The true story of two mass-casualty incidents that occurred within days of each other at a US Air Force base. Using the words of the people who experienced the tragedies, the book provides in-depth look at the before, during and after of a preventable active-shooter incident and an avoidable fatal plane crash. The base psychiatrist knew the airman was dangerous. "This is the kind of patient who ... one day ... he's going to come back and kill you." Aircrews knew the rogue pilot was dangerous. "We predicted the worst air-show disaster in history when we found out that he was gonna fly." Written by Andy Brown, the man who ended the killing spree, the result of more than seven years of research. Brown "masterfully weaves" the two stories together in a powerful narrative. He also reveals the preparations he made that enabled him to end a pistol-versus-rifle gunfight with a 70 yard shot from his handgun. Part true crime, part law-enforcement biography memoir and part military history. Warnings Unheeded is presented in an objective style that shows what can happen when authorities become complacent, when the precursors of violence are ignored and the lessons from history are forgotten.

Winner of the 2015 NSW Premier's Literary Awards, Christina Stead Prize for Fiction and ACT Book of the Year Award. Paris: 1989. Recently retired

Inspector of Police Auguste Jovert receives a letter from a woman who claims to be his daughter. Two days later, a stranger comes knocking on his door. Set in Paris and Japan, *The Snow Kimono* tells the stories of Inspector Jovert, former Professor of Law Tadashi Omura, and his one-time friend the writer Katsuo Ikeda. All three men have lied to themselves, and to each other. And these lies are about to catch up with them. A quarter of a century after the award-winning bestseller *Out of the Line of Fire*, Mark Henshaw returns with an intricate psychological thriller that is also an unforgettable meditation on love and loss, on memory and its deceptions, and the ties that bind us to others. Mark Henshaw has lived in France, Germany, Yugoslavia and the USA. He currently lives in Canberra. His first novel, *Out of the Line of Fire* (1988), won the FAW Barbara Ramsden Award and the NBC New Writers Award. It was one of the biggest selling Australian literary novels of the decade and has been re-released as a Text Classic. *The Snow Kimono* won the 2014 NSW Premier's Award for Fiction and Mark Henshaw was the 2015 winner of the Copyright Agency's Author Fellowship. 'With agile intelligence, with boldness in what he has imagined and tight control over how it is developed, Henshaw has announced triumphantly that he is no longer a ghost on the Australian literary scene, but one of its most substantial talents.' Australian 'Gripping...Like a Japanese puzzle, prized for their infinite solutions and depth of revelation, each chapter builds on the one before, unfolding through levels of story to unpack deeper and deeper truths...Henshaw's ability to combine such cultural and aesthetic diversity in his fiction is not only an example of what a period of dedicated study can do, but a marker of his ability as a writer.' Guardian 'Henshaw's prose [is] luminous and crisp, like the snowy countryside of Japan or the barren lanes of Algiers...When I finished *The Snow Kimono*, I raised my head, vaguely surprised that I was at home, in familiar surrounds, and it was still daylight outside. I turned straight back to page one and began again.' Saturday Paper 'Henshaw's effects are consistently magical...[He] has perfected a particular technique for the scenes set in Japan, one we might call leisurely lyricism.' Sydney Morning Herald 'A confident, complex, ludic and engrossing performance that will make readers glad Henshaw is back...With agile intelligence, with boldness in what he has imagined and tight control over how it is developed, Henshaw has announced triumphantly that he is no longer a ghost on the Australian literary scene, but one of its most substantial talents.' Weekend Australian 'The writing is beautiful: pellucid and wonderfully visual, painting memorable landscape cameos. The reader is compliant, willingly engaged with a story that starts in medias res and branches in unexpected and seemingly unconnected yet complementary directions, ending with a twist that is hard to get one's head around.' Adelaide Advertiser 'An exquisitely written puzzle.' Jennifer Byrne, Australian Women's Weekly 'A triumph.' Salty Popcorn 'Henshaw doesn't offer the easy satisfactions of much puzzle-literature, but the many turns and shifts make for a constantly engaging read...An interesting, engaging work...Fascinating.' This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Author of Honda Mini Trail: Enthusiast's Guide, Jeremy Polson has put together another vintage Honda guide. It covers the third-best-selling Honda in American Honda history, the long-running Mini Trail CT-70, along with the CL, SL, and XL 72-cc motorcycles manufactured from 1969 to 1994. Polson begins with a brief introduction of the models that led to the first CL-70, and then jumps into a thorough analysis of the many models and iterations that Honda offered through the years. With more than 25 years of experience collecting, restoring, and selling more than 200 small-displacement Hondas, Polson is the ideal author for this must-have look at a group of Honda's most popular motorcycles. Despite the worldwide popularity of American Honda's 72-cc motorcycles, no other book on these models has been published, and the accuracy of information found on the Internet is suspect at best. It could be called the "Bible for Honda 72-cc collectors and enthusiasts," because this book presents facts and figures backed up by production dates, serial numbers, and dealer information found nowhere else. In addition to the hard facts, this book is filled with many rare photos that track the evolution of Honda's 72-cc motorcycles and unravels their mystery. Rare models covered include the first CT-70 "Silver Tags" with more than 30 features not found on the majority of later-model CT-70s, as well as many other low-production 72-cc motorcycles.
