For all undergraduate- and graduate-level
 courses across the Nursing curriculum,
 especially clinical courses. This easy-to-
 use guide gives students instant access to

information needed to write thorough,
 individualized care plans based on the
 most recent NANDA-approved nursing
 diagnoses. Nursing Interventions
 Classifications (NIC) and Nursing Outcome
 Classifications (NOC) are incorporated
 throughout. The guide presents diagnoses
 associated with medical, surgical,
 psychiatric, perinatal, and pediatric
 patient populations. Each Plan of Care
 includes: definition of nursing diagnosis,
 defining characteristics, related factors,
 suggestions for use, suggested alternative
 diagnoses, expected outcomes and
 evaluation criteria, NIC/NOC taxonomy,
 and suggested nursing actions.

The quintessential guide to nursing diagnoses from NANDA-I experts in new updated edition Fully updated and revised by editors T. Heather Herdman, Shigemi Kamitsuru, and Camila Takáo Lopes, NANDA International Nursing Diagnoses: Definitions and Classification, 2024-2026, 13th Edition is the definitive guide to nursing diagnoses, as reviewed and approved by the NANDA International (NANDA-I) Diagnosis Development Committee (DDC). In this new edition of a seminal text, the editors have provided a more in-depth discussion on diagnosis and its linkage to assessment, using Kamitsuru's Tripartite Model of Nursing Practice to differentiate between interdependent interventions based on medical and organizational standards of care, and autonomous nursing interventions based on nursing standards of care. Functional Health Patterns are used as an assessment framework to guide nurses in collecting relevant data to drive accuracy in nursing diagnosis. Ontology, classification and taxonomy are described, and the axial structure of our diagnoses - which has seen significant revision - is explained in detail. An overview on all changes and revisions in the classification is provided, along with updated research priorities and future foci for the Diagnosis Development Committee and the NANDA-I Association. Additional Key Updates 56 new nursing diagnoses and 123 revised diagnoses Revised diagnostic indicators to decrease ambiguity and improve clarity Updated Axes with consistent assignment of axis values to each diagnosis Assignment of US National Library of Medicine, Medical Subject Headings (MeSH®) terms to provide standardized definitions and ensure consistent understanding Revised level of evidence criteria to ensure future diagnoses remain at an appropriate level of evidence to represent the current strength of nursing knowledge Web-based resources include reference lists for all new and revised diagnoses Rigorously updated and revised, the new edition of this acclaimed text is a must-have resource for all nursing students, professional nurses, nurse educators, nurse informaticists, nurse researchers, and nurse administrators. *Clinical Companion to Medical-Surgical Nursing E-Book* Elsevier Health Sciences Create individualized nursing care plans with ease and confidence! Nutrition Diagnosis Thieme

These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS. These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and

the conditions treated.
