A structural
drawing, a
type of
engineering
drawing, is a
plan or set of
plans and
details for how
a building or
other
structure will
be built.
Structural
drawings are
generally
prepared by

registered
professional
engineers,
and based on
information
provided by
architectural
drawings. The
structural
drawings are
primarily
concerned
with the load-
carrying
members of a
structure.

**Structures
Design and
Detailing
Manual |
UDOT**

Structural
engineering is
a sub-
discipline of
civil
engineering in
which
structural
engineers are
trained to
design the

'bones and muscles' that create the form and shape of man-made structures.	Structural engineers need to understand and calculate the stability, strength and	rigidity and earthquake of built structures for buildings and nonbuilding structures.
