 The flipped classroom method, particularly when used with digital video, has recently attracted many supporters within the education field. Now more than ever, language arts educators can benefit tremendously from incorporating flipped classroom techniques into their curriculum. Applying the Flipped Classroom Model to English Language Arts Education provides a comprehensive examination of the latest strategies for incorporating the flipped classroom technique into English language courses. Highlighting innovative practices and applications in many areas, such as curriculum development, digital tools, and instructional design, this book is an ideal reference source for academicians, educators, students, practitioners, and researchers who are interested in the advancement of the flipped classroom model in curriculums. Ernest Hemingway, F. Scott Fitzgerald, and William Faulkner stand as the American voice of the Great War. But was it warfare that drove them to write? Not according to Keith Gandall, who argues that the authors' famous postwar novels were motivated not by their experiences of the horrors of war but rather by their failure to have those experiences. These 'quintessential' male American novelists of the 1920s were all, for different reasons, deemed unsuitable as candidates for full military service or command. As a result, Gandall contends, they felt themselves emasculated--not, as the usual story goes, due to their encounters with trench warfare, but because they got nowhere near the real action. Bringing to light previously unexamined Army records, including new information about the intelligence tests, *The Gun and the Pen* demonstrates that the authors' frustrated military ambitions took place in the forgotten context of the unprecedented U.S. mobilization for the Great War, a

radical effort to transform the Army into a meritocratic institution, indifferent to ethnic and class difference (though not to racial difference). For these Lost Generation writers, the humiliating failure vis-a-vis the Army meant an embarrassment before women and an inability to compete successfully in a rising social order, against a new set of people. *The Gun and the Pen* restores these seminal novels to their proper historical context and offers a major revision of our understanding of America's postwar literature.

A self-portrait of a great writer. A Short Autobiography charts Fitzgerald's progression from exuberant and cocky with "What I think and Feel at 25", to mature and reflective with "One Hundred False Starts" and "The Death of My Father." Compiled and edited by Professor James West, this revealing collection of personal essays and articles reveals the beloved author in his own words.

Critical Theory Today is the essential introduction to contemporary critical theory. It provides clear, simple explanations and concrete examples of complex concepts, making a wide variety of commonly used critical theories accessible to novices without sacrificing any theoretical rigor or thoroughness. This new edition provides in-depth coverage of the most common approaches to literary analysis today: feminism, psychoanalysis, Marxism, reader-response theory, new criticism, structuralism and semiotics, deconstruction, new historicism, cultural criticism, lesbian/gay/queer theory, African American criticism, and postcolonial criticism. The chapters provide an extended explanation of each theory, using examples from everyday life, popular culture, and literary texts; a list of specific questions critics who use that theory ask about literary texts; an interpretation of F. Scott Fitzgerald's *The Great Gatsby* through the lens of each theory; a list of questions for further practice to guide readers in applying each theory to different literary works; and a bibliography of primary and secondary works for further reading.

Universities have stood for 900 years in Western culture with most of their institutional structures essentially unchanged. They still serve three basic functions: educating the faculty, teaching students and gathering knowledge. Funding is, and always has been, the main difficulty within universities and most of the problems critics point to can be traced to a lack of it—universities, it seems, are always in crisis. The authors demonstrate that universities are in fact doing well. They generate an immense amount of research and drive the development of new technologies. On the whole, faculty members teach pretty well and students are in fact learning (at least something), and the challenges of inadequate funding are faced with adequate success.

This study explores the vestiges of primitive sacrificial rituals that emerge in a group of canonical modernist novels, including *The Turn of the Screw*, *Heart of Darkness*, *The Good Soldier*, *The Great Gatsby*, and *To the Lighthouse*. It argues that these novels

reenact a process that achieved its seminal expression in the Genesis story of *The Binding of Isaac*, in which Abraham, having been prevented from sacrificing Isaac, offers up a ram in his place. Modernist reenactments of this pattern present narrators who, although vigorously protesting the victimization of certain characters, unfailingly seize upon others as their surrogates. Each novel is designed in such a way, however, as to resist the reconstruction of a sacrificial ritual to which its narrator is prone. The resulting tension between the binding and unbinding of ritual persecution dramatizes the paradox that we can neither believe convincingly in the guilt of our scapegoats nor imagine a society that has dispensed with them entirely. Thomas Cousineau is Professor of English at Washington College in Maryland.

In a work that spans the twentieth century, Nancy Tomes questions the popular--and largely unexamined--idea that in order to get good health care, people must learn to shop for it. *Remaking the American Patient* explores the consequences of the consumer economy and American medicine having come of age at exactly the same time. Tracing the robust development of advertising, marketing, and public relations within the medical profession and the vast realm we now think of as "health care," Tomes considers what it means to be a "good" patient. As she shows, this history of the coevolution of medicine and consumer culture tells us much about our current predicament over health care in the United States. Understanding where the shopping model came from, why it was so long resisted in medicine, and why it finally triumphed in the late twentieth century helps explain why, despite striking changes that seem to empower patients, so many Americans remain unhappy and confused about their status as patients today.

