How do we make the most of the greatest global shift in the world of work for a century and radically redesign the way we work—forever? Professor Lynda Gratton is the global thought-leader on the future of work. Drawing on thirty years of research into the technological, demographic, cultural, and societal trends that are shaping work and building on what we learned through our experiences of the pandemic, Gratton presents her innovative four-step framework for redesigning work that will help you: Understand your people and what drives performance Reimagine creative new ways to work Model and test these approaches

within your organization Act and create to ensure your redesign has lasting benefits Gratton presents real-world case studies that show companies grappling with work challenges. These include the global bank HSBC, which built a multidisciplinary team to understand the employee experience; the Japanese technology company Fujitsu, which reimagined three kinds of “perfect” offices; and the Australian telecommunications company Telstra, which established new roles to coordinate work across the organization. Whether you’re working in a small team or running a multinational, Redesigning Work is the definitive book on how to transform your organization and make hybrid working work for you.

Keating and his Party Room is the first comprehensive account of

a full term of the proceedings of the Labor Party Room—the Caucus—where the Party’s actions and performance in the Parliament are closely scrutinised and debated. Jim Snow became Chair of the Caucus following Labor’s win at the 1993 federal election. Prime Minister Paul Keating suggested the appointment of the factionally unaligned MP and the Caucus unanimously endorsed it. As Chair, he was perfectly placed to observe the deliberations of a body that Keating has called ‘the supreme authority of the government’. The Hawke and Keating economic and rationalisation policies of the 1980s and 1990s are now widely recognised as having been crucial for Australia’s future development, and they were combined with important social, environmental and industry reforms. This book covers the second Keating government, which was in power from 1993 to 1996. Snow has brought together his Caucus notes and the records of Labor’s last term in office in the 20th century to describe the government actions on the Mabo High Court ruling and in the fields of communications, superannuation, competition and the Arts. His account deals in detail with the internal leadership contest between Bob Hawke and Paul Keating, and the consequences of internal factional and union politics. The torrid 1993 and 1996 Keating federal election campaigns and three local campaigns are here, including those that saw the rise of Pauline Hanson. He also describes his own approaches to electorate success, drug law reform and over-government.

In this groundbreaking book, Bill Price and David Jaffe offer a new, game-changing approach, showing how managers are taking the wrong path and are using the wrong metrics to measure customer service. Customer service, they assert, is only needed when a company does something wrong—eliminating the need for service is the best way to satisfy customers. To be successful, companies need to treat service as a data point of dysfunction and figure what they need to do to eliminate the demand. The *Best Service Is No Service* outlines these seven principles to deliver the best service that ultimately leads to "no service": Eliminate dumb contacts Create engaging self-service Be proactive Make it easy to contact your company Own the actions across the company Listen and act Deliver great service experiences
