Women, Business and the
Law 2021 is the seventh
in a series of annual
studies measuring the

laws and regulations that
affect women's economic
opportunity in 190
economies. The project
presents eight indicators
structured around
women's interactions with
the law as they move
through their lives and
careers: Mobility,
Workplace, Pay, Marriage,
Parenthood,
Entrepreneurship, Assets,

and Pension. This year's
report updates all
indicators as of October 1,
2020 and builds evidence
of the links between legal
gender equality and
women's economic
inclusion. By examining
the economic decisions
women make throughout
their working lives, as well
as the pace of reform over
the past 50 years,

Women, Business and the Law 2021 makes an important contribution to research and policy discussions about the state of women's economic empowerment. Prepared during a global pandemic that threatens progress toward gender equality, this edition also includes important findings on government responses to COVID-19 and pilot research related to childcare and women's access to justice.

Middle East Economic Digest Elsevier

Terrorism has emerged as

one of the most problematic issues facing national governments and the international community in the 21st century. But how is it possible to counter terrorism in a world in which governance is still dominated by the nation-state? Are we seeing new forms of terrorist activity in the wake of 9/11? Are pre-9/11 approaches still valid? How can we combat and control diverse threats of multiple origin? Who should be responsible for countering terrorism and in what

circumstances? In this incisive new book, Ronald Crelinsten seeks to provide answers to these pressing questions, challenging readers to think beyond disciplinary and jurisdictional boundaries. He presents an up-to-date and comprehensive introduction to the difficulties and obstacles related to countering terrorism in democratic societies. The counterterrorism framework that he develops in this book reflects the complex world

in which we live. The different approaches to counterterrorism provide the organizing theme of the book and help the reader to understand and to appreciate the full range of options available. The book: includes a host of contemporary examples and further readings; compares and contrasts pre- and post-9/11 approaches; critically evaluates the post-9/11 'war on terror'; moves beyond a purely state-centric focus to include non-state actors and institutions; combines

hard and soft power approaches; considers prevention, preparedness, response and recovery. Counterterrorism will be an indispensable guide for students, researchers, practitioners and general readers wanting to broaden their knowledge of the possibilities and limitations of counterterrorism today. [ECEI2011- 6th European Conference on Innovation and Entrepreneurship](#) IGI Global
An enormous array of problems encountered by scientists and engineers

are based on the design of mathematical models using many different types of ordinary differential, partial differential, integral, and integro-differential equations. Accordingly, the solutions of these equations are of great interest to practitioners and to science in general. Presenting a wealth of cutting-edge research by a diverse group of experts in the field, *Integral Methods in Science and Engineering: Computational and Analytic Aspects* gives a

vivid picture of both the development of theoretical integral techniques and their use in specific science and engineering problems. This book will be valuable for researchers in applied mathematics, physics, and mechanical and electrical engineering. It will likewise be a useful study guide for graduate students in these disciplines, and for various other professionals who use integration as an essential technique in their work.

 Intelligent business
 analytics is an emerging
 technology that has
 become a mainstream
 market adopted broadly
 across industries,
 organizations, and
 geographic regions.
 Intelligent business
 analytics is a current
 focus for research and
 development across

academia and industries
 and must be examined
 and considered
 thoroughly so businesses
 can apply the technology
 appropriately. The
 Handbook of Research on
 Foundations and
 Applications of Intelligent
 Business Analytics
 examines the
 technologies and
 applications of intelligent
 business analytics and
 discusses the foundations
 of intelligent analytics
 such as intelligent mining,
 intelligent statistical
 modeling, and machine
 learning. Covering topics

such as augmented analytics and artificial intelligence systems, this major reference work is ideal for scholars, engineers, professors, practitioners, researchers, industry professionals, academicians, and students.