Creative Writing Practice: reflections on form and process explores the craft of creative writing by illuminating the practices of writers and writer-educators. Demonstrating solutions to problems in different forms and genres, the contributors draw on their professional and personal experiences to examine specific and practical challenges that writers must confront and solve in order to write. This book discusses a range of approaches to writing, such as the early working out of projects, the idea of experimentation, of narrative time, and of failure. With its strong focus on process, *Creative Writing Practice* is a valuable guide for students, scholars and practitioners of creative writing.

From the author of *Crying*, a witty, wide-ranging cultural history of our attitudes toward work—and getting out of it Couch potatoes, goof-offs, freeloaders, good-for-nothings, loafers, and loungers: ever since the Industrial Revolution, when the work ethic as we know it was formed, there has been a chorus of slackers ridiculing and lampooning the pretensions of hardworking respectability. Reviled by many, heroes to others, these layabouts stretch and yawn while the rest of society worries and sweats. Whenever the world of labor changes in significant ways, the pulpits, politicians, and pedagogues ring with exhortations of the value of work, and the slackers answer with a strenuous call of their own: "To do nothing," as Oscar Wilde said, "is the most difficult thing in the world." From Benjamin Franklin's "air baths" to Jack Kerouac's "dharma bums," Generation-X slackers, and beyond, anti-work-ethic proponents have held a central place in modern culture. Moving with verve and wit through a series of fascinating case studies that illuminate the changing place of leisure in the American republic, *Doing Nothing* revises the way we understand slackers and work itself.

This book brings together researchers with cognitive-scientific and literary backgrounds to present innovative research in all three variations on the possible interactions between literary studies and cognitive science. The tripartite structure of the volume reflects a more ambitious conception of what cognitive approaches to literature are and could be than is usually encountered, and thus aims both to map out and to advance the field. The first section corresponds to what most people think of as "cognitive poetics" or "cognitive literary studies": the study of literature by literary scholars drawing on cognitive-scientific methods, findings, and/or debates to yield insights into literature. The second section demonstrates that literary scholars needn't only make use of cognitive science to study literature, but can also, in a reciprocally interdisciplinary manner, use a cognitively informed perspective on literature to offer benefits back to the cognitive sciences. Finally, the third section, "literature in cognitive science", showcases some of the ways in which literature can be a stimulating object of study and a fertile testing ground for theories and models, not only to literary scholars but also to cognitive scientists, who here engage with some key questions in cognitive literary studies with the benefit of their in-depth scientific knowledge and training.

In this inspiring and provocative memoir, Caylin Moore tells the against-all-odds story of his rise from cruel poverty in gang-ridden Los Angeles to academic success at Oxford University, with hope as his compass. By all rights, Caylin Louis Moore should be dead, in prison, or stalking the streets of Compton with his fellow gang-members. Instead, he's a Rhodes Scholar, author, speaker, and role model for every kid deprived of hope in downtrodden communities. *A Dream Too Big* is the story of Moore's exodus from one of the most impoverished, gang-infested communities in the United States to the golden, dreaming spires of Oxford, England. After Moore's mother gathered her three young children and fled an abusive husband of nine years, leaving behind a comfortable middle-class life, Moore found himself in a bewildering and dangerous environment. The family lived in a neighborhood ruled by the Bloods, and Caylin often lay awake at night, terrified by both the sounds of gunfire outside and the scratching of rats and roaches moving in the walls. When Moore's father was convicted of murder and his mother was sexually assaulted in the hospital while recovering from open-heart surgery, Moore was forced to enter adulthood prematurely. Embracing his mother's steely faith in God and education, Moore skirted the gangs and the endemic violence of Compton to excel on the football field and in the classroom. Academics and athletics led to college scholarships, which led to a Fulbright and eventually the Rhodes Scholarship. Along the way, Moore cofounded a student organization that brought college athletes into underserved classrooms as inspirational speakers, role models, and mentors. Moore's eye-opening, inspirational story proves that, contrary to what others told him on his journey, there is no such thing as a dream too big. "A dream too big is a truly special book. Caylin's story is not just inspirational, it is instructional. I have admired him and his journey for a long time; read this book and you'll understand why." --Wes Moore, bestselling author of *The Other Wes Moore*, CEO of Robin Hood "I loved this story of triumph in praise of a sacrificial single mom and a kid who, against all odds, fought hunger-pains and gangs to make a dream-too-big become a dream-come-true. Through gunshots and the temptations of inner city poverty, Caylin Moore laced up his cleats, outran gangs, and caught the 6:00am bus on an empty stomach. A future world-changer, Caylin has penned an inspiring tale that should be mandatory reading for every student, parent, and anyone else interested in the success of those who will shape and define our future." -- Ron Hall, #1 New York Times bestselling author of *Same Kind of Different as Me* and *Workin' Our Way Home*
