovative, comprehensive, and highly interactive 1-day course for both BLS and ALS providers with:

- *Online Precourse Modules*
- *Case-based lectures*
- *Live action

video*

- *Hands-on skill stations*
- *Small group scenarios*

New to the Second Edition: A 2-day ALS course option is also available, featuring 8 hours of interactive online modules. The online courseware provides more advanced, in-depth content for ALS providers and explores the role of mobile integrated healthcare in improving the quality of life for older patients.

Case Studies for Prehospital Providers Jones & Bartlett Publishers 20-2811

Critical Care Transport International Fire Service Training Assn Despite their economic and social importance, there are relatively few book-length studies of national insurance industries. This collection of nine essays by a group of international experts redresses this balance; providing an extensive geographical and thematic spread, linked via an extensive introduction.

Pac Springer

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Transition Series: Topics for the Paramedic is designed to act as a transition guide between the 1998 U.S. Department of Transportation's Emergency Medical Technician-Paramedic National Standard Curriculum and the 2009 Paramedic National EMS Education Standards. Providing a timely, topical continuing education guide, this book provides both an overview of new information found in the Education Standards and the Paramedic level and provides a source of continuing education for practicing Paramedics.

Operative Techniques and Recent Advances in Acute Care and Emergency Surgery Springer Science & Business Media Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the

prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities

Single Variable Calculus, Volume 2 Jones & Bartlett Publishers

Welcome to the new gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), Critical Care Transport offers cutting edge content relevant to any healthcare provider training in critical care transport. Like no other textbook in this market, Critical Care Transport thoroughly prepares medical professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. This book meets the curricula of major critical care training programs, including University of Maryland, Baltimore County (UMBC). It covers both ground and flight transport, and meets the objectives of critical care transport certification exams such as the Certified Flight Paramedic (FP-C) exam administered by the Board for Critical Care Transport Paramedic Certification. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, trauma, and

pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients.

Tecc: Tactical Emergency Casualty Care Routledge

Written by an international team of expert contributors, this unique global and authoritative survey explores in full but accessible detail the basic constructs and concepts of modern sport and exercise psychology and their practical application. The book consists of 62 chapters, written by 144 contributors, deriving from 24 countries across the world. The chapters are arranged in nine cohesive sections: sport and exercise participants; the influence of environments on sport and exercise; motor skills; performance enhancement; building and leading teams; career, life skills and character development; health and well-being enhancement; clinical issues in sport psychology; and professional development and practice. Each chapter contains chapter summaries and objectives, learning aids, questions, exercises and references for further reading. Its comprehensive scale and global reach make this volume an essential companion for students, instructors and researchers in sport science, sport and exercise psychology, psychology, and physical education. It will also prove invaluable for coaches and health education practitioners.

PHTLS--Pre-Hospital Trauma Life Support W B Saunders Company

The aim of this book is to identify and shed new light on the main surgical practices involved in acute care and trauma surgery. Adopting an evidence-based approach, a multidisciplinary team of surgeons and intensivists illustrate basic and advanced operative techniques, accompanied by a comprehensive and updated reference collection. Emerging surgical procedures in Acute Care Surgery are also explored step by step with the help of ample illustrations. Further, the book offers an overview of treatment options for acute organ failure, with a focus on peculiar clinical situations that call for special treatment, including: extracorporeal membrane oxygenation (ECMO), circulatory support and urgent liver transplantation. In order to identify the key determinants in decision-making and therapeutic support that can help avoid critical errors, authors not only define and discuss specific surgical techniques, but also present major issues and controversies related to it. In essence, the book can be considered a "What to do guide" that offers easy access to both basic and advanced lifesaving surgical procedures, due in part to text boxes highlighting "Tips, Tricks and Pitfalls" as well as advice on "Complications Management". Many chapters are enriched by providing clinical case scenarios, an important educational resource including self-assessment questionnaires.

Geriatric Education for Emergency Medical Services (Gems)

Pearson Higher Ed

"Prehospital Trauma Life Support (PHTLS) is the comprehensive, internationally renowned resource for learning basic and advanced prehospital trauma skills and concepts. This textbook will now serve as a primary reference text for PHTLS courses, accompanied by a course manual. Fully revised and updated, the ninth edition provides trauma treatment and guidelines that are proven to reduce morbidity and mortality. Market Information: Appropriate for first responders"--

Tactical Combat Casualty Care Handbook Jones & Bartlett Publishers

Text only. This product does NOT include a Resource Central Access Code Card. To purchase the text with a Resource Central Access Code Card, please use ISBN: 0-13-281811-6 For more than 30 years, International Trauma Life Support has been at the

forefront of trauma education at all levels of emergency care worldwide. This practical, hands-on training offers a complete reference covering all skills necessary for rapid assessment, resuscitation, stabilization, and transportation of the trauma patient. Updated with new photos and the latest approaches to the care of the trauma patient, this seventh edition conforms to the most recent AHA/ILCOR guidelines for artificial ventilation and CPR.

