A "lucid, comprehensive guide" to becoming a club DJ "from beat

matching to promotion to not going deaf” by the authors of Last Night a DJ Saved My Life (Rolling Stone). Bill Brewster and Frank Broughton wrote the definitive history of the DJ in Last Night a DJ Saved My Life. Now they share their extensive knowledge of the creative and technical aspects of DJing in this clear, accessible, entertaining guide for all aspiring jocks. How to DJ Right covers every aspect of DJing from establishing a music collection and a distinctive sound, to elementary record-spinning, to the complex skills of scratching, hot-mixing, and beat-juggling, as well as the unique art of creating an evening of sound that is perfectly timed, balanced, and unforgettable. Diagrams throughout make phrases, beat timing, and song structure comprehensible without a background in music theory. The authors also include recommendation lists on everything from the best (and most fun) songs to practice with, to the best sources for building a library of disks, CDs, and MP3s. For those who want to turn pro, the authors give sage advice on the vagaries of the club and music business. Enlivened by short quotes, anecdotes, and photos of famous DJs such as Grandmaster Flash and Derrick Carter, How to DJ is the definitive book for anyone who has ever considered becoming a DJ.

Our Creative Diversity Springer Nature

It has been more than thirty-five years since the first commercial recordings of hip-hop music were made. This Companion, written by renowned scholars and industry professionals reflects the passion and scholarly activity occurring in the new generation of hip-hop studies. It covers a diverse range of case studies from Nerdcore hip-hop to instrumental hip-hop to the role of rappers in the Obama campaign and from countries including Senegal, Japan, Germany, Cuba, and the UK. Chapters provide an overview of the 'four elements' of hip-hop - MCing, DJing, break dancing (or breakin'), and graffiti - in addition to key topics such as religion, theatre, film, gender, and politics. Intended for students, scholars, and the most serious of 'hip-hop heads', this collection incorporates methods in studying hip-hop flow, as well as the music analysis of hip-hop and methods from linguistics, political science, gender and film studies to provide exciting new perspectives on this rapidly developing field.

**Beyond Beatmatching** Hal Leonard Corporation

Based on extensive research and interviews, presents a history of hip-hop that covers such topics as the evolution of the turntable, the world of DJ battles, the influence of digital technology, and the politics of race and gender.

Legendary musician Peter Hook tells the whole story - the fun, the music, the vast loss of money, the legacy - of Manchester's most iconic nightclub Peter Hook, as co-founder of Joy Division and New Order, has been shaping the course of popular music for thirty years. He provided the propulsive bass guitar melodies of 'Love Will Tear Us Apart' and the bestselling 12-inch single ever, 'Blue Monday' among many other songs. As co-owner of Manchester's Hacienda club, Hook propelled the rise of acid house in the late 1980s, then suffered through its violent fall in the 1990s as gangs, drugs, greed and a hostile police force destroyed everything he and his friends had created. This is his memory of that era and 'it's far sadder, funnier, scarier and stranger' than anyone has imagined. As young and naive musicians, the members of New Order were thrilled when their record label Factory opened a club. Yet as their career escalated, they toured the world and had top ten hits, their royalties were being ploughed into the Hacienda and they were only being paid £20 per week. Peter Hook looked back at that exciting and hilarious time to write HACIENDA. All the main characters appear - Tony Wilson, Barney, Shaun Ryder - and Hook tells it like it was - a rollercoaster of success, money, confusion and true faith.

RajB KNRao Conference Director, Birmingham Polytechnic Condition Monitoring and Diagnostic Engineering Management (COMADEM) is a relatively new field that has already made its mark in a wide range of industries. But all the signs are that even more will be required of researchers in the field over the next decade, for COMADEM directly addresses a whole range of issues that are likely to become increasingly important to companies as competitiveness increases along with the uncertainties resulting from rapid technological change. Already for example, businesses are having to scrutinize the economics of plant and machinery in greater detail than ever before; reliability is becoming a crucial factor as the costs of unscheduled breakdowns rise and there is increasing pressure on companies to demonstrate and assure improved health and safety conditions, especially in light of the growing number of catastrophic accidents that have occurred throughout the world. Because it offers solutions to these and similar problems, COMADEM is now gaining an international reputation as a problem-solving, user-friendly and financially beneficial multi-discipline with immense potential. Many people at the senior management level are now convinced that COMADEM has much to offer and are wasting no time in reaping maximum benefit from the latest developments. The fact that the first UK informal seminar on COMADEM - COMADEM 88 - proved to be a great success and had a truly international flavour reflected this growing interest in the new field.

This book examines the practice of community engagement in museums through the notion of care. It focuses on building an understanding of the logic of care that underpins this practice, with a view to outlining new roles for museums within community health and social care. This book engages with the recent growing focus on community participation in museum activities, notably in the area of health and wellbeing. It explores this theme through an analysis of the practices of community engagement workers at Tyne & Wear Archives & Museums in the UK. It examines how this work is operationalised and valued in the museum, and the institutional barriers to this practice. It presents the practices of care that shape community-led exhibitions, and

community engagement projects involving health and social care partners and their clients. Drawing on the ethics of care and geographies of care literatures, this text provides readers with novel perspectives for transforming the museum into a space of social care. This book will appeal to museum studies scholars and professionals, geographers, organisational studies scholars, as well as students interested in the social role of museums.

This book serves as a clinical guide to help the practitioner improve endodontic treatment outcomes. It focuses on the various factors affecting the prognosis of endodontic treatments and on their impact on short-term and long-term results. The text incorporates up-to-date knowledge, techniques and treatment protocols. Each chapter has been carefully chosen to address either foundational knowledge or a select aspect of endodontic treatment. The authors analyze the knowledge accumulated from a large number of outcome studies and provide the reader with a critical appraisal indicating the strengths and weaknesses of those studies. This information is then used to make recommendations on how to predict the outcome of the intended treatment. The authors emphasize that the endodontic prognosis is a multifactorial phenomenon, underscoring how various factors, singularly and in combination, influence the treatment outcome. Readers are provided with tools to successfully assess the prognosis of the proposed treatment at the outset and to execute the planned treatment focused on optimal outcome.

With detailed data from nine sites around the world, the authors examine how the so-called 'fragmentation' of these fragile landscapes occurs and the consequences of this break-up for ecosystems and the people who depend on them. 'Rangelands' make up a quarter of the world's landscape, and here, the case is developed that while fragmentation arises from different natural, social and economic conditions worldwide, it creates similar outcomes for human and natural systems.