Utilisation of Nitrogen in Air by Plants Government Printing Office
Volume 2 of the Getenergy Guides series explores the challenges of developing a technically competent workforce for the oil and gas sector globally. The cases in this

Volume explore practical examples of the efforts of oil and gas companies, contractors, educational institutions and governments to develop competent, vocationally-trained employees for the industry. Education and training are increasingly viewed as part of the core business of oil and gas companies operating in today's high cost/high risk environment. This book will highlight the approaches which work and offer a framework against which future initiatives can be

measured. This second book in the Getenergy Guides series explores nine cases studies from around the world and offers commentary on each case drawn from Getenergy's wealth of experience in uniting education and training providers and the upstream oil and gas industry on a global basis. Edited by Getenergy's Executive Team which – for more than a decade – has specialised in mapping and connecting the world of education and training with the

upstream oil and gas industry through global events and workshops
Detailed research into the key facts surrounding each case with analysis to enable readers to quickly and effectively extract lessons that can be applied to the challenge of building a technically competent workforce
Highlights the aspects of good practice that can be utilised by universities, colleges and training providers in meeting the workforce and skills development needs of the oil and gas industry

Includes full colour images and partnership diagrams' to underscore key concepts
Offers specific commentary on the replicability, sustainability and impact of the approaches outlined
An Inspirational Memoir From a Visionary Leader
McClelland & Stewart Limited
Education and Training for the Oil and Gas Industry: Localising Oil and Gas Operations, Volume Four in the Getenergy series will set out the case for localising the oil and gas

operations within hydrocarbon-producing countries. The focus of this final Volume in the series will be to explore the value of engaging with local suppliers, local talent and other local stakeholders in the exploration and production of oil and gas resources. Specifically, we will set out an agenda around which operators and service companies can coalesce and that highlights the ways in which smart, targeted investments in education, training and local

infrastructure can create a new way of doing business, particularly in developing or emerging energy economies. Getenergy Intelligence have developed a unique tool to evaluate the potential cost benefits of localisation for any given project. This volume lays out the rationale, methodology and processes we have developed to successfully map out localisation and implement strategic capacity development for oil and gas operations. The significant cost

benefits of localisation have been recognised by a number of major oil and gas companies, but localisation is still an aspect of doing business that is poorly understood by much of the global industry. In the first section of this book, the authors provide the rationale for localisation and layout the core reasons for developing the tool. In the second section, the tool is described and the exact methodology is explained. In the final section the authors provide three

case studies, demonstrating the tool in action and showing how we are able to measure the cost effectiveness and wider value of a coherent approach to localisation. Three detailed case studies exploring the benefits of localising the oil and gas workforce A rigorous economic rationale for localisation of oil and gas projects. Explores how localisation (and investment in local education, training and talent within that) is at the core of a successful oil and gas business in the

21st century Methods of implementing a strategy to educate and train local people in order to meet the core business needs around individual oil and gas projects

The changing look and feel of metropolitan France has been a notable preoccupation of French culture since the 1980s. This collection of essays explores concern with space across a range of

media, from recent cinema, documentary filmmaking and photographic projects to television drama and contemporary fiction, and examines what it reveals about the fluctuating state of the nation in a post-colonial and post-industrial age.

An Illustrated Biographical Sketch Book of Natalians

'John Browne, chief executive of BP from 1995-2007, tells how he built the oil group from a

"two pipeline company" to a global giant. A good insider's account of a fascinating industry' Financial Times Once a lacklustre organisation, BP became one of the world's biggest, most successful and most admired companies in the new millennium. John Browne, the company's CEO for 12 years, invented the oil 'supermajor' and led the way on issues such as climate change, human rights and transparency. In BEYOND BUSINESS, Browne brings to life what he learned about

leadership in a tough industry. His story encompasses the insights gained as he transformed a national company, challenged an entire industry and prompted political and business leaders to change. He takes us across the world on adventures that include going toe-to-toe with both tyrants and elected leaders, and involve engineering feats which in many ways rival those of going to the moon. And he shares his views on the true purpose of business and the