Pediatric Emergency Assessment, Recognition, and Stabilization Jones & Bartlett Learning

Créé en 1983 par l'Association américaine des techniciens médicaux d'urgence (NAEMT) et le Collège américain des chirurgiens, le PHTLS (Prehospital Trauma Life Support) représente la version préhospitalière de la célèbre formation ATLS (Advanced Trauma Life Support). Fondé sur le concept de l'evidence based medicine et mis à jour tous les quatre ans, il constitue une ressource d'informations globale pour la gestion des patients traumatisés en pratique préhospitalière. Cet ouvrage, traduction de la 6e édition américaine du PHTLS, devenu un ouvrage de référence international, privilégie l'efficacité par son approche pédagogique originale. Il permet aux intervenants d'affiner leur capacité à évaluer rapidement et précisément l'état de gravité d'un patient, puis de développer une stratégie thérapeutique selon le principe du "traiter en premier ce qui tue en premier". Une importance particulière est accordée à l'anatomie, la physiologie et la physiopathologie, ainsi qu'à l'évaluation et la prise en charge des différents types de traumatismes. Cette nouvelle édition, qui intègre désormais des modifications et enrichissements en lien avec les pratiques françaises, comprend : des cahiers illustrant étape par étape les techniques de gestion des voies aériennes, de ventilation et de stabilisation du rachis ; des algorithmes et iconographies relatifs à l'évaluation du patient et à sa prise en charge. Entièrement actualisée et largement enrichie, elle offre au lecteur 5 nouveaux chapitres concernant : les brûlures ; la gestion des catastrophes ; les armes de destruction massive ; la tactique civile de soutien médical d'urgence ; le secours en milieu isolé. Cet ouvrage intéressera tous les intervenants impliqués dans les situations d'urgence préhospitalières, particulièrement les médecins, infirmiers, sapeurs-pompiers, ambulanciers et secouristes. Pediatric Advanced Life Support Provider Manual (International

Principles Of Ethics And Personal Leadership (PEPL) Provides EMS And Mobile Healthcare (MHC) Practitioners At All Levels With The Knowledge And Skills They Need To Effectively Interact With Patients And Their Families, Other Medical Personnel, Co-Workers, Supervisors, And The Community. The Course Provides Students With A Deeper Understanding Of The Basic Principles Of Ethical Leadership And Service To Patients, As Well As An Awareness Of The Leadership Challenges Facing Today's EMS And MHC Practitioners. This Course Assists Students In Identifying Their Personal Responsibility And Accountability For Ethical Decision Making And For The Exercise Of Ethical Servant Leadership For Themselves, Their Patients, And Their Profession. Many Communities Are Exploring New Models For Delivering Medical Care To Improve Patient Outcomes And Reduce Costs. Through Course Presentations, Discussions, And Learning Activities, This Interactive Course Offers Essential Foundational Training That Advances The Professional Development Of Participants. Students Successfully Completing The PEPL Course Will Be Eligible For Continuing Education Credits.

Care of the Trauma Patient Cengage Learning

Over three decades ago, PHTLS: Prehospital Trauma Life Support transformed the assessment and management of trauma patients in the field. Throughout the years and across the globe, the PHTLS course has improved the quality of trauma patient care and has saved lives. This UK localised edition continues the PHTLS mission to promote excellence in trauma patient management by all clinicians involved in the delivery of prehospital care through global education. This legendary programme was first developed

by the National Association of Emergency Medical Technicians (NAEMT) in the early 1980s in cooperation with the American College of Surgeons Committee on Trauma (ACS-COT). The UK edition of this trusted and reliable resource is endorsed by the College of Paramedics. The text has been revised and updated to reflect current, evidence-based knowledge and practice, and brings the established course in line with national guidance to reflect the paramedic role within the UK. PHTLS promotes critical thinking as the foundation for providing quality care. It is based on the belief that prehospital clinicians make the best decisions on behalf of their patients when given a solid foundation of knowledge and key principles to fuel their critical-thinking skills. A Clear Approach to Assessing a Trauma Patient In the field, seconds count. PHTLS: Prehospital Trauma Life Support teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination. Dynamic Technology Solutions World-class content joins instructionally sound design with a user-friendly online interface to give instructors and students a truly interactive and engaging learning experience with: * eBook of the PHTLS Course Manual that reinforces key concepts presented in the PHTLS course * Video demonstrations of critical skills in the PHTLS Online Instructor ToolKit

Flight Paramedic Certification Jones & Bartlett Publishers

Completely revised and updated, the new 4th edition includes must-have information and guidelines for health care

professionals and hospital systems interested in developing transport systems and improving the transport care they deliver. Authored by leading experts in transport medicine, the editorial team is devoted to ensuring that appropriate evidence-based conclusions and recommendations are included, when available, for the clinical and administrative subjects presented. The 4th edition covers all aspects of air and ground transport - from team organization and training to equipment selection, quality improvement, safety, ethics and much more. Obtain the latest guidelines to insure quality of care and safety during transport with this leading-edge publication.

International Trauma Life Support for Emergency Care Providers: Pearson New International Edition Prentice Hall

"Advanced Medical Life Support" is "the" text on practical methods for adult emergency treatment. Designed to provide students with the practical knowledge and skills to effectively manage on-scene, adult medical emergencies, each chapter moves from assessment-based procedures to field diagnosis and management of treatable cause. Written by authors uniquely qualified to address the specific requirements of advanced-level EMS training, this is a complete and essential resource for seasoned EMS practitioners. Features: Highlights definitions, key ideas, and Clinical Insights in the margin. Introduces each chapter with a relevant case study and concludes the chapter with a follow-up to that same case study. Teaches critical thinking (Possibilities to Probabilities in Chapter 1). Applies critical thinking through interactive case studies (Chapter 13) Includes a Further Reading bibliography in each chapter. Contains appendices on pharmacology, normal lab data, and 12-lead ECG interpretation.
