DICKSON ORTIZ

A Historical Introduction Aurum Press Limited
From the bestselling author of A History of Britain in 21 Women
The history of the world is the history of great women. Marie Curie discovered radium and revolutionised medical science. Empress Cixi transformed China. Frida Kahlo turned an unflinching eye on life and death. Anna Politkovskaya dared to

speak truth to power, no matter the cost. Their names should be shouted from the rooftops. And that is exactly what Jenni Murray is here to do.

From Hobbes to Russell Miramax

Simon Schama's dramatic, broad-ranging, and immensely readable epic history of Britain reaches its triumphant conclusion in this third and final volume, which stretches from the American Revolution to the present. "The Fate of Empire tells the eventful and exhilarating story of Britain's rise and fall as an imperial power, from the political turmoil of the 1770s to the struggle of

present day leaders to find a way to make a different national future. The volume also examines the Romantic generation, the role of women in Victorian England, industrialization, and the liberal empire from Ireland to India, which promised material improvement, but delivered coercion and famine. As in the previous volumes, Schama vividly portrays the lives of extraordinary personalities - Queen Victoria, Churchill, Dickens, and "ordinary" individuals including the author of the first British travel guide, and Elizabeth Anderson, the first woman doctor. Finally, Schama asks an essential question: what kind of Britain can hold together when its island isolation and its imperial dominion have both vanished? An examination of the legacy of the British ideal of freedom is at the heart of this entertaining and well-researched book. With "The Fate of Empire, Simon Schama has proven himself, again, as a masterful writer of narrative history.

A World by Itself is Shirley Guiton's second book about life in the Venetian Lagoon, following *No Magic Eden*; but whereas that book was principally concerned with the island of Torcello, where the author had made her home, *A World by Itself*, takes a broader view, encompassing the northern lagoon islands of Torcello, Burano, Santa Christina and San Francesco del Deserto, and considers how the island communities there would react to the technological upheavals of the twentieth century. As she says, 'Though tradition in the lagoon is strong, the forces of change in this century are stronger.' With its astute depictions of the islands and islanders and its moving concern for the future of their ways of life, *A World by Itself*, first published in 1977, is as groundbreaking as its predecessor. With this book and *No Magic Eden*, it may be said that Shirley Guiton has done for the Venetian Lagoon what Ronald Blythe did for Akenfield.

"The magnitude and vital importance of the Battle of Britain has found a superb chronicler in Stephen Bungay, whose book is the best single-volume history to be published in over a decade." - Andrew Roberts Stephen Bungay's magisterial history is acclaimed as the account of the Battle of Britain. Unrivalled for its synthesis of all previous historical accounts, for the quality of its strategic analysis and its truly compulsive narrative, this is a book ultimately distinguished by its conclusions - that it was the British in the Battle who displayed all the virtues of efficiency, organisation and even ruthlessness we habitually attribute to the Germans, and they who fell short in their amateurism, ill-preparedness, poor engineering and even in their old-fashioned notions of gallantry. An engrossing read for the military scholar and the general reader alike, this is a classic of military history that looks beyond the mythology, to explore all the tragedy and comedy; the brutality and compassion of war.

Who were the first Britons, and what sort of world did they occupy? In *A History of Ancient Britain*, much-loved historian Neil Oliver turns a spotlight on the very beginnings of the story of Britain; on the first people to occupy these islands and their battle for survival. There has been human habitation in Britain, regularly interrupted by Ice Ages, for the best part of a million years. The last retreat of the glaciers 12,000 years ago brought a new and warmer age and with it, one of the greatest tsunamis recorded on Earth which struck the north-east of Britain, devastating the population and flooding the low-lying plains of what is now the North Sea. The resulting island became, in time, home to a diverse range of cultures and peoples who have left behind them some of the most extraordinary and enigmatic monuments in the world. Through what is revealed by the artefacts of the past, Neil Oliver weaves the epic story - half a million years of human history up to the departure of the Roman Empire in the Fifth Century AD. It was a period which accounts for more than ninety-nine per cent of humankind's presence on these islands. It is the real story of Britain and of her people.

A Memorable History of England, Comprising All the Parts You Can Remember, Including 103 Good Things, 5 Bad Kings and 2 Genuine Dates Indiana University Press

The period between 1885 and 1939 was a pivotal half century in British history, in which the Victorian political system yielded to a system far more recognisably modern, in response to popular pressure for social reform and the implications of global superpower status. Dr Davis relates these political developments to the background of social and economic change and to the consequences of Britain's position as an imperial power. Drawing extensively upon the new historical scholarship of the 1980s and 1990s, John Davis presents an original analysis of political change in a crucial period of Britain's recent past.