leadership needed to tackle the grand challenges of our era. It is also a story of failure and human frailty, as Browne reveals how his private and public lives collided at frightening speed in full view of the world, prompting his abrupt resignation as CEO of BP. Florist and Pomologist Orion In Tunisia with II Corps, Lt. John Randall locates a downed German plane and demolishes two live bombs still mounted on the wreckage ... In Italy, Capt. Ronald Felton's

team contends with dreaded "Butterfly Bombs" left behind to menace the US 5th Army ... Landing with the 6th US Special Engineers Brigade, Capt. Jesse Donovan's squad braves deadly 88mm shells in pursuit of enemy rockets on Utah Beach ... Serving with the 9th Army Air Force in France, Capt. Thomas Reece survives a close encounter with a German landmine ... Capt. Joseph Pilcher joins in the 78th Infantry's final assault on a dam guarding the approaches

to Germany ... Sweeping the 11th Airborne Division's trail on Luzon, Lt. Carl Cirocco's team is ambushed by the Japanese ... Capt. Richard Metress is dispatched to tackle enemy depth charges for the 19th Infantry Regiment on Mandog Hill ... Capt. Clifford Sarauw covers the US 10th Army's fateful landing on Okinawa ... These aforementioned exploits are among the notable events contained in Nine from Aberdeen, the first academic history solely devoted to the US

Army's Ordnance Bomb Disposal Branch from World War II. Shortly after Pearl Harbor, nine US Army officers and sergeants were sent from Aberdeen Proving Ground to war-torn England in order to learn the invaluable technical skills pioneered by the British Royal Engineers. Led by the colorful Thomas J. Kane, these nine men inaugurated the new Ordnance Bomb Disposal School. Conceived initially for homeland defense, Col. Kane's branch eventually fielded over

two hundred Army and Air Force bomb squads for overseas service. These courageous officers and men were forerunners of today's Explosive Ordnance Disposal (EOD) specialists, responsible for supporting the US military during combat operations and for preserving the lives of noncombatants at all other times. Using documents and photographs - many from personal collections - as well as oral interviews, this work presents a cross-section of US Army and Air Force operations

spanning three major theaters: Mediterranean, European, and the Pacific. Special emphasis is given to the European Theater, where Col. Kane served as Gen. Eisenhower's chief ETO bomb disposal officer. Nine from Aberdeen also contains charts detailing campaign participations, ordnance statistics, and other significant data. Command Sergeant Major James H. Clifford (Retired), military consultant for the award-winning film, *The Hurt Locker*, provides an

afterword on the continuity of modern EOD. **A Journal of Literature, Science, the Fine Arts, Music, and the Drama** Elsevier

Report of a government investigation to better understand the role of digital trade -- domestic commerce and international trade conducted via the Internet -- in the U.S. and global economies, as well as the

effects of barriers and impediments to digital trade that impede U.S. access to global markets. The analysis provides findings at three levels: at the firm level, through 10 case studies; at the industry level, through a survey of U.S. businesses; and at the economy-wide level, using computable general equilibrium and econometric models. This analysis shows that digital trade contributes to economic output by improving productivity and reducing trade costs. Digital trade's combined

effects of increased productivity and lower trade costs are estimated to have increased U.S. real GDP by \$517.1-\$710.7 billion (3.4-4.8%). Figures and tables. This is a print on demand report.

John Wiley & Sons

The success of George Elliott Clarke's anthology *Eyeing the North Star: Directions in African-Canadian Literature*, published a decade ago, demonstrated the growing interest in black Canadian writing. In this exciting, provocative new

collection, literary journalist Donna Bailey Nurse provides an up-to-date and fresh perspective on this vibrant, significant, and thriving literature. Drawing on fiction, poetry, and memoir, this anthology brings together an impressively varied selection of outstanding work by both well-known writers and new voices. Donna Bailey Nurse's lively and invaluable introduction deftly explores the various themes and motifs that define and illuminate the

meaning of being black, while tracing the evolution of this influential literature through colonialism, post-colonialism, and decolonization. This engaging collection celebrates a body of writing that holds an increasingly visible and important place within Canadian literature, and stands among the finest literary anthologies in the country.
